Sexual Strategies How Females Choose Their Mates:

Sexual Strategies Mary Batten, 1992 Science acknowledges that much of human behavior is biological rather than cultural and human reproduction is much like the birds and the bees Here award winning science writer Mary Batten compares human and animal mating behavior and explains why men love to look at voluptuous young women and why women are attracted to wealthy powerful men Love, Romance, Sexual Interaction Nathaniel Pallone, 2018-01-16 This volume brings together in a single resource fourteen empirical studies examining a variety of emotions and behaviors covering many aspects of love romance and sexual interaction from recent issues of Current Psychology Scholars from universities and research centers bring under the empiricist s microscope a variety of emotions and behaviors ranging from dating relationships criteria for the ideal mate held by both men and women the relationship between perceptions of parents and partners in a direct test of psychoanalytic conceptualizations of mate selection how the media influence perceptions about love and romance sources of marital conflict gender differences in responses to infidelity and even the attitudes of consumers toward prostitution Contributors and topics of discussion include Albert Mehrabian and Jeffrey S Blum Physical Appearance Attractiveness and the Mediating Effect of Emotions Gordon L Flett Paul L Hewitt Brenley Shapiro and Jill Rayman Perfectionism Beliefs and Adjustment in Dating Relationships Robert Ervin Cramer Jeffrey T Schaefer and Suzanne Reid Identifying the Ideal Mate More Evidence for Male Female Convergence Glenn Geher Perceived and Actual Characteristics of Parents and Partners A Freudian Model of Mate Selection Claudia J Haferkamp Beliefs about Relationships in Relation to Television Viewing Soap Opera Viewing and Self Monitoring Blaine J Flowers and Brooks Applegate Marital Satisfaction and Conventionalization Examined Didactically Claudia J Haferkamp Dysfunctional Beliefs Self Monitoring and Marital Conflict Emily A Impett Kristin P Beals and Letitia A Peplau Testing the Investment Model of Relationship Commitment and Stability in a Longitudinal Study of Married Couples Richard Clements and Clifford H Swensen Commitment to One s Spouse as a Predictor of Marital Quality among Older Couples Robert Ervin Cramer William Todd Abraham Lesley M Johnson Barbara Manning Ryan Gender Differences in Subjective Distress to Emotional and Sexual Infidelity William Todd Abraham Robert Ervin Cramer Ana Maria Fernandez and Eileen Mahler Infidelity Race and Gender Ami Rokach Strategies of Coping with Loneliness throughout the Lifespan *Swoon: Great Seducers and Why Women Love Them* Betsy Prioleau, 2013-02-04 The author of Seductress examines the ladies man and answers the eternal question what do women want *Intimacies* William R. Jankowiak, 2008-02-18 No culture is ever completely successful or satisfied with its synthesis of romantic love companionship and sexual desire Whether the setting is a busy metropolis or a quiet farming village a tension always exists between a community s sexual habits and customs and what it believes to be the proper context for love Even in Western societies we prefer sexual passion to romance and companionship and no study of any culture has shown that individuals regard passion and affection equally The pursuit of love and sex has generated an infinite

number of ambiguities and contradictions yet every community hopes to find a resolution to this conflict either by joining dividing or stressing one act over the other In this follow up to Romantic Passion A Universal Experience William R Jankowiak examines how different cultures rationalize the expression of passionate and comfort love and physical sex He begins by mapping out the intricacies of the love sex conundrum and the psychological dilemma of reconciling these competing forces He then follows with essays on sex love and intimacy among Central African foragers and farmers the love dyad in Lithuania intimacy among the Lahu of Southwestern China the interplay of love sex and marriage in the High Himalayas verbalized experiences of love and sexuality in Indonesia love work as it relates to sex work among prostitutes intimacies and estrangements in the marital and extramarital relationships of Huli men infidelity and masculinity in Southwestern Nigeria and the ritual of sex and the rejuvenation of the love bond among married couples in the United States

Sex Joann Ellison Rodgers, 2003-02-11 How much do you really know about sex In Sex A Natural History Joann Ellison Rodgers unearths both the roots of our sexual nature and the expression of our primal urges explaining what it is that makes us male and female and providing fascinating insights into the biology and physiology of flirtation love courtship intercourse fidelity parenting and nurturing She describes scientists discoveries about how the hormone that triggers labor contractions keeps prairie voles faithful to one mate how the brain waves of female mice change when a male comes within smell range and how Harlequin paperback romances and fantasies can be arousing and what these findings tell us about our own sexuality Sex A Natural History illuminates one of the most powerful and often misunderstood aspects of human and animal existence

