The seabird's cry comes from an elemental layer in the story of the world. Over the last couple of decades modern science has begun to understand their epic voyages, their astonishing abilities to navigate for tens of thousands of miles on featureless seas, their ability to smell their way towards fish and home. Only the poets in the past would have thought of seabirds as creatures riding the ripples and currents of the entire planet, but that is what the scientists are seeing now today.

Responsibly Watching California's Marine Wildlife, 200? British and Irish Birds Rob Hume, Robert Still, Andy Swash, Hugh Harrop, David Tipling, 2019-10 This innovative and carefully designed photographic pocket sized guide provides a concise introduction to the identification of the 246 birds most likely to be seen in Great Britain and Ireland **The Crown Estate in Scotland** Great Britain: Parliament: House of Commons: Scottish Affairs Committee, 2012-03-19 This report examines the Crown Estate Commissioner's management of the Crown property rights and interests which make up the Crown Estate in Scotland. The Commissioner's operations in Scotland can be split into two categories: ancient possessions, responsibilities and modern activities relating to the buying, selling and management of property and land. The evidence identified major issues particularly in relation to the seabed and the foreshore, including lack of accountability, lack of communication and consultation with local communities, the inappropriateness of the Commissioner's remit for its responsibilities in the marine environment, the cash leakage from local economies and other adverse impacts. There were no such problems in relation to the management of urban and rural estate. The Commissioner's responsibilities for the seabed, the foreshore and other ancient rights in Scotland should be devolved, then decentralized as far as possible. Devolution to Holyrood should be conditional upon agreement between the Secretary of State for Scotland and the Scottish Government on how such a scheme of subsidiarity to local authority and local community levels should be implemented. This report also sets out how different arrangements could be made for each of the Scottish Crown property rights and responsibilities. Further consultation should proceed on the basis of proposals set out by the Highlands and Islands local authorities, which provides a clear framework on which to base discussion. **The Woodhen** Clifford Frith, 2013-06-12 This book tells the fascinating success story of saving the flightless Woodhen of Lord Howe Island. This unique large rail, an iconic and highly endangered Australian bird, was at the very brink of extinction with just 15 individuals found in 1980 when bold and risky actions were taken to save it. The book begins with the discovery and ecology of Lord Howe Island. It then details the history of the Woodhen, its place among the rails and their evolution of flightlessness, the planning, implementation and trials, tribulations and successes of the captive breeding programme and the way in which the wild population recovered. The ecology, behaviour and breeding biology of this unique flightless island rail are also discussed. The text is accompanied by numerous photographs and drawings. This is a story of survival, yet the bird remains highly endangered as it is under constant potential threat which could tip it over the brink to extinction. The Woodhen provides gripping insights into the potential for both losing and saving vertebrate species. Winner of a 2014 Whitley Awards Certificate of Commendation for Historical Zoology.

A Fierce Green Fire Philip Shabecoff, 2012-09-26 In *A Fierce Green Fire* renowned environmental journalist Philip Shabecoff presents the definitive history of American environmentalism from the earliest days of the republic to the present. He offers a sweeping overview of the contemporary environmental movement and the political, economic, social, and ethical forces that have shaped it. More importantly, he considers what today's environmental movement needs to do if it is to fight off the powerful forces that oppose it and succeed in its mission of protecting the American people, their habitat, and their future. Shabecoff traces the ecological transformation of North America as a result of the mass migration of Europeans to the New World, showing how the environmental impulse slowly formed among a growing number of Americans until, by the last third of the 20th Century, environmentalism emerged as a major social and cultural movement. The efforts of key environmental figures among them Henry David Thoreau, George Perkins Marsh, Theodore Roosevelt, Gifford Pinchot, John Muir, Aldo Leopold, David Brower, Barry Commoner, and Rachel Carson are examined. So too are the activities of non-governmental environmental groups as well as government agencies such as the EPA and Interior Department along with grassroots efforts of Americans in communities across the country. The author also describes the economic and ideological forces aligned against environmentalism and their increasing successes in recent decades. Originally published in 1993, this new edition brings the story up to date with an analysis of how the administration of George W. Bush is seeking to dismantle a half century of progress in protecting the land and its people and a consideration of the growing international effort to protect Earth's life support systems and the obstacles that the United States government is placing before that effort. In a forward-looking final chapter, Shabecoff casts a cold eye on just what the environmental movement must do to address the challenges it faces. Now, at this time when environmental law, institutions, and values are under increased attack and opponents of environmentalism are enjoying overwhelming political and economic power, *A Fierce Green Fire* is a vital reminder of how far we have come in protecting our environment and how much we have to lose.
