Catherine H. Berndt* Ronald Murray Berndt, 1951 **Same-Sex Cultures and Sexualities** Jennifer Robertson, 2008-04-15
This book demonstrates the centrality of sex gender and sexuality to theories of human behaviors and practices Moves
beyond other lesbian and gay studies readers by presenting a broader view of the significance of studying same sex cultures
and sexualities across cultures Offers readings from all four subfields of anthropology cultural biological linguistic and
archaeological along with historical and applied anthropology Includes discussion of biotechnology and bioethics health and
illness language ethnicity identity politics post colonialism kinship development and policymaking Sex and Behavior
Mcgill, 2013-06-29 Discussion of the precise nature and position of boundaries between disciplines is nearly always
counterproductive the need is usually to cross them not to emphasize them And any such discussion of the distinction
between ethology and comparative psychology would today seem patently absurd While there may be differences in outlook
no boundaries exist But when Frank Beach started in research that was not the case Comparative psychology flourished in
the United States whereas ethology was unknown Beach started as a comparative psychologist and has always called himself
either that or a behavioral endocrinologist Yet among the comparative psychologists of his generation he has had closer
links with the initially European ethologists than almost any other He was indeed one of the editors of the first volume of
Behaviour That this should have been so is not surprising once one knows that his Ph D thesis concerned The Neural Basis
for Innate Behavior that he used to sleep in the laboratory so that he could watch mother rats giving birth and that in 1935
he was using model young to analyze maternal behavior Furthermore for nine years he worked in the American Museum of
Natural History in a department first named Experimental Biology and later when Beach had saved it from extinction and
become its chairman the Department of Animal Behavior It was in 1938 during Frank's time at the American Museum that he
was first introduced to Niko Tinbergen by Ernst Mayr **Growing Up in Central Australia** Ute Eickelkamp, 2011-06-01
Surprisingly little research has been carried out about how Australian Aboriginal children and teenagers experience life
shape their social world and imagine the future This volume presents recent and original studies of life experiences outside
the institutional settings of childcare and education of those growing up in contemporary Central Australia or with strong
links to the region Focusing on the remote communities roughly 1 200 across the continent the volume includes case studies

of language and family life in small country towns and urban contexts These studies expertly show that forms of consciousness have changed enormously over the last hundred years for Indigenous societies more so than for the rest of Australia yet equally notable are the continuities across generations Culture, Society and Sexuality Richard Parker, Peter Aggleton, 2007-01-24 Clearly structured and presented this new and revised edition brings together a broad and international selection of readings to provide insights into the social cultural political and economic dimensions of sexuality and relationships Irregular Connections Andrew P. Lyons, Harriet Lyons, 2004-12-01 Irregular Connections traces the anthropological study of sex from the eighteenth century to the present focusing primarily on social and cultural anthropology and the work done by researchers in North America and Great Britain Andrew P and Harriet D Lyons argue that the sexuality of those whom anthropologists studied has been conscripted into Western discourses about sex including debates about prostitution homosexuality divorce premarital relations and hierarchies of gender class and race Because sex is the most private of activities and often carries a high emotional charge it is peculiarly difficult to investigate At times such as the late 1920s and the last decade of the twentieth century sexuality has been a central concern of anthropologists and focal in their theoretical formulations At other times the study of sexuality has been marginalized The anthropology of sex has sometimes been one of the main faces that anthropology presented to the public often causing resentment within the discipline Andrew P Lyons is an associate professor of anthropology at Wilfrid Laurier University Harriet D Lyons is an associate professor of anthropology at the University of Waterloo **The Sexual Abuse of Children** William T. O'Donohue, James H. Geer, 2013-12-16 The sexual abuse of children is now seen as an enormous problem first because there is an increasing awareness that it is more prevalent than previously thought and second because it gives rise to so many complex questions How is sexual abuse to be defined What are the effects of abuse How can the victim be helped How can abuse be prevented These two comprehensive volumes cover a wide spectrum of basic and applied issues Expert contributors including physicians attorneys psychologists philosophers social workers and engineers address such relevant topics as epidemiology animal models legal reforms feminist scholarship child pornography medical assessment and diverse models of psychotherapeutic intention **Many Faces Of Homosexuality: Anthropological Approaches To Homosexual** Evelyn Blackwood, 2019-08-22 This groundbreaking book examines the diverse manifestations of homosexuality in various historical periods and non Western cultures The distinguished authors examine Kimam male ritualized homosexual behavior Mexican homosexual interaction in public contexts male homosexuality and spirit possession in Brazil and much more The Cunning of Recognition Elizabeth A. Povinelli, 2002-07-19 A critique of liberal multiculturalism through a study of state aboriginal relations in Australia employing an innovative hybrid of theoretical approaches from anthropology political theory linguistics and psychoanalysis *Long Slow Burn* Kath Weston, 2013-09-13 Kath Weston's powerful collection of essays Long Slow Burn challenges the preconception that queer studies is the brainchild of the humanities and argues that social science