Rewriting the Sexual Contract Geoff Dench, 2018-04-24 This book brings together a wide selection of viewpoints on what is happening to relations between the sexes and the sexual division of labor in contemporary society The contributors look at the ways in which gender relationships are changing the consequences of these changes for family life and society generally and the part the state should play in future developments Rewriting the Sexual Contract encompasses the views of people with widely differing orientations stretching across the moral and political spectrum The contributors provide varied interpretations of what the recent sexual revolution means and where it may be leading us The questions discussed include Are the life styles of men and women converging or polarizing Do men and women place the same value on family life Do most mothers want to work full time while their children are young Are families strengthened by a sense of differentiation and interdependence between the sexes Does social policy need to recognize sexual differences in order to maximize social equality The contributors represent a wide range of viewpoints but are all involved in analyzing and influencing public attitudes in this area They include Carole Pateman Roger Scruton Ruth Lister Fay Weldon Michael Young and Barbara Cartland among others Rewriting the Sexual Contract examines issues pertinent to the current social and political culture and will be of interest to sociologists gender studies scholars and political theorists Geoff Dench is a senior research fellow at the Institute of Community Studies and a visiting professor at Middlesex University He is the author of

Taking Sex Differences Seriously Steven E. Rhoads,2010-05 Most discussions of sexuality today assume that differences between men and women are insubstantial and that the boundary between the masculine and the feminine is highly porous To reflect the idea that male and female roles have been socially constructed they speak of gender instead of sex and ridicule the double standard of studs and sluts Because men and women are virtually interchangeable it is argued men should do an equal share of domestic work so that women can compete equally with men outside the home This vision of androgyny has compelling aspects But Dr Steven Rhoads finds one problem whatever we might like to believe sex distinctions remain a deeply rooted part of human nature In **Taking Sex Differences Seriously** he assembles a wealth of scientific evidence showing that these differences are hardwired into our biology They range from the subtle women instinctively carry babies on their left side near the maternal heartbeat to the profound women with higher testosterone levels are more promiscuous more competitive and more conflicted about having children Rhoads explores male female disparities in aggression and dominance in sexuality and nurturing He shows how denial of these differences has affected phenomena such as the sexual revolution and fatherless families and policies such as Title IX and the call for universal day care But he also says that society is improved by discouraging some natural tendencies like men s temptation toward predatory sex and encouraging others like women s greater interest and talent in caring for babies Steven Rhoads dispels social clichs and spotlights biological realities in this provocative book Meticulously researched and elegantly written **Taking Sex Differences Seriously** is a groundbreaking look at the way we are **The Bedtrick** Wendy Doniger,2022-08-22

Somehow I woke up one day and found myself in bed with a stranger Meant literally or figuratively this statement describes one of the best known plots in world mythology and popular storytelling In a tour that runs from Shakespeare to Hollywood and from Abraham Lincoln to Casanova the erudite and irrepressible Wendy Doniger shows us the variety danger and allure of the bedtrick or what it means to wake up with a stranger The **Bedtrick** brings together hundreds of stories from all over the world from the earliest recorded Hindu and Hebrew texts to the latest item in the Weekly World News to show the hilariously convoluted sexual scrapes that people manage to get themselves into and out of Here you will find wives who accidentally commit adultery with their own husbands You will read Lincoln s truly terrible poem about a bedtrick You will learn that in Hong Kong the film *The Crying Game* was retitled *Oh No My Girlfriend Has a Penis* And that President Clinton was not the first man to be identified by an idiosyncratic organ At the bottom of these wonderful stories ancient myths and historical anecdotes lie the dynamics of sex and gender power and identity Why can t people tell the difference in the dark

Can love always tell the difference between one lover and another And what kind of truth does sex tell Funny sexy and engaging The Bedtrick is a masterful work of energetic storytelling and dazzling scholarship Give it to your spouse and your lover *Encyclopedia of Evolutionary Biology* ,2016-04-14 Encyclopedia of Evolutionary Biology Four Volume Set is the definitive go to reference in the field of evolutionary biology It provides a fully comprehensive review of the field in an easy to search structure Under the collective leadership of fifteen distinguished section editors it is comprised of articles written by leading experts in the field providing a full review of the current status of each topic The articles are up to date and fully illustrated with in text references that allow readers to easily access primary literature While all entries are authoritative and valuable to those with advanced understanding of evolutionary biology they are also intended to be accessible to both advanced undergraduate and graduate students Broad topics include the history of evolutionary biology population genetics quantitative genetics speciation life history evolution evolution of sex and mating systems evolutionary biogeography evolutionary developmental biology molecular and genome evolution coevolution phylogenetic methods microbial evolution diversification of plants and fungi diversification of animals and applied evolution Presents fully comprehensive content allowing easy access to fundamental information and links to primary research Contains concise articles by leading experts in the field that ensures current coverage of each topic Provides ancillary learning tools like tables illustrations and multimedia features to assist with the comprehension process **On the Nature of Human Sexual Difference: A Symposium**

