Development Economics Research Trends Gustavo T. Rocha, 2008 Development economics is a branch of economics which largely deals with the economic aspects of the development process in developing countries with a focus on methods of promoting economic growth while also dealing with the economic social political and institutional mechanisms both public and private necessary to bring about rapid and large scale improvements in levels of living for the peoples living in developing countries This new book presents the latest research in this growing field

The Newly Industrializing Economies of East Asia Anis Chowdhury, Iyanatul Islam, 2005-08-09 The phenomenal success of the East Asian Newly Industrializing Economies NIEs of Korea Taiwan Hong Kong and Singapore is now well known and documented Their success has been discussed to such an extent that it has become entrenched as part of the folklore of development economics The Newly Industrializing Economies of East Asia takes a fresh look at the relevant literature and sifts the rhetoric from the reality In the course of surveying the vast range of writing two competing paradigms become clear the neo classical approach which interprets the East Asian economic miracle as the predictable outcome of good policies and the statist perspective which draws attention to the central role of the government in guiding East Asian economic development Throughout the book the authors mix country specific experiences with broader trends

The Third World And U.s. Foreign Policy Robert L. Rothstein, 2019-06-25 The quest for a viable policy toward the Third World will be a dominant theme in U S foreign policy throughout this decade But before any judgments can be made about the range of choices for U S policymakers it is necessary to understand the pressures that are likely to confront developing nations during the 1980s as well as the efforts of these nations as a group to extract greater resources and attention from the international system This

book considers policy responses that have been and are likely to be implemented by developing nations as they face increasing pressures in the areas of food energy trade and debt the main areas of interaction within the international system The author also presents an analysis of how the North South Dialogue functions and why it has produced so few genuine settlements providing an additional perspective on whether the pressures on the developing countries might be diminished by successful global negotiations The conclusions reached by examining policy responses and the Dialogue itself provide the basis for a number of specific policy prescriptions They also help to establish a framework within which U S policy initiatives toward the Third World must be formed The two concluding chapters discuss these policy choices in detail carefully analyzing the advantages and disadvantages of persisting in present policies attempting a genuine global restructuring choosing to concentrate attention on a few new influentials in the Third World and trying to construct a new approach out of selected elements of the other policy approaches
