The Case Against Assisted Suicide Kathleen M. Foley, Herbert Hendin, 2004-04-29 In The Case against Assisted Suicide For the Right to End of Life Care Dr Kathleen Foley and Dr Herbert Hendin uncover why pleas for patient autonomy and compassion often used in favor of legalizing euthanasia do not advance or protect the rights of terminally ill patients Incisive essays by authorities in the fields of medicine law and bioethics draw on studies done in the Netherlands Oregon and Australia by the editors and contributors that show the dangers that legalization of assisted suicide would pose to the most vulnerable patients Thoughtful and persuasive this book urges the medical profession to improve palliative care and develop a more humane response to the complex issues facing those who are terminally ill **Seduced by Death** Herbert Hendin, 1997-01-01 Examines the use of euthanasia and assisted suicide that have been in common practice in the Netherlands for more than twenty years and explores the ramifications of legalizing euthanasia for patients their families and medical practitioners **The Contribution of Natural Law Theory to Moral and Legal Debate Concerning Suicide, Assisted Suicide, and Euthanasia** Craig Paterson, 2010-05-13 **International Human Rights Law** Olivier De Schutter, 2014-08-07 This fully updated edition offers coverage of new topics and a more student friendly design while retaining the original style and features Euthanasia and Physician-assisted Suicide Michael Manning (M.D.), 1998 A concise overview of the history and arguments surrounding euthanasia and physician assisted suicide The Oxford Handbook of Practical Ethics Hugh LaFollette, 2005-09-15 This is a guide to contemporary thought on ethical issues in all areas of human activity personal medical sexual social political judicial and international from the natural world to the world of business **Death with Dignity** Robert Orfali, 2011 In this book the author makes a case for legalized physician assisted dying Using the latest data from Oregon and the Netherlands he puts a new slant on perennial debate topics such as slippery slopes the integrity of medicine and sanctity of life This book provides an in depth look at how we die in America today It examines the shortcomings of our end of life system You will learn about terminal torture in hospital ICUs and about the alternatives hospice and palliative care The author scrutinizes the good the bad and the ugly He provides a critique of the practice of palliative sedation The book makes a strong case that assisted dying complements hospice By providing both Oregon now has the best palliative care system in America This book above all may help you or someone you care about navigate this strange landscape we call end of life It can be an informed guide to a good death in the age of hospice and high tech medical intervention **Military Medical Ethics** Anthony E. much longer to die often in great pain and suffering In 1900 the average age at which people died in America was 47 years of age the primary causes of death were tuberculosis and other respiratory illnesses In the 21st century as a result of better health care and working conditions as well as advances in medical technology we live much longer as of 2016 about 80 years A much larger proportion of Americans now die from chronic diseases that generally appear at an advanced age such as heart disease cancer or chronic obstructive pulmonary disease COPD Should this fundamental change in human lifespan alter how society and government view right to die legislation What are the pros and cons of giving a mentally competent person who is terminally ill and in great pain the right to end his or her life The Right to Die A Reference Handbook provides a complete examination of right to die issues in the United States that dissects the complex arguments for and against a person's liberty to receive a physician's assistance to hasten death It covers the legal aspects and the politics of the right to die controversy analyzes the battles over the right to die in state and federal courts and supplies primary source documents that illustrate the political medical legal religious and ethical landscape of the right to die Additionally the book examines how members of our society typically die has changed in the past 150 years and how the practice of medicine has evolved over that time explains why the right to die is strongly opposed by many religious groups as well as members of the medical profession considers the slippery slope argument against doctor assisted suicide and identifies the reasons that the disabled the poor the elderly and infirm and some members of ethnic racial and religious minority groups typically fear physician assisted death

Dying Right Daniel Hillyard, John Drombrink, 2002-06 *Dying Right* provides an overview of the Death With Dignity movement a history of how and why Oregon legalized physician assisted suicide and an analysis of the future of physician assisted suicide. Engaging the question of how to balance a patient's sense about the right way to die a physician's role as a healer and the state's interest in preventing killing *Dying Right* captures the ethical legal moral and medical complexities involved in this ongoing debate. *United States Reports* United States. Supreme Court, 2000 *Official Reports of the Supreme Court* United States. Supreme Court, 1997