Timothy Paul Fortin,2024-11-05 This work offers a symposium on the nature of human sexual difference drawing on Plato's masterpiece having explored the observed phenomena of sexual difference four stories are told of the origins essence and ends of the human male and female First the evolutionists and then Simone de Beauvoir and Judith Butler present their accounts Next a fourth and unique vision for our age is added the thought of Thomas Aquinas is placed in dialogue with the evolutionists Beauvoir and Butler thereby introducing into contemporary discourse a voice that is both ancient and new The work seeks to trace each protagonist's account to its fonts so providing a perspective from which various streams of thought might be understood both in their divergence and common origins It thus hopes to offer a common language and an interpretive key in a realm where confusion and misunderstanding too often reign **Sperm Competition and Sexual Selection**

Tim R. Birkhead,Anders Pape Møller,1998-08-12 Sperm Competition and Sexual Selection presents the intricate ways in which sperm compete to fertilize eggs and how this has prompted reinterpretations of breeding behavior This book provides a theoretical framework for the study of sperm competition which is a central part of sexual selection It also discusses the roles of females and the relationships between paternal care in sperm competition The chapters focusing on taxonomic development are diverse and cover all the major animal groups both vertebrate and invertebrate and plants The final chapter provides an overview discussing the relationship between sperm competition and sexual selection in terms of both function and mechanism and how these translate into species fitness This book will be of prime interest to behaviorists

ecologists and evolutionary biologists suggesting new avenues of research and new ways of approaching old problems The only up to date summary of a central and popular subject Well known editors and authors Provides a theoretical framework for the study of sperm competition Covers all major animal groups Includes a chapter on plants Animal Behavior Michael D. Breed, Janice Moore, 2015-05-16 Animal Behavior Second Edition covers the broad sweep of animal behavior from its neurological underpinnings to the importance of behavior in conservation The authors Michael Breed and Janice Moore bring almost 60 years of combined experience as university professors to this textbook much of that teaching animal behavior An entire chapter is devoted to the vibrant new field of behavior and conservation including topics such as social behavior and the relationship between parasites pathogens and behavior Thoughtful coverage has also been given to foraging behavior mating and parenting behavior anti predator behavior and learning This text addresses the physiological foundations of behavior in a way that is both accessible and inviting with each chapter beginning with learning objectives and ending with thought provoking questions Additionally special terms and definitions are highlighted throughout Animal Behavior provides a rich resource for students and professors from a wide range of life science disciplines Provides a rich resource for students and professors from a wide range of life science disciplines Updated and revised chapters with at least 50% new case studies and the addition of contemporary in text examples Expanded and updated coverage of animal welfare topics Includes behavior and homeostatic mechanisms behavior and conservation and behavioral aspects of disease Available lab manual with fully developed and tested laboratory exercises Companion website includes newly developed slide sets templates PowerPoints coordinated with the book **Handbook of Evolutionary Psychology** Charles Crawford, Dennis L. Krebs, 2013-03-07 Evolutionary psychology is concerned with the adaptive problems early humans faced in ancestral human environments the nature of psychological mechanisms natural selection shaped to deal with those ancient problems and the ability of the resulting evolved psychological mechanisms to deal with the problems people face in the modern world Evolutionary psychology is currently advancing our understanding of altruism moral behavior family violence sexual aggression warfare aesthetics the nature of language and gender differences in mate choice and perception It is helping us understand the relationship between cognitive science developmental psychology behavior genetics personality and social psychology Foundations of Evolutionary Psychology provides an up to date review of the ideas issues and applications of contemporary evolutionary psychology It is suitable for senior undergraduates first year graduate students or professionals who wish to become conversant with the major issues currently shaping the emergence of this dynamic new field It will be interesting to psychologists cognitive scientists and anyone using new developments in the theory of evolution to gain new insights into human behavior **Affective Neuroscience** Jaak Panksepp, 2004-09-30 Some investigators have argued that emotions especially animal emotions are illusory concepts outside the realm of scientific inquiry However with advances in neurobiology and neuroscience researchers are demonstrating that this position is wrong as they move closer to a lasting

