Marcus,2007-05-08 As the past President of the Israel Society for Autism it gives me great pleasure to c gratulate Professor Schopler and his colleagues on the publication of their new book concerning the relationship between scientific research and treatment When we in Israel began our specifically structured education program for young children with autism our work

was based on slim to scarce knowledge and information and with no experience whatsoever. Whatever information we could gather was mostly from psychological educational centers in the U S. One of the most important and significant connections was established between the TEACCH program of North Carolina led and conducted by the two important scholars Professor Eric Schopler and Professor Lee Marcus and our Israel Society for Autism. During our many encounters, seminars and conferences, we profited enormously from all their accumulated expertise and scientific research while perhaps it was also an important experience for them to see how a young society with very limited means was eventually shaping its educational program and arriving at some excellent results. We of course have the highest esteem for Governor Hunt who has been following this program with so much attention and support and we still remember his visit to Israel with distinguished representatives of the TEACCH Program. I wish the new book every success. I know it will be an enormous contribution to all those who must cope with a difficult and painful issue: autism, for whom there is no end to the need for research and continuously improving methods of care and education.

Bringing Evidence Into Everyday Practice Winnie Dunn, 2008

Evidence based research and decision making are increasingly in demand in professional practice. *Bringing Evidence into Everyday Practice: Practical Strategies for Healthcare Professionals* is a unique workbook that offers students and professionals efficient strategies for translating evidence into everyday practices. Dr. Winnie Dunn has designed *Bringing Evidence into Everyday Practice* to be used as a step by step resource for students and professionals on how to understand and use evidence available in research and how to build solid decision making patterns that will support professional practice. With a vast amount of resources available today, it is critical for both the novice and experienced practitioner to use effective tactics. By following the specific steps inside *Bringing Evidence into Everyday Practice*, a student, professional, interdisciplinary team or study group can learn how to derive meaning from research articles in a more efficient way and then use the information to make informed decisions in everyday practice. Written in a user friendly format, this text provides research articles and worksheets in a side by side layout as a convenient method for interpreting research. It includes step by step directions for understanding and using literature to craft evidence based plans in professional practice, exercises that provide practice on how to properly read research articles, activities to prepare students and clinicians on how to synthesize information across similar articles, applications that will teach how to understand methods and results and opportunities for reflecting in action about one's own current practices and how to refine them. *Bringing Evidence into Everyday Practice: Practical Strategies for Healthcare Professionals* is the only text that can both act as a companion workbook to literature and also encompass volumes of research within one text.
