Rethinking Today's Minorities:

Rethinking Today's Minorities Vincent Parrillo, 1991-01-30 The characteristics of minorities in the United States have changed significantly over the past twenty years Today's better educated more highly skilled immigrants must merge with more acculturated minority groups to achieve assimilation while still preserving the rich diversity of their ethnic heritages This concept is one focus of *Rethinking Today's Minorities* a collection of articles by some of the nation's foremost experts in the field of intergroup relations This volume offers new conceptual overviews by which to compare and evaluate acculturation The essays also focus on rethinking the nature of minorities long present in the United States including African Native and Asian Americans Suggestions for policy changes and programs for social action designed to address the needs of minority groups are also included Following an introductory overview of the changing demographics of today's minorities the contributors then discuss major developments in minority communities such as the disappearance of formerly distinctive European American ethnic groups the continuation of affirmative action and the molding of policies to benefit Native Americans and refugees The book then includes essays on the growth of the Puerto Rican community in the U S and the emerging Iranian American middle class The study concludes with a challenge to the media for its role in perpetuating ethnic stereotypes *Rethinking Today's Minorities* will be an excellent supplemental text for graduate or undergraduate courses in race and ethnic relations sociology of minorities American studies and immigration history It will also be an important reference book for school and public libraries

Diversity in America Vincent N. Parrillo, 2009 Offers both a sociohistorical perspective and a sociological analysis to provide insights into U S diversity Parrillo addresses topics that generate more passionate invective and raucous debate than all others in American society today Is multiculturalism a threat to us Should immigration be more closely controlled Are we no longer sufficiently American and why Parrillo uses history and sociology to shed light on socially constructed myths about our past misunderstandings from our present and anxieties about our future From publisher description

New Tribalisms Michael W. Hughey, 2016-03-29 The resurgence of racial ethnic and nationalist loyalties in the contemporary world are examined in this volume Considered collectively the contributors offer both a conceptual understanding of race and ethnicity and an empirical examination of their renewed importance in and implications for contemporary societies With sections on the American experience with ethnoracial pluralism and on ethnonationalist movements in other parts of the world Hughey offers an extensive treatment of the origins expressions and implications of the new tribalisms now confronting the world

Parrillo,2008-05-22 Social problems affect everyone Because so many actual and potential problems confront us it is often difficult to decide which ones affect us most severely Is it the threat of death or injury during a terrorist attack Is it the threat caused by industrial pollution that may poison us or destroy

our physical environment Or does quiet but viciously damaging gender age class racial or ethnic discrimination have the most far reaching effect Do the problems of cities affect us if we live in the suburbs Do poorer nations problems with overpopulation affect our quality of life The Encyclopedia of Social Problems offers an interdisciplinary perspective into many social issues that are a continuing concern in our lives whether we confront them on a personal local regional national or global level With more than 600 entries these two volumes cover all of the major theories approaches and contemporary issues in social problems and also provide insight into how social conditions get defined as social problems and the ways different people and organizations view and try to solve them Key Features Provides as comprehensive an approach as possible to this multifaceted field by using experts and scholars from 19 disciplines anthropology biology business chemistry communications criminal justice demography economics education environmental studies geography health history languages political science psychology social work sociology and women s studies Presents a truly international effort with contributors from 17 countries Argentina Australia Canada England France Germany Greece Hong Kong India Ireland Italy Kenya New Zealand Romania Scotland Turkey and the United States Addresses social problems that are fairly new such as computer crimes and identity theft and others that are centuries old such as poverty and prostitution Examines social problems differently from place to place and from one era to another Explains the perspectives and foundations of various social theories and offers different lenses to view the same reality Key Themes Aging and the Life Course Community Culture and Change Crime and Deviance Economics and Work Education Family Gender Inequality and Sexual Orientation Health Housing and Urbanization Politics Power and War Population and Environment Poverty and Social Class Race and Ethnic Relations Social Movements Social Theory Substance Abuse Readers investigating virtually any social problem will find a rich treasure of information and insights in this reference work making it a must have resource for any academic library

Racial Classification and History E. Nathaniel Gates, 1997 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of

periodicals than even the largest library usually holds. Even if all the articles were available on campus, chances are that a student would have to track them down in several libraries and microfilm collections. Providing, of course, that no journals were reserved for graduate students out for binding or simply missing. This convenient set saves students substantial time and effort by making available all the key articles in one reliable source.