understanding of the biology and psychology of emotion In Affective Neuroscience Jaak Panksepp provides the most up to date information about the brain operating systems that organize the fundamental emotional tendencies of all mammals Presenting complex material in a readable manner the book offers a comprehensive summary of the fundamental neural sources of human and animal feelings as well as a conceptual framework for studying emotional systems of the brain Panksepp approaches emotions from the perspective of basic emotion theory but does not fail to address the complex issues raised by constructionist approaches These issues include relations to human consciousness and the psychiatric implications of this knowledge The book includes chapters on sleep and arousal pleasure and fear systems the sources of rage and anger and the neural control of sexuality as well as the more subtle emotions related to maternal care social loss and playfulness Representing a synthetic integration of vast amounts of neurobehavioral knowledge including relevant neuroanatomy neurophysiology and neurochemistry this book will be one of the most important contributions to understanding the biology of emotions since Darwins *The Expression of the Emotions in Man and Animals* *Reproductive Biology and Phylogeny of Fishes, Vol 8B: Part B: Sperm Competition Hormones* Barrie G M Jamieson, 2019-09-12 The animals loosely termed fish constitute more than half of all known vertebrate species There are approximately 27 000 described living species of bony fishes Euteleostomi Osteichthyes about 70 species of hagfishes and some 34 species of lampreys Approximately 970 species are chondrichthyans the sharks and their relatives which were the subject of volume 3 in this series It is perhaps because fishes live in a buoyant medium whether it be fresh or sea water that they show a diversity in body shapes that is unparalleled by other vertebrates There is also a unique diversity in the modes of reproduction whether by external or internal fertilization and this with the morphology and fine structure of the reproductive system and its components is the subject of Part A Part B deals with complementary topics testes sperm and sperm competition endocrinology of reproduction pheromones and reproduction copulatory structures taxonomic overview and the potential for sexual selection sexual selection signaling and courtship adaptation and evolution of reproductive mode in copulating cottoid species fertilization sex determination parental care reproduction in relation to conservation and exploitation of marine fishes Cryopreservation of Gametes Embryogenesis and Development and Molecular Genetics of Development **Just Like a Woman** Dianne Hales, 2000-06-06 In recent years researchers in many scientific fields have actively focused on what being female really means Their startling conclusion Almost every assumption made about women physical medical historical psychological turns out to be untested unproven or untrue Stereotypes about women are as old as time and as current as still too prevalent beliefs based on male models Acclaimed health writer Dianne Hales brings together the cutting edge research in anthropology physiology psychology neuroscience endocrinology and medicine in a book that reveals the complex interconnections between all aspects of a woman s life from infancy to old age Gender science is now clearly demonstrating that women are not the second sex but a separate sex unique in body mind and spirit Just Like a Woman explains what it

means to live in a woman's body think with a woman's brain drink in the world with a woman's senses and react with a woman's sensibility to the stresses and elations of her multiple roles Refreshingly free of ideology this meticulously documented book offers a stunningly liberating message that expands our concept of human potential and will forever change the way every woman views herself Transgenesis and the Management of Vector-Borne Disease Serap Aksoy, 2008-08-21 Parasitic bacterial and viral agents continue to challenge the welfare of humans livestock wild life and plants worldwide The public health impact and financial consequences of these diseases are particularly hard on the already overburdened economies of developing countries especially in the tropics Many of these disease agents utilize insect hosts vectors to achieve their transmission to mammals In the past these diseases were largely controlled by insecticide based vector reduction strategies Now many of these diseases have reemerged in the tropics recolonizing their previous range and expanding into new territories previously not considered to be endemic Habitat change irrigation practices atmospheric and climate change insecticide and drug resistance as well as increases in global tourism human traffic and commercial activities have driven the reemergence and spread of vector borne diseases While these diseases can be controlled through interventions aimed at both their vertebrate and invertebrate hosts no effective vaccines exist and only limited therapeutic prospects are available for their control in mammalian hosts Molecular technologies such as transgenesis which is the subject of this book stand to increase the toolbox and benefit disease management strategies Genes on the Couch Paul Gilbert, Kent G. Bailey, 2014-07-10 Philosophers and therapists have long theorised about how psychological mechanisms for love jealousy anxiety depression and many other human characteristics may have evolved over millions of years In the dawn of the new insights on evolution provided by Darwin's theories of natural selection Freud Jung and Klein sought to identify and understand human motives emotions and information processing as functions deeply rooted in our evolved history Despite this promising start and major developments in modern evolutionary psychology anthropology and sociobiology the last fifty years has seen little in the way of therapies derived from an evolutionary understanding of human psychology The contributors to this timely book illuminate how an evolution focused approach to psychopathology can offer new insights for different schools of therapy and provide a rationale for therapeutic integration Genes on the Couch brings together respected clinicians who have integrated evolutionary insights into their case conceptualisations and therapeutic interventions Various psychotherapy schools are represented and each author provides illustrative examples of the interventions used Specific topics addressed include the nature of evolved mental mechanisms regulation dysregulation of internal processes attachment and kinship in therapy the importance of internalising warmth as a therapeutic goal kin selection and incest avoidance co operation and deception in social relations difficulties in working with certain male clients gender differences in therapy and the roles of shame and guilt in treatment Providing up to date summaries of recent thinking in this increasingly important but diverse area Genes on the Couch will be of interest to psychotherapists psychiatrists and a wide range of mental health