Ending Life Margaret Pabst Battin, 2005-05-05 Margaret Pabst Battin has established a reputation as one of the top philosophers working in bioethics today. This work is a sequel to Battin's 1994 volume *The Least Worst Death*. The last ten years have seen fast moving developments in end of life issues from the legalization of physician assisted suicide in Oregon and the Netherlands to furor over proposed restrictions of scheduled drugs used for causing death and the development of NuTech methods of assistance in dying. Battin's new collection covers a remarkably wide range of end of life topics including suicide prevention AIDS suicide bombing serpent handling and other religious practices that pose a risk of death genetic prognostication suicide in old age global justice and the duty to die and suicide physician assisted suicide and euthanasia in both American and international contexts. As with the earlier volume these new essays are theoretically adroit but draw richly from historical sources fictional techniques and ample factual material.

Euthanasia and Physician-Assisted Suicide Gerald Dworkin, R. G. Frey, Sissela Bok, 1998-08-28 *A Cry for Help* [The Price of Compassion](#) Michael Stiglitz, 2010-05-12 This important book includes a compelling selection of original essays on euthanasia and associated legislative and health care issues together with important background material for understanding and assessing the arguments of these essays. The book explores a central strand in the debate over medically assisted death the so called slippery slope argument. The focus of the book is on one particularly important aspect of the downward slope of this argument hastening the death of those individuals who appear to be suffering greatly from their medical condition but are unable to request that we do anything about that suffering because of their diminished mental capacities. Slippery slope concerns have been raised in many countries including Britain the Netherlands Canada and the United States. This book concentrates most of its attention on the latter two countries. Stiglitz divides the book into four parts. Part I lays out the relevant public policies in the form of legal judgments making them the philosophical point of departure

for readers Part II discusses the ever present slippery slope objection to assisted suicide and other forms of euthanasia Parts III and IV examine the role of social factors and political structures in determining the morality and legalization of voluntary and non voluntary euthanasia These sections are especially valuable The inclusion of a selection of papers on the relationship between the morality and legality of euthanasia and systems of health care delivery is of particular interest especially to those who want to make statistical legal and moral comparisons between the USA and Canada

Death in Literature Outi Hakola, Sari Kivistö, 2014-05-02 Death is an inevitable yet mysterious event Fiction is one way to imagine and gain knowledge of death Death is very useful to literature as it creates plot twists suspense mysteries and emotional effects in narrations But more importantly stories about death seem to have an existential importance to our lives Stories provide fictional encounters with death and give meaning for both death and life Thus death is more than a physical or psychological experience in literature it also highlights existential questions concerning humanity and storytelling This volume entitled Death in Literature approaches death by examining the narratives and spectacles of death dying and mortality in different literary genres The articles consider literary representations of death from ancient Rome to the Netherlands today and explore ways of dealing with death and dying The discussions also transcend the boundaries of literature by studying literary representations of such socially relevant and death related issues as euthanasia and suicide The articles offer a broad perspective on death's role in literature as well as literature's role in the social and cultural debates about death

Biblical Psychotherapy Kalman J. Kaplan, Paul Cantz, 2017-11-29 In Biblical Psychotherapy Kalman J Kaplan and Paul Cantz offer a new approach to suicide prevention based on biblical narratives that is designed to overcome the suicidogenic patterns in Greek and Roman stories implicit in modern mental health More than sixteen suicides and self mutilations emerge in the twenty six surviving tragedies of Sophocles and Euripides and countless others occurred in Greek and Roman lives In contrast only six suicides are found in the Hebrew Scriptures in addition to a number of suicide prevention narratives Kaplan and Cantz reclaim life enhancing biblical narratives as alternatives to matched suicidal stories in Greek and Roman society with regard to seven evidence based risk factors These biblical narratives are employed to treat fourteen patients fitting into the outlined Graeco Roman suicidal syndromes and to provide an in depth positive psychology aimed at promoting life rather than simply preventing suicide
