Hurst, 2022 In book 1 of the series *Left for Dead* during a record breaking polar vortex snow storms inundated the South leaving behind snow and ice more common to the Dakotas An unknown enemy attacked the world leaving society without modern technology Without the internet air travel and few running vehicles of any kind regional conflicts redefine modern warfare Forces of darkness moved into the vacuum of power left in the wake of the global disaster reeking havoc on an

unsuspecting civilian populous Book 4 Seeking Home picks up where book 3 Facing Darkness left off Asher Latham aka Polar Bear and his small group of friends who upon escaping their icy tomb inside the maximum security prison swore an oath to keep a new moral code have been working hard to reunite with their loved ones They've managed to find several family members but more are still missing They've overcome seemingly insurmountable odds fought and won against dark forces who if left to their own devices would turn the region into a tyrannical regime not seen since the dark ages In book 3 they joined up with a group of church members hiding out inside Budcamp's RV dealership Together the new and much larger group have worked to salvage anything they might need from Nashville's largest mall which sits under floodwaters Armed men in a canoe have surprised one of their own threatening his life Will Asher and the others inside the mall come to his rescue in time Will they find their still missing loved ones Will they survive the winter *Scheming Master vs. Confused Wife* Xiang Zhu, 2020-10-09 The trash that was abandoned by the cultivation clans had accidentally saved a wolf and now he had an extra person This man was sometimes wolf sometimes cold and merciless he was trash sometimes pure sometimes brave and decisive Other people might not be able to understand the beauty of a cauldron but there was an indescribable sadness to it **Advances in Guidance, Navigation and Control** Liang Yan, Haibin Duan, Yimin Deng, 2025-03-04 This book features the latest theoretical results and techniques in the field of guidance navigation and control GNC of vehicles and aircrafts It covers a wide range of topics including but not limited to intelligent computing communication and control new methods of navigation estimation and tracking control of multiple moving objects manned and autonomous unmanned systems guidance navigation and control of miniature aircraft and sensor systems for guidance navigation and control etc Presenting recent advances in the form of illustrations tables and text it also provides detailed information of a number of the studies to offer readers insights for their own research In addition the book addresses fundamental concepts and studies in the development of GNC making it a valuable resource for both beginners and researchers wanting to further their understanding of guidance navigation and control **A First Rate Tragedy** Diana Preston, 1999 Chronicles the ill fated attempt by explorer Robert Falcon Scott and his four companions to reach the South Pole in 1912 *Cost-Sensitive Machine Learning* Balaji Krishnapuram, Shipeng Yu, R. unparalleled in the history of modern culture They also have spurred new telescope sales to unimaginable highs And after years of watching the heavens through the eyes of NASA you've decided it's time to see it for yourself You make the trip to the department store and pick up that shiny new 500 telescope set it up and soon you're in business Unfortunately the high initial expectations usually give way to disappointment Instead of seeing the magnificent swirling clouds of gas in the Orion Nebula you see a pale green gray cloud with a couple of nondescript stars lurking nearby The swirling red yellow and brown storms of Jupiter are nowhere to be seen only varying shades of gray in the planet's cloud bands assuming you can see bands at all And Mars After waiting all night for the red planet to rise up over the morning horizon you are greeted by nothing more than a featureless reddish orange dot

Tina Thurston, Christopher T Fisher, 2006-11-25 Subsistence intensification innovation and change have long figured prominently in explanations for the development of social complexity among foragers and horticulturalists and the rise of chiefly societies and archaic states yet there is considerable debate over the actual mechanisms that promote these processes Traditional approaches to the intensification question emphasize population pressure climate change bureaucratic management or even land degradation as prerequisites for the onset of new or changing strategies or the construction and maintenance of agricultural landscapes Most often these factors are modeled as external forces outside the realm of human decision making but recent archaeological research presents an alternative to this suggesting that subsistence intensification is the result of human driven strategies for power prestige and status stemming from internal conditions within a group When responding to environmental adversity human groups were less frequently the victims as they have been repeatedly portrayed Instead human groups were often vigorous actors responding with resilience ingenuity and planning to flourish or survive within dynamic and sometimes unpredictable social and natural milieux *Efficient Rent-Seeking* Alan Lockard, G. Tullock, 2013-03-14 Some time ago one of the editors Gordon Tullock stumbled on a paradox in the competition for rents He asked a previous research assistant William Hunter to work out some examples and gave a seminar on it For reasons he cannot recall but probably bad he titled his talk Efficient Rent Seeking As Editor of Public Choice he was able to publish without a referee Incidentally The Journal of Political Economy had turned it down on the grounds that the economy could not be that chaotic and hence there must be something wrong even if the referee couldn't put his finger on it There followed a long series of articles mainly in Public Choice in which various distinguished scholars proposed solutions to the paradox The editor responded by finding fault with these solutions In this case the editor was arguing against interest He like the referee for the JPE believed that the market works if not perfectly at least very well Nevertheless the paradox resisted and persisted It was like the paradox of the liar and indeed in some cases did show exactly that paradox Eventually everyone including the editor grew tired of the matter and the discussion sort of wound down although it could not be said that it was either solved or even abated It also began to appear that it had a much larger scope than just competitive rent seeking Any contest for wealth privilege or prestige in which the chances of winning were affected by the investment of the contestants would appear to be subject to the same problem The sum of the investments in equilibrium might be much less than the prize

or much more. It depended on the structure of the contest but the range of structures seemed to include almost all economic competition. Clearly from the standpoint of economics this was a distressing conclusion. Perhaps the whole vast structure of economic analysis rested on faulty foundations. Speaking frankly neither of the editors thinks the situation is that desperate. We feel that there is a logical solution even if we do not know what it is. The purpose of this volume is to attempt to get economists to turn to the problem and hopefully solve the paradox. We present here a substantial portion of the literature on the matter. We hope that the readers will be stimulated to think about the problem and even more we hope they will be able to solve it.
