The Importance of How We See Ourselves Marina A.L. Oshana, 2010-09-28 The past fifteen years have seen a wellspring of interest in the concept and practical nature of the self Questions about the metaphysics of personal identity have preoccupied philosophical scholarship Less attention has been paid to the topic of the self from the first person standpoint the point of view of a person who regards certain phenomena as distinctive of and essential to her identity Nor has much attention been paid to how this concept of the self is related to responsible agency This book argues that a person's self conception affects her status as a responsible agent 1 The book develops a hybrid view of the self as the object of self consciousness that is the subject and owner of the events that occur by means of its agency Agents have unique identities as particular beings and identify themselves distinctively 2 The book argues that a healthy veridical sense of self grounds responsible agency by enabling persons to be aware of what they do and to understand their motives Certain pathologies upset the unity of a person's identity while others impair the lucidity of a person's sense of self and still others disturb general features of responsible agency such as the capacity to act purposively and realize one's will through intentional behavior The book explains what it means to be oneself and what departures from this state signify for a person's ability to navigate life and make sense of himself in the process The notion of acting out of character or failing to be oneself in some noteworthy way is relevant to a person's culpability because an individual's self conception affects his status as an accountable agent 3 To explain this the book defends an account of responsible agency Responsible persons are accountable alert to normative reasons in support of or in opposition to their behavior and able to respond to reasons for action bearing normative force because these reasons have normative force Accountable persons are unified agents a status that calls for an admission

Dick,Mark Lupisella,2009 From GPO Bookstore s Website Authors with diverse backgrounds in science history anthropology and more consider culture in the context of the cosmos How does our knowledge of cosmic evolution affect terrestrial culture Conversely how does our knowledge of cultural evolution affect our thinking about possible cultures in the cosmos Are life mind and culture of fundamental significance to the grand story of the

cosmos that has generated its own self understanding through science rational reasoning and mathematics Book includes bibliographical references and an index *What Does 'Art' Mean Now?* Bruce Fleming, 2023-06-22 What Does Art Mean Now asks and answers fundamental questions about the nature of aesthetic experience and role of the arts in contemporary society The Modern Age Romanticism and beyond viewed art as something transcending and separated from life and usually something encountered in museums or classrooms Nowadays however art tends to be defined not by a commonly agreed upon standard of quality or by its forms such as painting and sculpture but instead by political and ideological criteria So how do we connect with the works in museums whose point was precisely that they stood apart from such considerations Can we and should we be educated to appreciate art and what does it do for us anyway What are we to make of the so different newer works installations performances excerpts from the world held to be art that increasingly make it into museums Adopting a subjectivist approach this book argues that in the absence of a universal judgment or standard of taste the experience of art is one of freedom The arts give us the means to conceptualize our lives showing us ourselves as we are and as we might wish or not wish to be as well as where we have been and where we are going It will appeal to scholars of sociology philosophy museum studies and art history and to anyone interested in or puzzled by museums or college courses and their presentation of art today **Consciousness and Subjectivity** Sofia Miguens, Gerhard Preyer, 2013-05-02 Issues of subjectivity and consciousness are dealt with in very different ways in the analytic tradition and in the idealistic phenomenological tradition central to continental philosophy This book brings together analytically inspired philosophers working on the continent with English speaking philosophers to address specific issues regarding subjectivity and consciousness The issues range from acquaintance and immediacy in perception and apperception to the role of agency in bodily mine ness to self determination Selbstbestimmung through free action Thus involving philosophers of different traditions should yield a deeper vision of consciousness and subjectivity one relating the mind not only to nature or to first person authority in linguistic creatures questions which in the analytic tradition are sometimes treated as exhausting the topic but also to many other aspects of mind s understanding of itself in ways which disrupt classic inner outer boundaries
