## **Restructuring Asian Economies For The New Millennium Volume 9b:**

**Asian Economic Cooperation in the New Millennium** Calla Wiemer, Heping Cao, 2004 This volume is the outgrowth of a conference held at Peking University in May 2002 jointly sponsored by the American Committee on Asian Economic Studies the Peking University School of Economics and the China Reform Forum The contributors include leading scholars from Asia as well as specialists on Asia from the US Europe and Australia *Methodology for Impact Assessment of Free Trade Agreements* Asian Development Bank, 2011-02-01 This publication displays the menu for choice of available methods to evaluate the impact of Free Trade Agreements FTAs It caters mainly to policy makers from developing countries and aims to equip them with some economic knowledge and techniques that will enable them to conduct their own economic evaluation studies on existing or future FTAs or to critically re examine the results of impact assessment studies conducted by others at the very least **Gender Disparities in Africa's Labor Market** Jorge Saba Arbach, Alexandre Kolev, Ewa

Filipiak, 2010-08-05 Women's earnings are a fraction of male's earnings in several African countries It is tempting to conclude that this wage gap is a sign of discrimination against women in the labor market Yet this book uses new datasets to show that the gap is not simply the result of discrimination in the labor markets but rather the result of multiple factors including access to education and credit cultural values and household duties and above all labor market conditions It shows that gender disparities grow when economies are not functioning well and labor markets are tiny More than the effect of discrimination it seems that job rationing causes those with better human capital and those with more power in the household usually the men to take the few jobs that are available It is hardly surprising then that in a region where only a fraction of the labor force finds jobs in the formal sector gender disparities in earnings are so high The book further documents that firm level and sector characteristics are additional powerful factors in explaining the gender disparities in the labor market As the causes are not simple neither are the solutions multifaceted strategies are needed By providing environments that support economic growth and more importantly job creation as well as by promoting equal access for women to education and rethinking the attitudes that limit what women may achieve governments in the region will substantially improve the well being of all their peoples *Gender Disparities in Africa's Labor Market* helps to fill the knowledge gap and identify the links between gender disparities and poverty reduction The work was implemented in collaboration with a range of poverty and labor market studies to maximize its usefulness for policy dialogue in specific countries This book will be of interest to policy makers students academics gender experts and all those interested in gender issues and development **Enhancing Investment Cooperation in Northeast Asia** Joon-Kyung Kim, Ch'ang-jae Yi, 2004

the Asian economic crisis has been to shatter the belief that Asian ways of management are superior to Western ways. Now just to survive, Asian firms have come to rethink their entire way of managing, and in his latest book Richter, assisted by his contributing authors, gives a sharply focused analysis of how they are doing it. Emerging questions are: how do Asian firms adjust to the new economic realities and how do they develop their management style? There are plenty of new opportunities in Asia to play the new game, but they must be grasped and productively channeled. Richter and his contributors conclude that in the end the Asian economic crisis or catharsis may well be a blessing in disguise. It provides an opportunity to completely review the way things stand in Asia. Like entrepreneurs who built the Asian economies today's firms have the opportunity to lead a revival if they can redirect their businesses. This is an important resource for professionals in all multinational organizations and for academics and their upper level students of international business.

**The Asian Financial Crisis: New International Financial Architecture** Shalendra Sharma, 2003-10-03

The Asian financial crisis of 1997-98 shook the foundations of the global economy. What began as a localized currency crisis soon engulfed the entire Asian region. What went wrong and how did the Asian economies, long considered miracles, respond? How did the United States, Japan, and other G 7 countries react to the crisis? What role did the IMF play? Why did China remain conspicuously insulated from the turmoil raging in its midst? What lessons can be learnt from the crisis by other emerging economies? This book provides answers to all the above questions and more. It gives a comprehensive account of how the international economic order operates, examines its strengths and weaknesses, and what needs to be done to fix it. The book will be vital to students of economics, international political economy, Asian and development studies.
