

HOW TO: RESTORE CORROSION RESISTANCE TO WELDS AND POWDER COATING.

PROBLEM:

When welding galvanized tubing, heat can vaporize the protective zinc coating near the weld. The remaining zinc provides some protection, but the zinc-free area will rust. This also applies to the interior diameter (ID) of the tube.

SOLUTION:

Zinc-rich paints and cold galvanizing compounds restore corrosion protection to the weld areas on **both the ID and OD**, with varied application methods.

Be sure to take the proper steps when cleaning the surface of weld slag and oil to insure a strong mechanical bond. For more details on this, ask for our booklet "**Restoring Corrosion Protection**".

Cold Galvanizing for Powder Coating Applications

Painting or powder coating over zinc increases the rust-free product life by **up to 5 times**. For customers who powder coat – and want additional corrosion protection in the weld zones – **cold galvanizing compounds** are available. These are both **heat resistant** (up to 750° F) and **act as a primer** for powder coating.

Advances in the Bonded Composite Repair of Metallic Aircraft Structure A.A. Baker, L.R.F. Rose, Rhys Jones, 2003-01-23 The availability of efficient and cost effective technologies to repair or extend the life of aging military airframes is becoming a critical requirement in most countries around the world as new aircraft becoming prohibitively expensive and defence budgets shrink To a lesser extent a similar situation is arising with civil aircraft with falling revenues and the high cost of replacement aircraft This book looks at repair reinforcement technology which is based on the use of adhesively bonded fibre composite patches or doublers and can provide cost effective life extension in many situations From the scientific and engineering viewpoint whilst simple in concept this technology can be quite challenging particularly when used to repair primary structure This is due to it being based on interrelated inputs from the fields of aircraft design solid mechanics fibre composites structural adhesive bonding fracture mechanics and metal fatigue The technologies of non destructive inspection NDI and more recently smart materials are also included Operational issues are equally critical including airworthiness certification application technology including health and safety issues and training Including contributions from leading experts in Canada UK USA and Australia this book discusses most of these issues and the latest developments Most importantly it contains real histories of application of this technology to both military and civil aircraft

Concrete Repair Michael G. Grantham, 2011-04-04 Concrete is an inherently complex material to produce and an even more complex material to repair With growing pressure to maintain the built environment and not simply to demolish and rebuild the need to repair concrete buildings and other structures is increasing and is expected to become of greater importance in the future This straightforward
