Mental Health Professionals Stephen B. Levine, Candace B. Risen, Stanley E. Althof, 2011-01-19 The field of clinical sexuality evolves in response to changing general cultural trends scientific advances shifting professional ideologies and the personal maturation of its practitioners In less than a decade much seems to have changed in how we think about and offer care for sexual problems These usually slight occasionally dramatic shifts are the main reason for bringing out a second edition of this handbook **A Guide to Treatments that Work** Peter E. Nathan, Jack M. Gorman, 2007-03-15 Much about

this third edition of *A Guide to Treatments That Work* remains as it was in the first and second editions. Like its predecessors, this edition offers detailed evaluative reviews of current research on empirically supported treatments written in most instances by clinical psychologists and psychiatrists who are major contributors to that literature. Similarly, the standards by which the authors were asked to evaluate the methodological rigor of the research on treatments have also remained the same. As before, they provide information on the quality of the research on treatment efficacy and effectiveness that is reviewed.

Case Studies in Sex Therapy Raymond Rosen, Sandra Risa Leiblum, 1995-05-19. With simple cases of premature ejaculation or anorgasmia becoming increasingly rare, clinicians are now utilizing a sophisticated array of multidisciplinary approaches to treat a complex variety of challenging problems and patient populations. Bringing together under one cover case studies and clinical discussions by the very authorities whose work is changing the field, *Case Studies in Sex Therapy* provides a state-of-the-art guide to current clinical practice. Chapters in the first section focus on cases of sexual desire disorders and explore such issues as desire disparity between partners, clinical interventions in marital and sex therapy, biological aspects of inhibited sexual desire, treatment considerations with a homosexual couple, the application of integrative therapy for treating secondary low sex desire, and the many factors that may contribute to sexual avoidance. The next section demonstrates both the opportunities and the complex challenges posed to the clinician by the array of new medical, surgical, and pharmacological therapies. Addressing the growing interest in sexual addiction and compulsion, the third section covers controversial issues such as the treatment of a sexually addictive client and the treatment implications when a client has been sexually exploited by another therapist.

Premature Ejaculation Francois de Carufel, 2016-10-04. Premature Ejaculation presents a unique and innovative therapeutic program for the successful treatment of premature ejaculation. This descriptive and well-structured program is fundamentally different from traditional sex therapy and contemporary sexual medicine. Centred on the management of sexual excitement, it enables couples to prolong the length of intercourse without having to interrupt their lovemaking or resort to medication. The program's sexological approach also empowers couples with the skills and knowledge to strengthen their sex life, leading to a healthier and happier relationship. Combining theory and practical instruction, Francois de Carufel's book promotes a better understanding of premature ejaculation. It offers a new perspective on the causes of this dysfunction and provides practitioners and therapists with concrete ways to assist men and women in improving their sex life. Premature Ejaculation will be of interest and value to health professionals and graduate students in all fields dealing with sexual difficulties, including psychology, social work, medicine, physical therapy, nursing, and counselling.

Evaluating Family Mental Health John J. Schwab, Judith J. Stephenson, John F. Ice, 2013-11-11. At the time of this writing, there is much uncertainty about the form of this country's future healthcare system and the role of psychiatry and other mental health disciplines in that system. Current experience with various managed healthcare programs is not encouraging. Most often, patients with severe psychiatric disturbances receive at best some form of crisis intervention or

brief treatment Marital and family approaches to treatment receive even less support This discouraging socioeconomic context makes the work of John Schwab and his colleagues even more important than it would be in more favorable times Their message is clear The family is crucial to an understanding of psychiatric disorders and must often be the major focus in the treatment of these disorders This book is unique in its direct reflection of the senior author's long term professional interests the family epidemiology and history A careful reading provides family therapists and researchers with wonderful opportunities to examine the ways in which history socioeconomic and political contexts and epidemiology can be used to increase understanding of the family This history of the family is unusually thorough in particular I found fascinating the information about early Egyptian families 3000 B C and their accordant high status of women Family Functioning

John J. Schwab, Helen Gray-Ice, Florence R. Prentice, 2006-04-18 The family that most fundamental of human groups is currently perceived to be changing in response to social biological cultural and technological developments in our postmodern society While the observed changes in families have been considered by some sociologists to be evidence of adaptation and therefore normal the authors of this volume consider them maladaptive Viewing society from the point of view of clinical psychiatry they point to greatly increased numbers of children born to single mothers soaring rates of divorce a statistically confirmed increase in mental disorders increase in reported incest high rates of depression in younger people and escalation of the amount of reported family violence as evidence that the family as a social institution is in crisis and can either move toward renewed vitality or continued deterioration Perceiving a need to obtain information about family functioning that might lead to the increased stability and well being of this critically important type of system Dr John Schwab and his associates designed and carried out a research program that began with a thorough review of relevant literature beginning with LePlay's study of 300 families in the 1850s and including important recent statistical studies They found that although these studies represent advances in understanding the family system some serious problems with the research remain one of which is confounding variables such as family function and mental or substance abuse disorders so that if a family member has a problem such as drug abuse the family is classified as dysfunctional **Seduced into**
