

An abstract painting featuring several figures in dynamic, expressive poses, rendered in a vibrant palette of reds, yellows, and blues. The figures are overlaid on a grid of thin, light-colored lines, creating a sense of movement and structure. The overall style is reminiscent of modernist or postmodernist art.

Inventing the Future Nick Srnicek, Alex Williams, 2015-10-13 Neoliberalism isn t working Austerity is forcing millions into poverty and many more into precarious

work while the left remains trapped in stagnant political practices that offer no respite Inventing the Future is a bold new manifesto for life after capitalism Against the confused understanding of our high tech world by both the right and the left this book claims that the emancipatory and future oriented possibilities of our society can be reclaimed Instead of running from a complex future Nick Srnicek and Alex Williams demand a postcapitalist economy capable of advancing standards liberating humanity from work and developing technologies that expand our freedoms This new edition includes a new chapter where they respond to their various critics *The Economic Ideas of Marx's Capital* Ludo Cuyvers,2016-09-13

Nearly two hundred years have passed since the birth of Karl Marx and continuing to this day the influence of his economic views insights and theories can still be felt However since the publication of Das Kapital the scientific community has not been sitting idle it is time to evaluate Marx as an economist and explore what he can bring to modern economic thinking particularly post Keynesian economics Starting with Marx s schemes of reproduction which it is shown are the basis of the linear model of production as used since the 1960s by Piero Sraffa Michio Morishima and others the book reviews and assesses Marx s major economic theses These include the labour theory of value accumulation and technical change and its impact on labour the concept of unproductive labour the tendential falling rate of profits the evolution and determinants of the share of wages in national income as well as short run and long run economic dynamics The Economic Ideas of Marx s Capital updates the theses of the labour theory of value and the conditions for balanced growth using the recent scholarly literature and also further develops issues related to Marx s concept of productive labour Moreover the book analyses the intellectual relationship of Marx s economic theory with post Keynesian neo Marxism particularly in the writings of Michal Kalecki Joan Robinson and others By doing so the book shows the need and possibilities of integrating major insights of Marxist and post Keynesian theory This volume will be of interest to those who wish to explore Marx s economic theories through a non ideological approach as well as students of Marxist economics post Keynesian economics and the history of economic thought *People's Car* Sarasij Majumder,2018-11-20

India is witnessing a unique moment in populism with sentiments divided between economic reforms that promise fast industrialization and protests that thwart such industrialization This book offers an ethnographic study of divergent local responses to the proposed construction of a Tata Motors factory in eastern India that would have produced the Nano the so called people s car Initial excitement was followed by long protests among the villagers whose agricultural land was being acquired for the project After these protests secured the relocation of the factory further demonstrations followed sometimes involving the same participants seeking to bring the factory back People s Car explores this ambivalence concerning industrialization asking why long drawn resistances against corporate industrialization coexist with political rhetoric and slogans promoting fast paced industrialization Majumder argues that such contradictory rhetoric and promises target divided sentiments in rural India where land is incommensurable with money and a site specially marked by desire for middle caste small landowners aspiring to futures beyond agriculture

Previous studies of industrialization have generally focused on either demands for development or populist critiques. Moving beyond romantic clichés about urban/rural divisions, *People's Car* offers a single analytical and ethnographic framework demonstrating how pro and anti-industrialization forces feed off each other.
