China, a Multimedia Guide Mary Robinson Sive, 1982 **Esquire** , 1939 Islamic Heritage Architecture and Art III J. Casares, S. Dominguez Amarillo, 2020-08-11 Islamic architecture has enriched design with a wide variety of structural shapes including among others unique arches a wide variety of vaults and domes which allow for new forms to be developed The influence that these structural forms have in non Islamic countries was one of the themes of the 3rd International Conference on Islamic Heritage Architecture and Art at which the included papers were presented There is much to learn from past experiences to arrive at solutions which are environmentally sound and sustainable in the long term As conventional energy resources become scarce the Islamic design heritage can offer invaluable lessons on how to deal in an efficient manner with cases of hard and extreme environments Traditional architecture and urban environments in most Islamic countries are now being eroded by overemphasis on a global type of architecture and city planning As a consequence many regions are losing their identity It will become increasingly important for new developments to take light of what the classical Islamic urban designs and architectures have to offer modern society An equally important aspect covered is the analysis of the materials employed and the types of structural elements particularly those unique to Islamic architecture Preserving this heritage requires the development of appropriate conservation techniques in response to the different materials used and the ways structural forms work including under extreme conditions such as earthquakes These papers deal with the design of many types of buildings in Islamic countries including not only the better known public buildings like mosques mausolea citadels and forts but also houses and gardens engineering works such as bridges and dams irrigation systems and many others which have also had a profound impact on society *India, China and the Strategic Himalayas* Sangeeta Thapliyal, 2023-10-20 This book analyses strategic discourse on the Himalayas from the perspective of India s interests Home to many communities cultures natural resources and political boundaries it is the geopolitical landscape of the Himalayas between India and China that dominates other narratives and discourses The traditional notion of Himalayas as India s

frontiers and buffer is challenged by China Despite various mechanisms to address border resolution there are violations and transgressions from China This book examines India s responses to the new emerging challenges in the Himalayas How the statist discourse on strategic interests incorporates people s discourse It provides a nuanced understanding of India s strategic undertakings diplomatic initiatives and development framework This book will be a valuable addition to existing knowledge on the Himalayas between India and China Scholars and practitioners interested in International Relations Strategic Studies Himalayan Studies and South Asian Studies will find it useful Cumulative Book Index ,1925 A world list of books in the English language **Monographic Series** Library of Congress,1980 *The New Rich in China* David Goodman,2008-05-07 Three decades of reform since 1978 in the People s Republic of China have resulted in the emergence of new social groups which have included new occupations and professions generated as the economy has opened up and developed and most spectacularly given the legacy of state socialism the identification of those who are regarded as wealthy However although China s new rich are certainly a consequence of globalization there remains a need for caution in assuming either that China s new rich are a middle class or that if they are they should immediately be equated with a universal middle class Including sections on class status and power agency and structure and lifestyle *The New Rich in China* investigates the political socio economic and cultural characteristics of the emergent new rich in China the similarities and differences to similar phenomenon elsewhere and the consequences of the new rich for China itself In doing so it links the importance of China to the world economy and helps us understand how the growth of China s new rich may influence our understanding of social change elsewhere This is a subject that will become increasingly important as China continues its development and private entrepreneurship continues to be encouraged and as such *The New Rich in China* will be an invaluable volume for students and scholars of Chinese studies history and politics and social change **Community Capitalism in China** Xiaoshuo Hou,2013-02-18 Hou proposes to end the dichotomous view of the state and the market and capitalism and communism by examining the local institutional innovation in three villages in China and presents community capitalism as an alternative to the neoliberal model of development Community is both the unit of redistribution and the entity that mobilizes resources to compete in the market collectivism creates the boundary that sets the community apart from the outside and justifies and sustains the model Community capitalism differs from Mao era collectivism when individual interests were buried in the name of collective interests and market competition was not a concern This book demonstrates the embeddedness of the market in community showing how social relations group solidarity power honor and other values play an important role in these villages social and economic organization **Intimate China the Chinese as I Have Seen Them** MRS ARCHIBALD. LITTLE,2020-08-04 Reproduction of the original *Intimate China the Chinese as I Have Seen Them* by Mrs Archibald Little Books in Print Supplement ,1982 **Tiger Girls** Minglu Chen,2012-03-29 The existing scholarship on women in China suggests that gender inequality still exists against the background of the country s

reform and opening in recent years. However, the situation of women in enterprise ownership and leadership seems to indicate that despite such notions of disadvantage amongst women, some of them are playing a more active and significant role in China's economic development. Based on a series of interviews with female enterprise owners, wives of enterprise owners, and women managers conducted in diverse locations in three different provinces of China, *Tiger Girls* examines the deeper realities of women entrepreneurs in China and, by extension, the role of leading women in the workforce. By analyzing information on these women's personal experiences, careers, and families, this book investigates their status at work and at home as well as their connections with local politics. The research results suggest that although traces of gender inequality can still be found in these women's lives, they appear to be actively engaged in the business establishment and operation and gradually casting off the leash of domestic responsibilities. This book will be of interest to students and scholars of Chinese Studies, Chinese Business, Chinese Economics, and Asian Studies. Minglu Chen is ARC Postdoctoral Fellow in the Department of Government and International Relations at Sydney University, Australia.
