Research and Practice in Information Systems Development Nancy L. Russo,Brian Fitzgerald,Janice I. DeGross,2013-06-29 Given the pervasive nature of information technology and information systems in the modern world the design and development of IS and IT are critical issues of concern New research topics continuously emerge in tandem with the latest developments in technology E Business Knowledge Management Business Process Reengineering for example However when the initial flurry of research abates and the gloss of these areas has diminished somewhat as it inevitably does the enduring core issue remains as to how to develop systems to fully exploit these new areas Both information systems and information technology are interpreted fairly broadly in this book Of particular interest to the editors were research studies that facilitate an understanding of the role and impact of information technology on society organizations and individuals and which strive to improve the design and use of information systems in that context The contributions to the book are categorized into four broad themes First is the core issue of developing information systems in the current environment In this section several fundamental challenges to current assumptions and conventional wisdom in information systems development are posed The second section considers the management of information systems Again the conventional wisdom is challenged The penultimate section focuses on researching information systems Here various issues to do with research methods are surfaced and the use of leading edge research methods in information systems development is pioneered and discussed Finally a section is devoted to understanding information systems This section addresses the perennial challenge in the IS field in relation to the conceptual foundations of the field This volume comprises the proceedings of the Working Conference on Realigning Research and Practice in Information Systems Development The Social and Organizational Perspective which was sponsored by the International Federation for Information Processing IFIP and held in Boise Idaho USA in July 2001 Given the central importance of information systems development in the current age this eclectic book which considers the topic from a rich and varied set of perspectives will be essential reading for researchers and practitioners working in all areas of IS and IT **Work and the Enterprise Culture** Malcolm Cross,Geoff

Payne,2018-05-11 *Work and Enterprise Culture* examines the world of work in the light of the major changes that have occurred over the last decade In particular the book focuses on what is understood by the term the enterprise culture and

considers what impact if any this concept has on traditional work practices A major feature of the book is that the essays also address questions of equal opportunity on grounds of gender and race and examine the effects of the coming of the enterprise culture has had on these concerns *Women's Attitudes towards Work* Shirley Dex,1988-10-13 A survey of British womens attitudes to work and home in the 1980s and how they have changed since World War II The relevant literature is reviewed and the result of recent surveys of womens attitudes are cited **Women and the Sexual Division of Labour in the Caribbean** Keith Hart,1996 Women and the Sexual Division of Labour in the Caribbean is a report of a series of seminars held in 1987 It consists of a broad essay in evolutionary anthropology a review of labour market theories an application of general theory to the social history of the sexual division of labour in Trinidad and Tobago and four case studies of women s work in Jamaica the country where the original presentations were made *Gender and the Politics of the Curriculum* Sheila Riddell,2012-05-16 This book uses detailed case studies of two secondary schools to examine the relationship between curriculum choice and gender identity among fourteen year old pupils making their first choices about what subjects to pursue at exam level It reveals a two way process Pupils decisions on what subject to take are influenced by how they perceive themselves in gender terms and the curriculum once chosen reinforces their sense of gender divisions The author looks at the influences on pupils at this stage in their lives from peers family and the labour market as well as from teachers She argues that the belief in freedom of choice and school neutrality espoused by many teachers can become an important factor in the reproduction of gender divisions and that unless the introduction of the national curriculum is accompanied by systematic efforts to eradicate sexism from the hidden curriculum it will fail in its aim of creating greater equality of educational opportunity among the sexes *American Studies* Jack Salzman,1990-05-25 This volume supplements the acclaimed three volume set published in 1986 and consists of an annotated listing of American Studies monographs published between 1984 and 1988 There are more than 6 000 descriptive entries in a wide range of categories anthropology and folklore art and architecture history literature music political science popular culture psychology religion science and technology and sociology Gender, Peace and Conflict Inger Skjelsboek,Dan Smith,2001-03-22 Gender is increasingly recognized as central to the study and analysis of the traditionally male domains of war and international relations The book explores the key role of gender in peace research conflict resolution and international politics Rather than simply add gender and stir the aim is to transcend different disciplinary boundaries and conceptual approaches to provide a more integrated basis for research and study To this end Gender Peace Conflict uniquely combines theoretical chapters alongside empirical case studies to demonstrate the importance of a gender perspective to both theory and practice in conflict resolution and peace research **Gender Transformations** Sylvia Walby,2003-09-02 The answer of course is both In this lucid and subtle investigation Sylvia Walby one of the world s leading authorities on gender shows how undoubted increases in opportunity for women in Europe and America have been accompanid by new forms of inequality She charts

