Select Computers In Context:

Context-Aware Computing ,2017-12-18 The book addresses the impact of ambient intelligence particularly its user centric context awareness requirement on data management strategies and solutions Techniques of conceptualizing capturing protecting modelling and querying context information as well as context aware data management application are discussed making the book is an essential reference for computer scientists information scientists and industrial engineers

Computer Assisted Instruction Gerald L. Engel,1969 The report consists of a KWIC index and an annotated bibliography by author containing 570 items Computers; Selected Bibliographic Citations Announced in U.S. Government Research and Development Reports, 1966 United States. Office of State Technical Services,1968 *Context Management for Distributed and Dynamic Context-Aware Computing* Ricardo Couto Antunes da Rocha,Markus Endler,2012-05-03

Research in context aware computing has produced a number of middleware systems for context management However development of ubiquitous context aware applications is still a challenge because most current middleware systems are still focused on isolated and static context aware environments Context aware environments are inherently dynamic as a result of occasional additions or upgrade of sensors applications or context inference mechanisms Context Management for Distributed and Dynamic Context Aware Computing proposes a novel architecture for context management based on the concept of context domains allowing applications to keep context interests across distributed context management systems The authors describe a distributed middleware that implements the aforementioned concepts without compromising scalability and efficiency of context access **Computer Vision - ACCV 2024** Minsu Cho,Ivan Laptev,Du Tran,Angela Yao,Hongbin Zha,2024-12-07 This 10 volume LNCS conference set constitutes the proceedings of the 17th Asian Conference on Computer Vision in Hanoi Vietnam held during December 8 12 2024 The 270 full papers together included in this volume were carefully reviewed and selected from 839 submissions The conference presents and discusses new problems solutions and technologies in computer vision machine learning and related areas in artificial intelligence **Context in Computing** Patrick Brézillon,Avelino J. Gonzalez,2014-12-09 This volume explores how context has been and can be used in computing to model human behaviors actions and communications as well as to manage data and knowledge It addresses context management and exploitation of context for sharing experience across domains The book serves as a user centric guide for readers wishing to develop context based applications as well as an intellectual reference on the concept of context It provides a broad yet deep treatment of context in computing and related areas that depend heavily on computing The coverage is broad because of its cross disciplinary nature but treats topics at a sufficient depth to permit a reader to implement context in his her computational endeavors The volume addresses how context can be integrated in software and systems and how it can be used in a computing environment Furthermore the use of context to represent the human dimension individually as well as collectively is explained Contributions also include descriptions of how context has been

represented in formal as well as non formal structured approaches The last section describes several human behavior representation paradigms based on the concept of context as its central representational element The depth and breadth of this content is certain to provide useful as well as intellectually enriching information to readers of diverse backgrounds who have an interest in or are intrigued by using context to assist in their representation of the real world **Pervasive**
