Security Order And The Bomb:

Strategic Analysis and the Management of Power Olav F. Knudsen, 2016-07-27 The book is a tribute to Johan Jorgen Holst Norway's late Minister of Foreign Affairs It considers the outstanding issues of our time the high politics of East West confrontation and the post Cold War readjustment in Europe Holst contributed significant ideas to the handling of these issues Though representing merely a small state Johan Holst's mastery of the subject matter and authoritative personal presence gave him an influential voice in high level discourse on Western policy during more than two decades

Arms Control and Technological Innovation David Carlton, Carlo Schaerf, 2024-11-02 First published in 1977 Arms Control and Technological Innovation is primarily concerned with three subjects the causes of the arms race the consequences of the arms race to the world and the control of the arms race Written by experts in the field it brings themes like new technologies and new weapon systems new tactics to replace tactical nuclear weapons in Europe the Anglo American nuclear relationship strategic arms limitation and military strategic concepts and a new approach to strategic arms limitation and reduction The book argues that the principal problem of the arms race according to several lectures is that weapons and delivery systems technology have developed so much as to threaten the survival of civilization itself The pace of technological change is proceeding more rapidly than ever before and there is serious doubt whether political institutions are adapting to this change in time to avoid devastating consequences to the world This book is a must read for scholars and researchers of military and strategic studies international relations international politics and geopolitics

Allenby,2016-12-05 The essays in this volume illustrate the difficult real world ethical questions and issues arising from accelerating technological change in the military and security domains and place those challenges in the context of rapidly shifting geopolitical and strategic frameworks Specific technologies such as autonomous robotic systems unmanned aerial vehicles cybersecurity and cyberconflict and biotechnology are highlighted but the essays

are chosen so that the broader implications of fundamental systemic change are identified and addressed. Additionally, an important consideration with many of these technologies is that even if they are initially designed and intended for military or security applications, they inevitably spread to civil society where their application may raise very different ethical questions around such core values as privacy, security from criminal behaviour, and state police power. Accordingly, this volume is of interest to students of military or security domains as well as to those interested in technology and society and the philosophy of technology.

Dimensions of Peace and Security Gustaaf Geeraerts, Natalie Pauwels, Éric Remacle, 2006
The terrorist attacks of September 11th 2001 on the United States provoked a significant shift in thinking about peace and security, and much has since been written about new security threats and challenges. This collection of essays revisits some of the more traditional concepts of peace and security that remain valid and pertinent today despite having ceded much of the limelight to the major security preoccupations of the current era: international terrorism, weapons of mass destruction, rogue states, and related phenomena. The book covers numerous salient topics from arms production, monitoring and control to disarmament and conversion, through to peacekeeping and conflict prevention. The contributions differ in scope, form, and analysis, ranging from historical and philosophical to contemporary and political perspectives and approaches to peace and security.