Authoritative commentary. The series editor has put together a balanced selection of the most significant works accompanied by expert commentary. A general introduction gives important background information and outlines fundamental issues, current scholarship, and scholarly controversies. Introductions to individual volumes put the articles in context and draw attention to germinal ideas and major shifts in the field. After reading the material, even a beginning student will have an excellent grasp of the basics of the subject. Also available individually by volume:

Racism in Contemporary America Meyer Weinberg, 1996-05-23

Racism in Contemporary America is the largest and most up to date bibliography available on current research on the topic. It has been compiled by award winning researcher Meyer Weinberg who has spent many years writing and researching contemporary and historical aspects of racism. Almost 15 000 entries to books, articles, dissertations, and other materials are organized under 87 subject headings. In addition, there are author and ethnic racial indexes. Several aids help the researcher access the materials included. In addition to the subject organization, the bibliography entries are annotated whenever the title is not self explanatory. An author index is followed by an ethnic racial index which makes it convenient to follow a single group through any or all the subject headings. This is a source book for the serious study of America's most enduring problem as such, it will be of value to students and researchers at all levels and in most disciplines.

Redefining Urban and Suburban America Bruce Katz, Robert E. Lang, 2004-05-13

The early returns from Census 2000 data show that the United States continued to undergo dynamic changes in the 1990s with cities and suburbs providing the locus of most of the volatility. Metropolitan areas are growing more diverse, especially with the influx of new immigrants; the population is aging and the make up of households is shifting. Singles and empty nesters now surpass families with children in many suburbs. The contributors to this book review data on population, race, and ethnicity and household composition provided by the Census in short form and attempt to respond to three simple queries: Are cities coming back? Are all suburbs growing? Are cities and suburbs becoming more alike? Regional trends muddy the picture. Communities in the Northeast and Midwest are generally growing slowly while those in the South and West are experiencing explosive growth. Warm, dry places grew; cold, wet places declined, note two authors. Some cities are robust, others are distressed. Some suburbs are bedroom communities, others are hot employment centers while still others are deteriorating. And while some cities' cores may have been intensely developed, including those in the Northeast and Midwest, and seen population increases, the areas surrounding the cores may have

