Restructuring in the New EU

Member States Marie-Ange Moreau, María Esther Blas-López, 2008 This book presents a series of extremely stimulating analyses of the process of corporate restructuring in the new Member States of the EU Particularly noteworthy is the book's focus on the Central and Eastern European Countries CEECs that have joined the EU since 2004 an area which has not been prominent in the research on corporate restructuring conducted in Western Europe in the last twenty years As with their Asian counterparts these States have generally been perceived as a threat to employment in Western Europe due to the former's benefiting from outsourcing away from the latter By moving east the book allows for a different perspective on the restructuring process by placing it in the context of both Europe and the numerous changes affecting the CEECs The book seeks to understand the impact of European and national level policies on the concept of restructuring the role of the *acquis communautaire* and the place of social and political actors in the process of change in the context of new Member States where multinational firms have developed mobility and establishment strategies within the context of broader European and global ones The density of this collection its wealth in terms of substantive teachings and its use of a comparative and multidisciplinary approach that links law political science sociology and economics make it an essential resource for those wishing to understand restructuring in the European space after the enlargements of 2004 and 2007 and the impact of European policies and the European Social Model
