Routledge International Handbook of Sustainable Development Michael Redclift, Delyse Springett, 2015-03-02 This Handbook gives a comprehensive international and cutting edge overview of Sustainable Development It integrates the key imperatives of sustainable development namely institutional environmental social and economic and calls for greater participation social cohesion justice and democracy as well as limited throughput of materials and energy The nature of sustainable development and the book's theorization of the concept underline the need for interdisciplinarity in the discourse as exemplified in each chapter of this volume The Handbook employs a critical framework that problematises the concept of sustainable development and the struggle between discursivity and control that has characterised the debate It provides original contributions from international experts coming from a variety of disciplines and regions including the Global South

Comprehensive in scope it covers amongst other areas Sustainable architecture and design Biodiversity Sustainable business Climate change Conservation Sustainable consumption De growth Disaster management Eco system services Education Environmental justice Food and sustainable development Governance Gender Health Indicators for sustainable development Indigenous perspectives Urban transport The Handbook offers researchers and students in the field of sustainable development invaluable insights into a contested concept and the alternative worldviews that it has fostered Contract Farming, Capital and State Ritika Shrimali, 2021-08-24 The book argues that an increasing corporatisation of agriculture in India that is enabled by its neoliberal State in the name of development is contributing towards deepening of inequality in the rural India It says that Contract Farming CF acts as a conduit that enables the coming together of myriad production relations mercantile finance productive to sell agri commodities to the capitalist peasant It is an accumulation strategy that brings together various factions of domestic and foreign capital together It shows that CF as an accumulation strategy is enabled by an active interventionist state and this neoliberal Indian state mediates the relation between the agri capital and Indian peasantry The book further analyzes contract farming as a part of the totality of the capitalist mode of production in context of developing countries with a large agrarian base asking three fundamental questions what is CF how and why is it done and what are the implications of it **Farm to Fingers** Kiranmayi Bhushi, 2018-03-09 Enquires into the ways in which food and its production and consumption are enmeshed in aspects of human existence and society taking India and its interaction with food as its focal point *Contesting Africa's New Green Revolution* Jacqueline A. Ignatova, 2021-05-20 Genetically modified crops have become a key element of development strategies across the Global South despite remaining deeply controversial Proponents hail them as an example of pro poor innovation while critics regard them as a threat to food sovereignty and the environment The promotion of biotechnology is an integral part of new Green Revolution for Africa interventions and is also intimately linked to the rise of philanthrocapitalism which advances business solutions to address the problem of poverty Through interviews with farmers policymakers and agricultural scientists Jacqueline Ignatova shows how efforts to transform the seed sector in northern Ghana one of the key laboratories of this new Green Revolution may serve to exacerbate the inequality it was notionally intended to address But she also argues that its effects in Ghana have been far more complex than either side of the debate has acknowledged with local farmers proving adept at blending traditional and modern agricultural methods that subvert the interests of global agribusiness The World-System as Unit of Analysis Roberto Patricio Korzeniewicz, 2017-09-22 World system analyses have recast the study of between and within nation country inequality as constituent aspects of a single field of inquiry the study of inequality and social stratification as processes that always have been global in their very essence World system analyses maintain that global social stratification pivots around institutional arrangements that render distributional outcomes as simultaneously national gendered racialized and global processes This book takes stock of some of the enduring theoretical and empirical contributions of a world system

perspective and identifies promising directions for future inquiry and discussion. Some chapters reassess the scope and methodologies of world system analysis around several key problems e.g. the spatial and temporal boundaries of global commodity chains, the construction and challenge of various dimensions of social inequality, systemic and antisystemic social movements. Others take stock of areas in which world systems are promoting methodological innovation and/or generating useful global data and identify questions that demand additional methodological and empirical attention for future research. In different ways, this book helps us to critically reconsider some of the enduring legacies within a world system perspective such as Karl Polanyi's concept of the double movement or the distinction drawn by Giovanni Arrighi or Immanuel Wallerstein between systemic and antisystemic movements. As argued by many of the authors in this book, a world historical approach calls for greater sensitivity to the manifold ways in which conceptual boundaries change over time and space. Taking seriously the issue of unit of analysis, this book explores critically productive ways for better understanding global patterns of continuity and change. Seeds: Proceedings of the Oxford Symposium on Food and Cookery 2018 Mark

McWilliams, 2019-07-01. This edited collection contains papers presented on the theme of Seeds at the 2018 Oxford Food Symposium. Thirty-six articles by forty-one authors are included. **Feminist Political Ecology and the Economics of**

Care Christine Bauhardt, Wendy Harcourt, 2018-12-07. This book envisages a different form of our economies where care work and care-full relationships are central to social and cultural life. It sets out a feminist vision of a caring economy and asks what needs to change economically and ecologically in our conceptual approaches and our daily lives as we learn to care for each other and non-human others. Bringing together authors from 11 countries, also representing institutions from 8 countries, this edited collection sets out the challenges for gender-aware economies based on an ethics of care for people and the environment in an original and engaging way. The book aims to break down the assumed inseparability of economic growth and social prosperity and natural resource exploitation while not romanticising social material relations to nature. The authors explore diverse understandings of care through a range of analytical approaches, contexts and case studies and pay particular attention to the complicated nexus between re-productivity, nature, womanhood and care. It includes strong contributions on community economies, everyday practices of care, the politics of place and care of non-human others as well as an engagement on concepts such as wealth, sustainability, food sovereignty, body politics, naturecultures and technoscience. **Feminist Political Ecology and the Economics of Care** is aimed at all those interested in what feminist theory and practice brings to today's major political, economic and environmental debates around sustainability, alternatives to economic development and gender-power relations. **The Resilient Gardener** Barrett Williams, ChatGPT, 2024-04-08. Africa's Radicalisms and Conservatisms, 2022-10-31. Volume II of *Africa's Radicalisms and Conservatisms* continues the broad themes of radicalisms and conservatisms that were examined in volume I. Like volume I, the essays examine why the two isms of radicalisms and conservatisms should not be viewed as mere irreconcilable conceptual tools with which to categorize or structure knowledge. The volume demonstrates that these concepts are intertwined, have multiple and diverse meanings as perceived and understood from different disciplinary vantage points, hence the deliberate pluralization of the terms. The twenty-two essays in the volume show what happens when one juxtaposes the two concepts and when different peoples' lived experiences of politics, pop culture, democracy, liberalism, the environment, colonialism, migration, identities, and knowledge, etc., across the length and breadth of Africa are brought to bear on our understandings of these two particularisms.
