Designing for the Disabled: The New Paradigm Selwyn Goldsmith, 2012-09-10 Selwyn Goldsmith's Designing for the Disabled has since it was first published in 1963 been a bible for practising architects around the world Now as a new book with a radical new vision comes his Designing for the Disabled The New Paradigm Goldsmith's new paradigm is based on the concept of architectural disability As a version of the social model of disability it is not exclusively the property of physically disabled people Others who are afflicted by it include women since men customarily get proportionately four times as many amenities in public toilets as women and women have to queue where men do not and those with infants in pushchairs because normal WC facilities are invariably too small to get a pushchair and infant into To counter architectural disability Goldsmith's line is that the axiom for legislation action has to be access for everyone it should not just be access for the disabled as it presently is with the Part M building regulation and relevant provisions of the 1995 Disability Discrimination Act In a 40 page annex to his book he sets out the terms that a new style Part M regulation and its Approved Document might take one that would cover alterations to existing buildings as well as new buildings But architects and building control officers need not he says wait for new a legislation to apply new practical procedures to meet the requirements of the current Part M regulation they can as he advises act positively now This is a book which will oblige architects to rethink the methodology of designing for the disabled It is a book that no practising architect building control officer local planning officer or access officer can afford to be without Practice and Progress in Social Design and Sustainability Siu, Kin Wai

Michael, Wong, Yin Lin, 2018-07-06 Designers provide creative solutions for user problems and identify the needs of users in a given environment However it is often difficult to understand the social design of a product or service Practice and Progress in Social Design and Sustainability is a critical scholarly resource that provides groundbreaking research on social contributions to design Featuring coverage on a broad range of topics such as rural sustainability ecological farmhouse designs and community public spaces this book is geared towards architects designers program planners entrepreneurs and

engineers seeking information about design for resolving social issues *Barrier-Free Design* James Holmes-Seidle,2012-08-21 This book for architects interior designers building managers students conference organisers looks at first principles to provide the user with the tools to make their own decisions rather than a cookbook approach It is intended that designs and product information can be taken straight from the manual and inserted into ongoing projects For the first time the book considers the needs of people with visual hearing and mental disabilities who make up the majority of disabled people in the population alongside those of people with physical mobility disabilities Practical low cost solutions to retro fitting existing buildings are discussed as well as the methods used to assess the suitability of an existing building and assembling a project to improve access for disabled people Specific products and designs are illustrated and discussed with full working technical drawings and full specification details These will reduce considerably the research time needed to produce a cost effective solution that will improve access for disabled people A perspective of the standards and legislation dealing with access issues in the UK is compared with those in other countries and the standards mentioned are compared with the realities of practical implementation carried out in 4 years of design in this area Geographies of Disability Brendan Gleeson,2002-09-11 This book explains how space place and mobility have shaped the experiences of disabled people both in the past and in contemporary societies The key features of this insightful study include a critical appraisal of theories of disability and a new disability model case studies to explore how the transition to capitalism disadvantaged disabled people an exploration of the Western city and the policies of community care and accessibility regulation Brendan Gleeson presents an important contribution to the major policy debates on disability in Western societies and offers new considerations for the broader debates on embodiment and space within Geography **Space, people and technology** Amira Osman,Geci Karuri-Sebina,2023-08-25 In this book there is a call on built environment professionals to reflect on the role of narrative in shaping space influencing people and making decisions about technology It is argued that by changing the narrative and methods of representations new imaginaries can be generated and the scope of what is possible is significantly broadened Contextualized narratives vocabularies and metaphors can evoke new thinking and new practice This book looks for examples where professionals and communities have jointly worked together from the precinct to the site level The authors are especially inspired by the ideas of tinkering muddling through engaging with the mess and gnarly planning concepts that encourage experimentation and engagement with real life contexts learning through doing policy change through evolutionary processes and a hands on approach This book aims to elevate our understanding of the concepts of people centred participation and co production co creation by shifting the debate from the esoteric to the applied and contextual We believe that practice can only be transformed by transforming thinking Through the development of our own philosophies emerging from and rooted in context we may shift thinking and practice towards people community and care

Inclusive Design and Accessibility Paradigms in Lebanon Itab Shuayb, 2024-03-04 This book describes the disability rights movement that started in the USA and its influence on the disability rights movement in Lebanon which has led to the endorsement of the Lebanese Disability Act 220 2000 The book introduces the reader to the Lebanese Disability Act 220 2000 its definition of disability and its relation to the medical and social models of disabilities and then articulate the Act articles Then it defines the inclusive design paradigm that acknowledges the needs of all people at each stage of their life cycle and presents the difference between inclusive design and accessibility and disability notions Moreover the book reviews the different international accessible design standards American and French that are adopted in Lebanon with the absence of a nationalized Lebanese design standard and its effect on eliminating barriers and enhancing accessibility at university buildings Besides the book presents students experiences and their satisfaction with the university built environments 6 university buildings case studies at the American University of Beirut are assessed and analysed to check whether they adopt the inclusive design approach and then propose inclusive design solutions for both heritage and modern university buildings What makes the book unique is its combination of empirical and theoretical application of inclusive design The last section reflects the author s inclusive design teaching pedagogy In this section the author shares samples of students class design project and provides recommendations and guidelines for teaching inclusive design so it becomes mainstream

Doing Disability Differently Jos Boys, 2014-05-23 This ground breaking book aims to take a new and innovative view on how disability and architecture might be connected Rather than putting disability at the end of the design process centred mainly on compliance it sees disability and ability as creative starting points for the whole design process It asks the intriguing question can working from dis ability actually generate an alternative kind of architectural avant garde To do this Doing Disability Differently explores how thinking about dis ability opens up to critical and creative investigation our everyday social attitudes and practices about people objects and space argues that design can help resist and transform underlying and unnoticed inequalities introduces architects to the emerging and important field of disability studies and considers what different kinds of design thinking and doing this can

enable asks how designing for everyday life in all its diversity can be better embedded within contemporary architecture as a discipline offers examples of what doing disability differently can mean for architectural theory education and professional practice aims to embed into architectural practice attitudes and approaches that creatively and constructively refuse to perpetuate body norms or the resulting inequalities in access to and support from built space Ultimately this book suggests that re addressing architecture and disability involves nothing less than re thinking how to design for the everyday occupation of space more generally