changes in women's employment education and political representation and the complex relations between gender class and ethnicity between local conditions and global pressures which together determine the place of women both in the labour market and in the wider social political and economic world of today An eagerly awaited successor to Walby's classic *Theorising Patriarchy Transforming Gender* will be essential reading for anyone with an interest in how questions of gender remake and are remade by the social and economic conditions in which they occur *The Sociology of Work* Keith Grint, Darren Nixon, 2025-09-04 This leading authoritative textbook has been carefully and substantially revised to provide the indispensable foundational resource for the sociology of work The fourth edition has been transformed to combine unrivalled explanations of classic theories with the most cutting edge research data and debates Keith Grint and Darren Nixon examine different sociological approaches to work emphasizing the links between social processes institutions of employment and their social and domestic contexts The fourth edition includes a new chapter on work and identity exploring issues such as the rise of consumption and the cultural economy work life balance the social meaning of work and unemployment a fully rewritten chapter that comprehensively reviews trends in the contemporary service economy particularly the rise of emotional and aesthetic forms of labour and the polarization of employment in the knowledge or informational economy a new concluding chapter that examines the structure of the global economy taking in debates around globalization precarious labour and public sector reforms and unemployment in the wake of the financial crisis and austerity updated bibliographic references and data throughout with particularly significant revisions to the sections on gender and work ethnicity and work and work technologies The book has been designed to support readers understanding of and to develop their critical approach to the field of work with a range of empirical evidence and examples helping to reveal the complex picture of work society relations Written in a lively and accessible style the book also provides suggestions for further reading and seminar discussion questions This fourth edition will continue to be essential reading for students of the sociology of work industrial sociology organizational behaviour and industrial relations Students studying business and management courses with a sociological component will also find the book invaluable *Gender as a Verb* Annette Fitzsimons, 2017-11-22 This title was first published in 2002 Aiming to contribute to feminist theory in the area of paid employment this volume demonstrates how the meanings attached to gender can form part of the explanation for the persistence of gender segregation at work The author applies the Foucaultian concept of discourse to occupational segregation to offer a new approach to the study of gender segregation An analysis is provided of gender in relation to computer programming ***Women and Recession (Routledge Revivals)*** Jill Rubery, 2010-10-18 Originally published in 1988 this book compiles a collection of works investigating the impact of recession on women's employment The authors argue that the most important explanation of differences in women's experience between the countries is the form of labour market regulation and organisation They point out that current changes in these forms of regulation and not displacement of

female labour pose the main threat to any gains that women have made in the labour market in the post World War II period

Women, workplace protest and political identity in England, 1968-85 Jonathan Moss, 2019-04-04 This book revisits women's workplace protest from an historical perspective to deliver a new account of working class women's political identity in England between 1968 and 1985

Sociology and the Future of Work Paul Ransome, 2019-01-04 First published in 1999 this book adopts an explicitly forward looking and dynamic approach in trying to understand not only where the sociology of work has come from but of where it is likely to go next For the first time in a single volume it reviews the continuing usefulness of the classical accounts of Karl Marx Max Webster and Emile Durkheim the post industrial accounts of the 1960s and 1970s and the post Fordist accounts of the 1980s and 1990s It provides specific treatment of key topics such as technological change and flexibility the impact of gender on work the changing nature of the relationship between work and personal identity and the possible emergence of economic globalization all of which are currently receiving much academic and popular attention The treatments of gender identity and globalization are challenging and innovative in that they go beyond simply describing current debates and question the validity of some of the premises on which they are based For example that it is not possible to provide a unifying explanation of gender inequality at work because its causes are multiple rather than singular that it is wrong to imply that work will cease to be an important basis of personal identity and that evidence of economic globalization is far too patchy to justify the claim that we are living in a global economy The text combines theoretical analysis with clear descriptions of the key arguments and tests these against current empirical data

Capital Moves Jefferson Cowie, 2019-01-24 Find a pool of cheap pliable workers and give them jobs and soon they cease to be as cheap or as pliable

What is an employer to do then Why find another poor community desperate for work This route one taken time and again by major American manufacturers is vividly chronicled in this fascinating account of RCA s half century long search for desirable sources of labor Capital Moves introduces us to the people most affected by the migration of industry and most importantly recounts how they came to fight against the idea that they were simply cheap labor Jefferson Cowie tells the dramatic story of four communities each irrevocably transformed by the opening of an industrial plant From the manufacturer s first factory in Camden New Jersey where it employed large numbers of southern and eastern European immigrants RCA moved to rural Indiana in 1940 hiring Americans of Scotch Irish descent for its plant in Bloomington Then in the volatile 1960s the company relocated to Memphis where African Americans made up the core of the labor pool Finally the company landed in northern Mexico in the 1970s a region rapidly becoming one of the most industrialized on the continent

The Changing Shape of Nursing Practice Davina Allen,2001 Six episodes of cynicism self preservation and bare faced cheek as Fletcher takes on the Slade prison system **The American Skyscraper** Roberta Moudry,2005-05-09 Publisher Description The Power to Choose Naila Kabeer,2020-05-05 In this path breaking study social economist Naila Kabeer examines the lives of Bangladeshi garment workers in Bangladesh and Britain to shed light on the question of what constitutes fair competition in international trade She argues that if the unhealthy coalition of multinationals and labor movements is truly seeking to improve the working conditions for women and children in the Third World as well as those of western workers their efforts should be directed away from an attempt to impose labor standards and towards a support for the organization of labor rights Any attempt to devise acceptable labor standards at an international level which takes no account of the forces of inclusion and exclusion with local labor movements is she further argues likely to represent the interests of the powerful at the expense of those of the weak
