Reticuloendothelial System Vol 5 A Comprehensive Treatise Cancer

Sherwood M. Reichard

Reticuloendothelial System Vol 5 A Comprehensive Treatise Cancer:

The Reticuloendothelial System Herman Friedman, 2012-12-06 This comprehensive treatise on the reticuloendothelial system is a project jointly shared by individual members of the Reticuloendothelial RE Society and bio medical scientists in general who are interested in the intricate system of cells and molecular moieties derived from these cells which constitute the RES It may now be more fashionable in some quarters to consider these cells as part of what is called the mononuclear phagocytic system or the lymphoreticular system Nevertheless because of historical developments and current interest in the subject by investigators from many diverse areas it seems advantageous to present in one comprehensive treatise current information and knowledge concerning basic aspects of the RES such as morphology biochemistry phylogeny and ontogeny physiology and pharmacology as well as clinical areas including immunopathology cancer infectious diseases allergy and hypersensitivity It is anticipated that by presenting information concerning these apparently heterogeneous topics under the unifying umbrella of the RES attention will be focused on the similarities as well as interactions among the cell types constituting the RES from the viewpoint of various disciplines The treatise editors and their editorial board consisting predominantly of the editors of individual volumes are extremely grateful for the enthusiastic cooperation and enormous task undertaken by members of the biomedical community in general and especially by members of the American as well as European and Japanese Reticuloendothelial Societies

The Immunologic Revolution Andor Szentivanyi, Herman Friedman, 2024-11-15 This unique volume contains reviews by some of the most prominent immunologists in the world The authors present vital facts for each of their areas of expertise and provide individual perspectives on how their own contributions were developed and how these contributions influenced general immunological thinking and development This impressive collection of personal reviews by these internationally renowned immunologists makes The Immunologic Revolution an important and lasting contribution to the entire biomedical community

Infection M.R. Escobar, J.P. Utz, 2013-11-11 This comprehensive treatise on the reticuloendothelial system is a project jointly shared by individual members of the Reticuloendothelial RE Society and bio medical scientists in general who are interested in the intricate system of cells and molecular moieties derived from those cells that constitute the RES It may now be more fashionable in some quarters to consider these cells as part of what is called the mononuclear phagocytic system or the lymphoreticular system Nevertheless because of historical developments and current interest in the subject by investigators from many diverse areas it seems advantageous to present in one comprehensive treatise current information and knowledge concerning basic aspects of the RES such as morphology biochemistry phylogeny and ontogeny physiology and pharmacology as well as clinical areas including immunopathology cancer infectious diseases allergy and hypersensitivity It is anticipated that by presenting information concerning these apparently heterogeneous topics under the unifying umbrella of the RES attention will be focused on the similarities as well as interactions among the cell types constituting the RES from the

viewpoint of various disciplines The treatise editors and their editorial board consisting predominantly of the editors of individual volumes are extremely grateful for the enthusiastic cooperation and enormous task undertaken by members of the biomedical community in general and especially by members of the American as well as European and Japanese Reticuloendothelial Societies

JNCI, Journal of the National Cancer Institute National Cancer Institute (U.S.),1986

Journal of the National Cancer Institute ,1986

Virus-Induced Immunosuppression Steven Specter, Mauro Bendinelli, Herman Friedman, 2012-12-06

It is now widely acknowledged that at the beginning of this century Claude von Pirquet first pointed out that a viral disease i.e. measles resulted in an anergy or depression of preexisting immune response namely delayed continuous hypersensitivity to PPD derived from *Mycobacterium tuberculosis* Thereafter observations that viral infections may result in immunosuppression have been recorded by many clinicians and infectious disease investigators for six or seven decades Nevertheless despite sporadic reports that infectious diseases caused by viruses may result in either transient or prolonged immunodepression investigation of this phenomenon languished until the mid 1960s when it was pointed out that a number of experimental retroviral infections of mice with tumor viruses may result in marked immunosuppression However it was not until the recognition of the new epidemic of acquired immunodeficiency syndrome AIDS caused by the human immunodeficiency virus and related viruses that acquired immunodeficiencies associated with virus infection became general knowledge among biomedical investigators as well as the lay public A number of reviews published during the past decade or so pointed out that numerous viruses may affect humoral and cellular immune responses Furthermore expanding knowledge about the nature and mechanisms of both humoral and cellular immunity and pathogenesis of viral infections has provided clinical and experimental models for investigating in depth how and why viruses of man and animals profoundly affect immune responses

American Cancer Society Textbook of Clinical Oncology

Arthur I. Holleb, Diane J. Fink, Gerald Patrick Murphy, 1991

Immunopharmacology Reviews Volume 2 J.W. Hadden, A. Szentivanyi, 2013-11-11

A thoroughly enjoyable and very useful work As the editors say in their preface we have intended these reviews to be the best by the best they make this point very convincingly

ASM News from a review of Volume 1

This series continues to present the most current findings in the field of immune manipulation Here twelve chapters provide detailed coverage of cancer microbial and allergy immunopharmacology as well as autoimmunity and neuroimmunomodulation

Annual Review of Gerontology and Geriatrics, Volume 2, 1981 ,1981-01-15

The second volume in this long running series presents the usual critical and intensive review chapters divided into five sections but also addresses particular topics of special interest including drugs and their use and misuse among the aged the nonmedication orientation to treatment of various disorders the immune system and clinical procedures in the management of urinary incontinence As with all the volumes the contributors represent an international array of leading experts
