Restructuring Schools Capturing And Assessing The Phenomena:

Restructuring Schools Joseph Murphy, 1991 In the early 1980s a series of research studies reported that American schools had failed to produce literate and numerate graduates This shortcoming was linked to the nation's declining economic position in the world marketplace which led to a widespread intensive school restructuring movement Drawing on multiple perspectives the purpose of this book is to capture what has been learned to date about restructuring schools Chapter 1 examines the impetus for rebuilding American schools by reviewing the classical arguments for organizational decentralization as well as more school specific forces supporting reform The second chapter provides an overview of restructuring and discusses the reasons why the restructured schools movement represents a significant change in thinking about education Chapters 3-5 deal specifically with major components of educational restructuring including work redesign organization and governance structures and educational processes The final chapter presents a critical examination of restructuring and the issues requiring further treatment as well as those factors that need to be addressed if change is to flourish Contains 290 references LMI

Second International Handbook of Educational Leadership and Administration Kenneth A. Leithwood, P. Hallinger, 2012-12-06 The first International Handbook of Educational Leadership and Administration Leithwood et al was published in 1996 and quickly became something of a best seller for reference works within education Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980s combined with a widespread belief in leadership as the single most powerful contribution to such improvement The roots of this belief can be found in evidence produced by the early effective schools research although there is a romance with leadership as an explanation for success in many non school enterprises as well During the two year period during which this current handbook was being written activity in the realms of school leadership school improvement and leadership development gained further momentum The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection preparation and development

School Improvement for Real David Hopkins, 2003-09-02 As societies continue to set educational goals that are on current performance beyond the capacity of the system to deliver strategies for enhancing student learning through school and classroom intervention have become increasingly important Yet as David Hopkins argues in his book many of the educational initiatives recently developed under the umbrella of school improvement are inadequate or unhelpful Simply blaming teachers and delegating financial responsibility he maintains has little positive impact on classroom practice This is the bleak context within which school improvement has to operate today School Improvement for Real offers a genuine alternative a strategy for educational change that focuses on student achievement by modifying classroom practice

and adapting the management arrangements within the school to support teaching and learning It outlines an approach to school improvement that has a medium term systemic orientation providing both principles and suggestions for better practice The author s experience in the field of school improvement ensures that the text is informed by a practical wisdom that is so often lacking from the more typical managerial texts on improvement and effectiveness *Parents' Participation in School Improvement Processes [electronic Resource] : Final Report of the Parent Participation in School Improvement Planning Project* Patricia A. Allison, Canadian Education Association, 2004
