Gaines, 1992-08-17 This book outlines a new ethnopsychiatry one that considers popular or folk ethnomedicines and professional psychiatric systems in the same discourse effacing the traditional distinction between psychiatry and ethnopsychiatry The essays in this volume are from a diverse interdisciplinary group representing history psychology sociology and medicine as well as anthropology The author view both ethnomedical practices and illness as local cultural constructions They consider ideologies and institutions from both professional and popular ethnopsychiatric systems in America Western Europe South Africa the Caribbean Japan and India The book demonstrates that professional and popular psychiatric medicines lie along the same local cultural continua that professional scientific psychiatries and less formalized systems of local popular psychology are epistemological relatives aspects of common cultural discourses on normality and abnormality The essays reject the notion of a universal uniform reality of psychopathology beyond cultural boundaries but the data strongly support the cultural and historically constructed nature of ethnopsychiatry in its illness ideologies and institutions Contributors to this volume include Amy V Blue Thomas Csordas Ellen Dwyer Paul E Farmer M D Atwood D Gaines Helena Jia Hershel Janis
