publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to preserve their cultural heritage **The India Directory** Alfred

Taylor, 2023-10-17 Reprint of the original first published in 1874 Partnership for Conservation Rodney V. Salm, Yemi Tessema, 1998 **Drosophila melanogaster, Drosophila simulans: So Similar, So Different** Pierre Capy, Patricia

Gibert, Ian Boussy, 2012-12-06 This book brings together most of the information available concerning two species that diverged 2-3 million years ago The objective was to try to understand why two sibling species so similar in several characteristics can be so different in others To this end it was crucial to confront all data from their ecology and biogeography with their behavior and DNA polymorphism *Drosophila melanogaster* and *Drosophila simulans* are among the two sibling species for which a large set of data is available In this book ecologists physiologists geneticists behaviorists share their data on the two sibling species and several scenarios of evolution are put forward to explain their similarities and divergences This is the first collection of essays of its kind It is not the final point of the analyses of these two species since several areas remain obscure However the recent publication of the complete genome of *D. melanogaster* opens new fields for research This will probably help us explain why *D. melanogaster* and *D. simulans* are sibling species but false friends

Transactions Linnean Society of London, 1912 **The India Directory, for the Guidance of Commanders of Steamers and Sailing Vessels** James Horsburgh (F.R.S.), 1874 *The Triumph of Sociobiology* John Alcock, 2001-06-28 In *The Triumph of Sociobiology* John Alcock reviews the controversy that has surrounded evolutionary studies of human social behavior following the 1975 publication of E. O. Wilson's classic *Sociobiology: The New Synthesis* Denounced vehemently as an ideology that has justified social evils and inequalities sociobiology has survived the assault Twenty-five years after the field was named by Wilson the approach he championed has successfully demonstrated its value in the study of animal behavior including the behavior of our own species Yet misconceptions remain to our disadvantage In this straight-forward objective approach to the sociobiology debate noted animal behaviorist John Alcock illuminates how sociobiologists study behavior in all species He confronts the chief scientific and ideological objections head-on with a compelling analysis of case histories that involve such topics as sexual jealousy beauty gender difference parent-offspring relations and rape In so doing he shows that sociobiology provides the most satisfactory scientific analysis of social behavior available today Alcock challenges the notion that sociobiology depends on genetic determinism while showing the shortcoming of competing approaches that rely on cultural or environmental determinism He also presents the practical applications of sociobiology and the progress sociobiological research has made in the search for a more complete understanding of human activities His reminder that natural behavior is not moral behavior should quiet opponents fearing misapplication of evolutionary theory to our species

The key misconceptions about this evolutionary field are dissected one by one as the author shows why sociobiologists have had so much success in explaining the puzzling and fascinating social behavior of nonhuman animals and humans alike

Conservation of Dragonflies Michael J. Samways, 2024-06-11 Dragonflies are among the most familiar and popular of all insects deeply embedded in human cultural history They are iconic and tell us much about the environments in which we and they live Their conservation is an important part of biodiversity conservation One modern dragonfly species is listed as extinct with many others currently threatened It is now essential to increase conservation efforts towards saving these threatened species with strategies now available for doing this Recovery of dragonfly populations goes hand in hand with improvements to both freshwater conditions and bank vegetation quality In contrast some other dragonfly species have benefitted greatly from human transformation of the landscape with artificial ponds in particular increasing the population levels of many species In turn climate change is seeing

many geographical range shifts Conservation of Dragonflies Sentinels for Freshwater Conservation is for naturalists citizen scientists entomologists and conservation scientists as well as practitioners and policy makers around the world

Capacity Building for Maritime Security Christian Bueger, Timothy Edmunds, Robert McCabe, 2020-10-09 This book studies recent attempts to restructure maritime security sectors through capacity building It innovates both theoretically and empirically It proposes a new framework for understanding maritime capacity building drawing on work in peacebuilding and security sector reform The framework is then applied across empirical case studies from the Western Indian Ocean WIO region written by scholars from the Global South The WIO region is a paradigmatic case to study maritime security and capacity building in action Countries in the region face the full gamut of maritime security challenges while their indigenous capacities to deal with these are often weak In consequence the region functions as an engine of innovation for maritime capacity building more widely The lessons and best practices from the region have importance consequences for addressing maritime security across the globe