declined significantly Trends in population confirm an increasingly diverse population in both metropolitan and suburban areas with the influx of Hispanic and Asian immigrants and with majority populations of central cities for the first time being made up of minority groups Census 2000 also reveals that the overall level of black to nonblack segregation has reached its lowest point since 1920 although high segregation remains in many areas *Redefining Urban and Suburban America* explores these demographic trends and their complexities along with their implications for the policies and politics shaping metropolitan America The shifts discussed here have significant influence *Rethinking the Chicano Movement* Marc Simon Rodriguez, 2014-11-13 In the 1960s and 1970s an energetic new social movement emerged among Mexican Americans Fighting for civil rights and celebrating a distinct ethnic identity the Chicano Movement had a lasting impact on the United States from desegregation to bilingual education *Rethinking the Chicano Movement* provides an astute and accessible introduction to this vital grassroots movement Bringing together different fields of research this comprehensive yet concise narrative considers the Chicano Movement as a national not just regional phenomenon and places it alongside the other important social movements of the era Rodriguez details the many different facets of the Chicano movement including college campuses third party politics media and art and traces the development and impact of one of the most important post WWII social movements in the United States *Redefining Equality* Neal Devins, Davison M. Douglas, 1998 These essays present an array of views about the meaning of equality and provide perspectives on the on going debates about it The collection presents a range of opinions and insights that speak to America's ability to define and deal with the politics of equality **District of Columbia Appropriations for Fiscal Year 2003** United States. Congress. Senate. Committee on Appropriations. Subcommittee on District of Columbia, 2003 *Multicultural Politics* Tariq Modood, 2005 Examines the modern problem of religious identity and cultural racism *Postmodernism & a Sociology...(c)* , In the fifth volume in the Studies in American Sociology Series Stanford M Lyman offers commentaries on and critiques of postmodernism poststructuralism and deconstruction posing questions concerning theoretical and epistemological problems arising from what appears to be a nouvelle vague Postmodernism poststructuralism and deconstructionism are interrelated aspects of the newest theoretical development in sociology and the social sciences This new wave of thought challenges virtually all paradigms currently in use In this his fifth volume in the Studies in American Sociology Series Stanford M Lyman offers commentaries on and critiques of this new perspective posing questions concerning theoretical and epistemological problems arising from what appears to be a nouvelle vague Among the basic themes and issues explored are the allegation that modernity has defaulted on the promise of the Enlightenment the question of whether the rational basis for knowledge and action is still valid the controversy over the place of metanarratives and macrosociological outlooks and newer concerns over race gender sexual preferences the self and the Other Professor Lyman provides empirically based and historically specific analyses of the relation of the race question to the problem of otherness and to the legal construction of racial identity in

American court proceedings Focusing on the issues of citizenship affecting European Middle Eastern and Asian immigrants African Americans and the special cases of the Chinese and Native Americans he relates major public problems to the modern as well as the postmodern perspectives on justice The debate over assimilation and multiculturalism the dynamics of gender specific emotions as expressed in six decades of Hollywood films and the postmodern approach to deviance are each examined He also offers proposals for a social science attuned to but critical of postmodernism and poststructuralism Such a sociology might offer a perspective that treats the drama of social relations in the routine as well as the remarkable aspects of everyday life Professor Lyman provides not only a new understanding of postmodernism but also a program of how to proceed with respect to its challenges

Redefining Higher Education Melvyn L. Fein, 2022-02-26 Higher education is in trouble Commentators of all stripes bemoan escalating costs and diminishing quality Solutions have been offered from all quarters but tend to be piecemeal and all too often ideological In this tough minded look at the history current climate and future of university education in the United States Melvyn L Fein re-examines the mission of higher education and outlines what institutions can do to better prepare students for an ever more complex techno-commercial society Fein argues that students must have the opportunity to explore and discover what works for them and that the most important tool for institutions of higher education is self-direction Professors must be allowed to teach in their own ways bringing their own experience into the classroom Since university missions differ both universities and professors need the freedom to make decisions independently The imminent need is for a democratic elite consisting of self-directed leaders who possess technical and social expertise as well as personal motivation The tools for change are appropriate curricula communities of learners and a genuine marketplace of ideas While there is no magic bullet Fein contends that we can and should build on the achievements of the past so as to evolve more responsive educational institutions those that promote merit responsibility and universalism

Emergence of Minorities in the Middle East Benjamin Thomas White, 2011-07-31 Shows which historical developments led people to start describing themselves and others as minorities Through close attention to what changed in French mandate Syria and what those changes entailed Benjamin White argues for a careful reappraisal of the term minority Within a few years of World War I the term had become fundamental to public understandings of national and international politics law and society Minorities and majorities were taken to be an objective reality both in the present and the past In Syria the mandate period saw the consolidation of the nation-state form despite French attempts to create territorial political and legal divisions There was a trend towards a

coherent national territory with fixed borders and uniform state authority within them while the struggle to control the state was played out in the language of nationalism developments in the post Ottoman Levant that closely paralleled events in Europe at the same time following the demise of the Austro Hungarian and tsarist empires Through close attention to what changed in French mandate Syria and what those changes meant the book argues for a careful rethinking of a term too often used as an objective description of reality
