happen when it's not and how to develop it A Requiem for a Brand Pradeep Chandra, 2011-04-06 Drawing from his extensive business management experience Pradeep Chandra turns traditional wisdom on its head when he proposes that brand loyalty is inversely proportional to the income and education levels of the knowledge consumer. A new approach to building brand loyalty that gives marketers a competitive edge in today's high-tech, high-stakes and brand-hostile environment. Marketing Management in Asia. Stanley Paliwoda, Tim Andrews, Junsong Chen, 2013-01-04 Asia is no longer simply the continent to which the world turns for outsourcing and offshoring of production, leaving retailing to Western countries. Asia now contains many of the world's largest markets, plus many emergent markets as well. North America is fast ceding ground to China as the world's largest economic power. Europe has been able to make productivity gains from trade, fiscal and monetary harmonization to remain globally competitive, while Africa, whose nations practice free trade, is largely ignored both in terms of forgiving debt and providing further credit. Each chapter of this volume details the characteristics of an individual market in Asia and demonstrates the challenges that marketers are likely to face in these environments. Covering not just production or consumption but trade as it is practiced, now this book outlines the new norms, conventions and service performance levels that these markets demand.

Hudson, 2009-12-10 Management of Agricultural, Forestry and Fisheries Enterprises theme is a component of Encyclopedia of Food and Agricultural Sciences, Engineering and Technology Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty-one Encyclopedias. Growing populations and expectations have placed extreme pressure on agricultural, forestry and fisheries resources. Sustainability of resources and resource industries will be achieved only with commitment, ingenuity and cooperation at unprecedented scale. The theme on Management of Agricultural, Forestry and Fisheries Enterprises begins with an assessment of the organization of agricultural, forestry, fisheries and rural enterprises, introducing community-based management, traditional small farms, cooperatives and marketing boards, collective and state enterprises, and integrated global corporate systems. This is followed by thorough assessments of management systems for plants, livestock, forests and fisheries. Plant management systems are based on genetic resources, water management, nutrient management and agronomic systems. Livestock production systems are considered from the standpoints of genetic resources, range and pasture-based systems, landless systems and options for diversification. Trends in the forest industry are revealed in terms of demand for a variety of products from forests, evolving policy regimes and silvicultural developments. The final topic addresses the complex issues surrounding sustainability of the world's fisheries. This theme assesses the evolving state of the main resource industries, interpreting trends and identifying challenges and