has been talking about sex all along To deny this one would have to overlook Kinsey s pioneering sex research in the 1950s or the psychiatrist Evelyn Hooker s pathbreaking study of homosexuality but also in the sex talk that lies at the heart of classic debates on kinship inequality cognition and other foundational topics in the social sciences What is different now Weston claims is the way sexuality has been isolated from other contemporary issues Not content with its ghettoization as a contained subfield Weston refuses to draw an artificial line around sexuality Anthropology Stanley Diamond,2011-06-03 No detailed description available for Anthropology Coming into Being Among the Australian Aborigines Ashley Montagu,2013-09-13 This volume brings together all the evidence bearing upon the procreative beliefs of the Australian Aborigines and subjects it to a scientific examination in the light of biological social and psychological research First published in 1937 This edition reprints the revised edition of 1974 Marriage and the Family Julie Xuemei Hu,Shondrah Tarrezz Nash,2019-04-23 Marriage and the Family Mirror of a Diverse Global Society is a comprehensive text about marriage and the family in sociology family science and diversity studies The book is divided into four parts studying marriage patterns and understanding family diversity developing and maintaining intimate relationships tackling family issues and managing household crises and appreciating contemporary living arrangements in a diverse American society and across the global community Marriage and the Family is unique in its focus on diversity as well as its global perspective Diversity Overview boxes feature vignettes of family diversity in America Global Overview boxes invite students to experience family life in different areas of the world Indeed families become a mirror that helps students see a diversifying American society and a globalizing world **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office,1952 Includes Part 1A Books and Part 1B Pamphlets Serials and Contributions to Periodicals *English on Croker Island* Robert Mailhammer,2021-02-08 Existing accounts of Australian Aboriginal English do not investigate the significant degree of variation found across the continent This book presents the first description of English spoken on Croker Island Northern Territory Australia in terms of its history linguistic features and connections to local Aboriginal languages It demonstrates that English on Croker Island shows an extremely high degree of intra and inter speaker variation and embedding in a longstanding multilingual contact situation both of which challenge existing models of variation and language contact These results have significant ramifications for how variation is modelled for our understanding of how postcolonial Englishes develop as well as for the dynamics of complex contact situations The book also puts English on Croker Island into a typological context of World Englishes by establishing a profile according to the parameters of the World Atlas of Varieties of English WAVE It is of interest to academics interested in Australian Aboriginal English language contact World Englishes and Australian Aboriginal languages **Studies in Human Sexuality** Suzanne G. Frayser,1987 **Carl Jung and the Evolutionary Sciences** Gary Clark,2024-10-22 This book reevaluates Carl Jung s ideas in the context of contemporary research in the evolutionary sciences Recent work in developmental biology as well as experimental and psychedelic

neuroscience have provided empirical evidence that supports some of Jung's central claims about the nature and evolution of consciousness. Beginning with a historical contextualisation of the genesis of Jung's evolutionary thought and its roots in the work of the 19th century Naturphilosophen, the book then outlines a model of analytical psychology grounded in modern theories of brain development and life history theory. The book also explores research on evolved sex-based differences and their relevance to Jung's concept of the anima and animus. Seeking to build bridges between analytical psychology and contemporary evolutionary studies and associated fields, this book will appeal to scholars of analytical and depth psychology as well as researchers in the evolutionary and brain sciences.
