than one involving large volumes of adjustment lending *Management in Transitional Economies* Vincent Edwards, Gennadij Polonsky, Danijel Pucko, Malcolm Warner, Ying Zhu, 2005-02-25 This is a comparative study examining the past present and future of management in the transitional economies of East and Central Europe Russia the People's Republic of China and Vietnam **Global Monetary and Economic Convergence** Gusztáv Báger, Miklós Szabó-Pelsóczy, 2018-12-21 Published in 1998 Global convergence has many aspects The first part of this volume deals with European convergence the second with convergence especially between Eastern and Western Europe The third part with practical and the fourth with theoretical issues related to Global Convergence The last part juxtaposes Hayekian and Triffinian economic thought The first of these the Hayekian relies exclusively on the profit motive of the only arbiter of the economic decision making The Triffinian thought insists that satisfactory balances can be brought about only through racial negotiation among market participants within countries and on a global scale The Hayek Triffin juxtaposition gains particular importance at a time when capital mobility labour and social mobility have reached hitherto new levels on a global scale and this challenges social coherence This difference will put social coherence under unusual stress The solution of the problems created will be the greatest challenge to economic social and political statemanship during the 21st century State, Labor, and the Transition to a Market Economy Agnieszka Paczyńska, 2015-06-19 In response to mounting debt crises and macroeconomic instability in the 1980s many countries in the developing world adopted neoliberal policies promoting the unfettered play of market forces and deregulation of the economy and attempted large scale structural adjustment including the privatization of public sector industries How much influence did various societal groups have on this transition to a market economy and what explains the variances in interest group influence across countries In this book Agnieszka Paczyńska explores these questions by studying the role of organized labor in the transition process in four countries in different regions the Czech Republic and Poland in eastern Europe Egypt in the Middle East and Mexico in Latin America In Egypt and Poland she shows labor had substantial influence on the process whereas in the Czech Republic and Mexico it did not Her explanation highlights the complex relationship between institutional structures and the critical junctures provided by economic crises revealing that the ability of groups like organized labor to wield influence on reform efforts depends to a great extent on not only their current resources such as financial autonomy and legal prerogatives but also the historical legacies of their past ties to the state This new edition features an epilogue that analyzes the role of organized labor uprisings in 2011 the protests in Egypt the overthrow of Mubarak and the post Mubarak regime
