Tales of 100 treatments Shizuto Masunaga, 2021-06-11 It is a collection of 58 articles published in the 70 80s in the Japanese magazine Ningen Igaku Human Medicine Here there are some lines written by the author in the preface Western medicine scientifically studies abstract phenomena according to disease name However even if a same disease name is given from the Oriental medicine perspective I often keenly feel that precise treatment is impossible if you do not consider how patients with similar symptoms might differ in constitution personality and environment which involves very different disease mechanisms and required responses It occurred to me that people might benefit from reading my impressions of practical experience in those kinds of clinical cases These stories are autobiographical and deal intensely with the idea and philosophy of Keiraku shiatsu from the point of view and lifestyle adopted by Masunaga sensei In this volume not only he describes the treatments and modalities specific of Iokai but also the strategy of therapy and the causes of illness selecting important cases from his own experience The contents of this book are still relevant and useful for the growth of all shiatsu practitioners teachers and are very important to perform the treatments considering sho oriental diagnosis and kyo and jitsu according to the indications of Shizuto Masunaga

Butoh, as Heard by a Dancer Dominique Savitri Bonarjee, 2023-10-31 This book explores the origins of Butoh in post war Japan through orality and transmission in conjunction with an embodied research approach The book is a gathering of seminal artistic voices Yoshito Ohno Natsu Nakajima Yukio Waguri Moe Yamamoto Masaki Iwana Ko Murobushi Yukio Suzuki Takao Kawaguchi Yuko Kaseki and the philosopher Kuniichi Uno These conversations happened during an extended research trip I made to Japan to understand the context and circumstances that engendered Butoh Alongside these exchanges are my

reflections on Butoh's complex history. These are primarily informed by my pedagogical and performance encounters with the artists I met during this time rather than a theoretical analysis. Through the words of these dancers I investigate Butoh's tendency to evade categorization. Butoh's artistic legacy of bodily rebellion, plurality of authorship and fluidity of form seems prescient and feels more relevant in contemporary times than ever before. This book is intended as a practitioner's guide for dancers, artists, students and scholars with an interest in non-Western dance and dance history, postmodern performance and Japanese arts and culture.

Cumulated Index Medicus, 1978 *Our Inner Ocean* LeCain W. Smith, 2014-08-12

Good health is something we all aspire to but it's so much more than just being free of disease. A perfectly functioning body, tranquil mind and vibrant spirit working together harmoniously create the joy and happiness that put the good in good health and the worth into a life worth living. *Our Inner Ocean* describes ancient and new holistic modalities of practitioner-applied bodywork and revitalizing self-care practices. These illuminate our human potential and awaken our ability to attain and maintain perfect health and well-being. These modalities act as a springboard from which to dive into our inner ocean, the realm of wisdom within that is entered by making the body, breath and energy our allies. This mystical space of awareness, intuition, peace and love can become the resting place of the spirit, subtly working its magic on ourselves and others. Bodywork has long been recognized as a way to help people feel better physically but the magic of touch can also help us tap in to the wisdom of the body, discover the power of the energy that permeates it and evoke its innate healing ability. Self-care practices such as yoga, qi gong, breathwork and meditation help us become our own healers. When we pass through these portals into the inner ocean we can reduce stress and pain, release blockages, prevent and resolve dysfunctions and ignite our spiritual nature. And in doing so we make the world a better place.

diagnostic significance of the abdomen in East Asian medicine Nigel Dawes provides a comprehensive description of the practical application of abdominal palpation in clinical settings as well as offering hands on descriptions of the precise methodology of the abdominal exam with supporting visual aids Focusing on specific clinical application in the field of Kampo Sino Japanese Herbal Medicine it allows for the subtleties of the Fukushin method to be disseminated in order to complement Traditional Chinese Medicine training Highly visual and practical Fukushin is the perfect guide for both Japanese and Chinese medicine students and practitioners looking to develop their toolbox of skills in abdominal palpation **Official Gazette of the United States Patent and Trademark Office** ,1999 **Medical engineering in Japan** K. Atsumi,F. Kajiya,2012-12-06 The complete volume 12 of Medical Progress through Technology is devoted to the work of colleagues in Japan Additionally whole authority and responsibility both for the election of topics and for the reviewing procedure had been delegated to Guest Editors from Japan What are the objectives of this special issue and why has Japan been elected to present itself in this way International journals such as Medical Progress through Technology usually contain papers from authors all over the world Such issues provide a rather comprehensive survey on different scientific projects but do not reflect the standard and extent of medical technology in a certain country I think that issues like the present one give far better information on the actual state of research and development in a country than an irregular sequence of scientific reports It is not intended that all future issues of Medical Progress through Technology will concern only national issues The present issue is an exception However if the readers appreciate such an approach then other national issues may be published There are several reasons in favor of Japan preparing the first national issues We all admire the history tradition and culture of this country but we are also impressed by the high standard of research development and technical realisation achieved in nearly all high technology fields There is no doubt that Japan is among the leading nations in the field of medical technology **Index of Patents Issued from the United States Patent Office** ,1977 *Abstract Bulletin of the Institute of Paper Chemistry* ,1988-06
