culturally constructed Townsend shows there are deep seated desires inherited from our evolutionary past that guide our actions In a fascinating series of experiments men and women were asked to indicate preferences for potential mates based on their attractiveness and apparent economic status Women overwhelmingly preferred expensively dressed men to more attractive but apparently less successful men and men were clearly inclined to choose more attractive women regardless of their professional status Townsend s studies also indicate that men are predisposed to value casual sex whereas women cannot easily separate sexual relations from the need for emotional attachment and economic security Indeed wherever men possess sexual alternatives to marriage and women possess economic alternatives divorce rates will be high In the concluding chapter Townsend draws upon the advice of couples who have maintained their marriages over the years to suggest ways to survive our evolutionary predicament Lucidly and accessibly written What Women Want What Men Want shows us why we are the way we are and brings new clarity to one of the most intractable debates of our time
