Selected Bibliography on Urban Climate. Prep. by T(ony) J(ohn) Chandler ,1970 Urban Climates T. R. Oke,G. Mills,A. Christen,J. A. Voogt,2017-09-14 Urban Climates is the first full synthesis of modern scientific and applied research on urban climates The book begins with an outline of what constitutes an urban ecosystem It develops a comprehensive terminology for the subject using scale and surface classification as key constructs It explains the physical principles governing the creation of distinct urban climates such as airflow around buildings the heat island precipitation modification and air pollution and it then illustrates how this knowledge can be applied to moderate the undesirable consequences of urban development and help create more sustainable and resilient cities With urban climate science now a fully fledged field this timely book fulfills the need to bring together the disparate parts of climate research on cities into a coherent framework It is an ideal resource for students and researchers in fields such as climatology urban hydrology air quality environmental engineering and urban design Farming in the city. Climates and Societies - A Climatological Perspective M. Yoshino,Manfred Domrös,Annick Douguédroit,J. Paszynski,L.C. Nkemdirim,2013-06-29 The impact of climate on human activities and the effect of humans on climate are two of the most important areas of inquiry in climatology These interactions conducted through physical chemical and biological processes were described as early as Roman and Greek times Marcus Vitruvius 75 25 B C a famous Roman engineer and architect made the following observation about the climatic conditions necessary for founding a city Land ideal for the health is

slightly elevated and there should be neither fog nor frost The direction of the slope and the distance to the swamps lakes and beaches must also be considered The prevailing wind directions observed by a wind tower at the center of the city like Horologium at Athens should be taken into consideration in city planning The main and narrow streets should be placed in the middle angle of the two prevailing wind directions Then the location of the Pantheons and squares should be decided The influence of humans on climate was a major subject for discussion in the 19th century inspired in part by the rapid industrial growth and expanding deforestation of the time D L Howard wrote brilliant pieces on the climate of London in the 1830s while G P Marsh discussed the effects of forests on precipitation in the U S A in the second half of the 19th century *The Urban Climate* Helmut E. Landsberg,1981-08-28 The Urban Climate aims to summarize analytical studies directed toward physical understanding of the rural urban differences in the atmospheric boundary layer Attempts to quantify conditions have met with some success There is certainly a clear understanding of the physical relations that create the climatic differences of urbanized areas Although some of the earlier classical studies are cited here the emphasis is on the work done during the last decade and a half This volume comprises 11 chapters beginning with an introductory chapter discussing the literature surrounding the topic its historical development and the problem of local climate modification The second chapter presents an assessment of the urban atmosphere on a synoptic and local scale and examines the observational procedures involved The following chapters then go on to discuss urban air composition urban energy fluxes the urban heat island the urban wind field models of urban temperature and wind fields moisture clouds and hydrometeors urban hydrology special aspects of urban climate and finally urban planning This book will be of interest to practitioners in the fields of meteorology urban planning and urban climatology *Human Settlements* Sam Stuart,2013-10-02 Human Settlements An Annotated Bibliography is an annotated bibliography on human settlements and includes books journal articles reports and documents Documents from Habitat United Nations Conference on Human Settlements with National Reports are arranged alphabetically by country along with other Conference documents This book is comprised of four chapters and begins with a list of books journal articles reports and documents dealing with topics such as housing policies housing problems in underdeveloped areas and the effects of land reform and rural ordinance programs The next chapter is devoted to a bibliography of bibliographies covering topics ranging from land use planning to rural roads and their potential The third chapter includes national reports from countries such as Afghanistan Algeria and Bangladesh The bibliography concludes with a subject index of key words subdivided geographically a secondary author index that includes personal and corporate authors editors compilers and authors of significant introductions and a list of libraries consulted This monograph should be of interest to housing officials and policymakers Bibliography of Geography Chauncy Dennison Harris,1984 Pt 1 Introduction to general aids pt 2 Regional v 1 The United States of America **Selected References on Environmental Quality as it Relates to Health** ,1976 Monthly Bibliography of MEDLARS based journal articles that describe perturbations
