Manghani, 2015-10-28 Each of the five volumes in the Stone Art Theory Institutes series brings together a range of scholars who are not always directly familiar with one another's work The outcome of each of these convergences is an extensive and unpredictable conversation on knotty and provocative issues about art This fifth and final volume in the series focuses on the identity nature and future of visual studies discussing critical questions about its history objects and methods The contributors question the canon of literature of visual studies and the place of visual studies with relation to theories of vision visuality epistemology politics and art history giving voice to a variety of inter and transdisciplinary perspectives Rather than dismissing visual studies as its provocative title might suggest this volume aims to engage a critical discussion of the state of visual studies today how it might move forward and what it might leave behind to evolve in productive ways The contributors are Emmanuel Alloa Nell Andrew Linda Bez Rub Martin A Berger Hans Dam Christensen Isabelle Decobecq Bernhard J Dotzler Johanna Drucker James Elkins Michele Emmer Yolaine Escande Gustav Frank Theodore Gracyk Asbjørn Grønstad Stephan Günzel Charles W Haxthausen Miguel Hernández Navarro Tom Holert K van Kesteren Charlotte Klonk Tirza True Latimer Mark Linder Sunil Manghani Anna Notaro Julia Orell Mark Reinhardt Vanessa R Schwartz Bernd Stiegleryvind Vignès Sjoukje van der Meulen Terri Weissman Lisa Zaher and Marta Zarzycka     **Theorizing Images** Žarko Paić, 2016-04-26 This

book uncovers an underlying dispute over the role images play in contemporary society and consequently over their values and purposes Two decades after the concepts of the pictorial and the iconic turn changed our vernacular involvement with regard to images it has become clear that it was not only a newly discovered social political or sexual construction of the visual field that brought turbulence into disciplinary knowledge but that images have their own pictorial logic with powers exceeding those that are purely iconic or visually discernible Instead of underscoring previously defined concepts of the picture the contributors to this book view visual studies and Bildwissenschaft merely as a place for the theory of images making a case for the hotly debated topic of their powers and weaknesses on the one hand and of their respective theories on the other Therefore as the title indicates this book theorizes images but it does not present a theory of images because visual studies cannot lead to a unified theory of images unless a unified ontology of images can be agreed upon first Although that

would be a different task altogether all the contributions in this book in different ways and at different paces by theorizing images in their aesthetic historical media and technological guises pave the way for the future of visual culture and for the image science that will make this future more comprehensible *Picture World* Rachel Teukolsky,2020-08-16 The modern media world came into being in the nineteenth century when machines were harnessed to produce texts and images in unprecedented numbers In the visual realm new industrial techniques generated a deluge of affordable pictorial items mass printed photographs posters cartoons and illustrations These alluring objects of the Victorian parlor were miniaturized spectacles that served as portals onto phantasmagoric versions of the world Although new kinds of pictures transformed everyday life these ephemeral items have received remarkably little scholarly attention *Picture World* shines a welcome new light onto these critically neglected yet fascinating visual objects They serve as entryways into the nineteenth century's key aesthetic concepts Each chapter pairs a new type of picture with a foundational keyword in Victorian aesthetics a familiar term reconceived through the lens of new media Character appears differently when considered with caricature in the new comics and cartoons appearing in the mass press in the 1830s likewise the book approaches realism through pictorial journalism illustration via illustrated Bibles sensation through carte de visite portrait photographs the picturesque by way of stereoscopic views and decadence through advertising posters *Picture World* studies the aesthetic effects of the nineteenth century's media revolution it uses the relics of a previous era's cultural life to interrogate the Victorian world's most deeply held values arriving at insights still relevant in our own media age **SAGE Visual Methods** Jason Hughes,2012-07-23 In contemporary Western societies the visual domain has come to assume a hitherto unprecedented cultural centrality Daily life is replete with a potentially endless stream of images and other visual messages from the electronic and paper based billboards of the street to the TV and Internet feeds of the home The visual has become imbued with a symbolic potency a signifying power that seemingly eclipses that of all other sensory data The central aim of this four volume collection is to explore key approaches to visual research methods and to consider some of the core principles issues debates and controversies surrounding the use of visual techniques in relation to three key enterprises 1 documentation and representation 2 interpretation and classification and 3 elicitation and collaboration Volume One Principles Issues Debates and Controversies in Visual Research serves as a theoretical backdrop to the field as a whole It introduces core epistemological ethical and methodological debates that effectively cut across the four volume collection as a whole Volume Two Documentation and Representation illustrates approaches to visual documentation and representation from classical documentaries to contemporary state of the art modes of visual anthropology and ethnography Volume Three Interpretation and Classification examines core debates surrounding and approaches to visual analysis Volume Four Elicitation and Collaboration explores participative approaches to visual inquiry **The Comic Book as Research Tool** Stephen R. O'Sullivan,2023-11-06 This book contributes to a growing body of work celebrating the visual methods and tools that aid

knowledge transfer and welcome new audiences to social science research Visual research methodological milestones highlight a trajectory towards the adoption of more creative and artistic media As such the book is dedicated to exploring the creative potential of the comic book medium and how it can assist the production and communication of scientific knowledge The cultural blueprint of the comic book is examined and the unique structure and grammar of the form deconstructed and adapted for research support Along with two illustrated research comics Toxic Play and 10 Business Days the book offers readers numerous comic based illustration activities and creative visual exercises to support data generation foster conversational knowledge exchanges facilitate inference analysis and interpretation while nurturing the necessary skills to illustrate and create research comics The book engages a diverse audience and is an illuminating read for visual novices experts and all in betweeners
