Police Reform from the Bottom Up Monique Marks, David Sklansky, 2014-04-10 What role can and should police unions and rank and file officers play in driving and shaping police reform Police unions and their members are often viewed as obstructionist and conservative not as change agents But reform efforts are much more likely to succeed when they are supported by the rank and file and line officers have knowledge skills and insights that can be invaluable in promoting reform Efforts to involve police unions and rank and file officers in police reform are less common than they should be but they are increasing and there is a good deal to learn about policing police reform and participatory management from the efforts made to date In this pioneering volume an international cross disciplinary collection of scholars and police unionists address a range of neglected questions both empirical and theoretical about the place of police officers themselves in the process of reform what it has been and what it could be They provide a fresh view of police reform as occurring from the bottom up rather than the top down This book will be highly useful for practitioners and scholars who have a serious interest in the possibilities and limits of police organizational change This book is based on special issues of Police Practice and Research and Policing and Society

When the Light Goes On Mike Rose, 2023-02-28 The final work from one of the most beloved voices in American education explores stories and lessons of transformative experiences in education For more than a generation American education has been structured as though it was built of and for concepts not people This has transformed education into a vast assessment scoring and ranking enterprise a sales platform for high tech entrepreneurs and a fiercely competitive arena of advantage and status that grinds the poor and propels the middle class into debt In *When the Light Goes On* educator Mike Rose features the stories of people of all ages and backgrounds to illuminate how education has added meaning to their lives The inspiring stories include A supermarket checker whose job wore away his soul takes a remedial math class that starts him on a path to architecture school A young man badly injured in a motorcycle accident finds both rehabilitation and a career in a welding program A transgender youth's odyssey to self definition extends through courses in social sciences and campus advocacy groups A Native American athlete finds graduate study as a way to use her celebrity to articulate the needs of her people *When the Light Goes On* helps us dig through the discord and fragmentation of school politics and policy to reclaim the mind and heart of education Through various students stories and his own Rose provides an urgent reminder of the core purpose of education to learn about ourselves and the world around us to spark new interests and to experience with guidance both the fulfillment and the uncertainty of exploring our limits all in the service of creating a meaningful life

Manufacturing Advantage Eileen Appelbaum, 2000 Much of the hoopla surrounding quality circles teams and high performance work systems has been based on anecdotes and very thin evidence It has not been established that those employee involvement strategies amount to anything more than another series of management fads or ruses designed to get more out of workers without giving them anything in return This revelatory book written by some of the skeptics lays some of the suspicion to rest Based on their visits to 44 plants and surveys of more than 4 000 employees Eileen Appelbaum Thomas Bailey Peter Berg and Arne L Kalleberg concluded that companies are indeed more successful when managers share knowledge and power with workers and when workers assume increased responsibility and discretion The study of steel apparel and medical electronics and imaging plants revealed much In self directed teams workers were

able to eliminate bottlenecks and coordinate the work process In task forces created to improve quality they communicated with individuals outside their own work groups and were able to solve problems Expensive equipment in steel mills operated with fewer interruptions turnaround and labor costs were cut in apparel factories and costly inventories of components and medical equipment were reduced And what did the employees think The worker survey showed that jobs in participatory work systems often provide more challenging tasks and more opportunities for creativity Employees in apparel had higher hourly earnings those in steel had both higher hourly earnings and higher job satisfaction Workers in more participatory settings were no more likely than others to report heavy workloads or excessive demands on their time They were however less likely to report involuntary overtime or conflict with co workers and were more likely to be satisfied with their surroundings Manufacturing Advantage provides the best assessment available of the effectiveness of high performance work systems Freestanding chapters near the end of the book provide full documentation of research data without interrupting the narrative flow

Globalisation and Comparative Education Joseph Zajda, Val Rust, 2021-03-24 This book focuses on discourses of globalisation in comparative education research and the politics of education reforms It analyses and evaluates the shifts in methodological approaches to globalisation and education reforms as reflected in comparative education research and their impact on education policy and pedagogy The book covers topics such as globalisation and comparative education globalisation as a multidimensional construct methods and methodologies in comparative education the moral face of post structuralism and school reforms in the age of globalisation It offers a critical analysis of education policy reforms The book demonstrates a complex nexus between globalisation ideology and education reforms On one hand democratisation and progressive pedagogy is equated with equality inclusion equity tolerance and human rights while on the other hand globalisation is perceived by some critics at least to be a totalising force that is widening the socio economic status SES gap and cultural and economic capital between the rich and the poor and bringing power domination and control by corporate bodies and powerful political economic and educational organisations The

perception of globalisation as dynamic and multi faceted processes clearly necessitates a multiple perspective approach in the study of comparative education globally This book contributes in a very scholarly way to a more holistic understanding of the nexus between globalisation comparative education research and education reforms

Learning From Saturn Saul A. Rubinstein,Thomas A. Kochan,2018-10-18 The last two decades of the twentieth century were a tumultuous time of innovation for business and labor Perhaps the boldest and most far reaching experiment in industry was the creation of the Saturn Corporation Working together as partners the UAW and General Motors built a new small car in Spring Hill Tennessee with American suppliers and American workers Saturn s locally designed manufacturing system featured self directed teams and the integration of union representatives into management s strategic and operational decision making processes Saul A Rubinstein and Thomas A Kochan have followed the Saturn story since its beginning in 1983 Through surveys as well as hundreds of interviews with

company managers union representatives and employees and with leaders of GM and the UAW they trace the history of and the lessons to be learned from this Different Kind of Company The Saturn experiment embodied a new concept of labor management relations management and organizational governance Has it been a success or a failure Is it relevant in the current industrial environment What effect has it had on GM and the UAW The authors resist overly simplistic conclusions Saturn s strengths and limitations must be fairly assessed before the company s experience can provide lessons on the future of unions labor management relations work organization and corporate governance *Learning from Comparing: new directions in comparative education research* Robin Alexander, Marilyn Osborn, David Phillips, 2000-01-01 Learning from Comparing is a major two volume study which reassesses the contribution of comparative educational research and theory to our understanding of contemporary educational problems and to our capacity to solve them At a time when educational research is under attack on the grounds of bias and irrelevance and under pressure to address only those questions which are acceptable politically as good a definition of bias as any this is a serious attempt to bridge the worlds of research policy and practice The editors have put together a collection in terms of both perspective and nationality which ensures contrasting viewpoints on each topic
