Sex, Mind, and Emotion Winifred Bolton, Janice Hiller, Heather Wood, 2018-04-24 Sex Mind and Emotion is a collection of predominantly clinical papers exploring innovative work in the field The central tenet of the book is that sexual behaviour cannot be divorced from the emotional context in which it occurs or the meaning of that behaviour to the individual and therefore no chapter is about sex without also addressing mind and emotion The book uses a fusion of psychoanalytic systemic and cognitive theories in conjunction with public service practice It deals with important and relevant topics such as the treatment of sex offenders the compulsive use of internet pornography the psychosexual development of adolescents growing up with HIV the psychodynamics of unsafe sex refugees and sexuality services for people with gender dysphoria psychological treatment for survivors of rape and sexual assault and loss of sexual interest

Structural Approaches in

Walter R Schumm Barbara H Settles Laurence Steinberg Suzanne K Steinmetz Sheldon Stryker Marvin B Sussman Irv Tallman *Sex, Work and Professionalism* Katie Deverell, 2013-01-11 Sex Work and Professionalism examines what happens when professional concern is defined in terms of sex Based on original fieldwork with outreach workers in HIV prevention it addresses issues of professionalism emotion work and boundaries integrating empirical insights with sociological theory In most professional relationships sex is not defined as part of the relationship in fact it is explicitly excluded in guidelines and codes of ethics HIV prevention outreach workers work in sexual environments with a sexually defined target group and are often employed on the basis of their sexuality They have to learn how to balance their work and professional lives overcoming conflicts such as professional role V community role sexual skills V sexual boundaries personal experiences V professional understanding professional identity V worldviews Many of the questions being raised in this book about the meaning of professionalism the pain and pleasure in emotion work and the management of boundaries between home sex and work are being asked more generally by workers in a range of organisations Sex Work and Professionalism argues for a new understanding of professionalism more appropriate to the human services **The Dutch Response To HIV** Theo Sandfort, 2002-09-11 The Netherlands response to AIDS is widely regarded as well organized and effective This is largely due to the timely response to the threat of the disease with a prevention programme starting in 1982 This Dutch example provides an instructive case study for other countries with relevance for policy makers now and in the future The book documents and discusses Dutch prevention policy most specifically the prevention policies and activities for various target groups the focus on prevention research and studies on sexuality and health behaviour and the emphasis on individual responsibility *Mental Health and HIV Infection* Jose Catalan, 2002-09-11 Accessible overview assuming no specialist psychological psychiatric or medical knowledge Covers psychological interventions and psychopharmacology as well as the psychological consequences of HIV infection **Men Who Sell Sex** Peter Aggleton, 2006-12-05 Men Who Sell Sex is the first comprehensive international account of male prostitution and AIDS While much is known about female prostitution and sex work relatively little is known about men who sell sex either to women or other men This book brings together an authoritative collection of essays from different countries and examines sexual behaviour the reasons men sell sex the meanings involved and implications for HIV prevention The authors are all experts in their fields and individual chapters offer a compelling description of the reasons men sell sex and the pleasures and risks involved **The Sexual Organization of the City** Edward O. Laumann, Stephen Ellingson, Jenna Mahay, Anthony Paik, 2005-11-21 We think of the city as a place where anything goes Take the sensational fantasies and lurid antics of single women on Sex in the City or young men on Queer as Folk and you might imagine the city as some kind of sexual playground a place where you can have any kind of sex you want with whomever you like anytime or anywhere you choose But in The Sexual Organization of the City Edward Laumann and company argue that this idea is a myth Drawing on extensive surveys and interviews with Chicago

adults they show that the city is to the contrary a place where sexual choices and options are constrained From Wicker Park and Boys Town to the South Side and Pilsen they observe that sexual behavior and partnering are significantly limited by such factors as which neighborhood you live in your ethnicity what your sexual preference might be or the circle of friends to which you belong In other words the social and institutional networks that city dwellers occupy potentially limit their sexual options by making different types of sexual activities relationships or meeting places less accessible To explain this idea of sex in the city the editors of this work develop a theory of sexual marketplaces the places where people look for sexual partners They then use this theory to consider a variety of questions about sexuality Why do sexual partnerships rarely cross racial and ethnic lines even in neighborhoods where relatively few same ethnicity partners are available Why do gay men and lesbians have few public meeting spots in some neighborhoods but a wide variety in others Why are African Americans less likely to marry than whites Does having a lot of friends make you less likely to get a sexually transmitted disease And why do public health campaigns promoting safe sex seem to change the behaviors of some but not others Considering vital questions such as these and shedding new light on the city of Chicago this work will profoundly recast our ideas about human sexual behavior

Families and Communities Responding to AIDS Peter Aggleton, Peter Davies, Graham Hart, 2012-10-02 All over the world families and communities are key providers of care and support This is particularly true in relation to serious illnesses such as HIV and AIDS Yet families and communities can also stigmatize their members leaving people to die in the most appalling conditions This book looks at the diversity of family and community responses to HIV and AIDS By examining contexts as diverse as nuclear extended and refugee family households and gay community networks and structures it offers important insight into the factors which lead to positive responses and those which trigger negative ones Evidence-based Public Health Amanda Killoran, Michael Patrick Kelly, 2010 A follow up to Public Health Evidence Tackling Health Inequalities this book builds on the themes already introduced and provides a broader perspective on an evidence based approach to public health concentrating on health inequalities

Teenage Pregnancy and Young Parenthood Alison Hadley, 2017-12-01 Teenage Pregnancy and Young Parenthood provides a comprehensive unparalleled insight into the UK Government's highly successful Teenage Pregnancy Strategy TPS for England which reduced the under 18 pregnancy rate by well over 50% and considers how the lessons from this policy can be applied internationally This important book captures and shares the lessons from the TPS for future governments and policy makers and documents the details of implementing a long term strategy with its innovative approach to policy issues After providing the rationale for prioritising teenage pregnancy the book demonstrates evidence for what is effective both in helping young people avoid unplanned pregnancy and in improving outcomes for young parents The TPS is analysed against the World Health Organisation's key actions for effective scale up of adolescent sexual and reproductive health programmes to offer an important contribution to international understanding of this global public health challenge Advocating a whole systems multi agency approach this

book translates evidence into clear action and combines theory and practice with illustrative case studies to demonstrate how to implement policy successfully It is valuable reading for policy makers and practitioners dealing with young people s health as well as undergraduate and postgraduate students in the fields of psychology health studies social work youth work education social policy sociology and related disciplines
