Investigating and harnessing T-cell functions with engineered immune receptors and their ligands Bruno Laugel,2015-01-22 T cells are an essential component of the immune system that provide protection against pathogen infections and cancer and are involved in the aetiology of numerous autoimmune and autoinflammatory pathologies Their importance in disease the relative ease to isolate expand and manipulate them ex vivo

have put T cells at the forefront of basic and translational research in immunology. Decades of study have shed some light on the unique way T cells integrate extrinsic environmental cues influencing an activation program triggered by interactions between peptide MHC complexes and the antigen recognition machinery constituted of clonally distributed T cell receptors and their co receptor CD4 or CD8. The manipulation of these molecular determinants in cellular systems or as recombinant proteins has considerably enhanced our ability to understand antigen specific T cell activation to monitor ongoing T cell responses and to exploit T cells for therapy. Even though these principles have given numerous insights in the biology of CD8 T cells that translate into promising therapeutic prospects as illustrated by recent breakthroughs in cancer therapy, they have proven more challenging to apply to CD4 T cells. This Research Topic aims to provide a comprehensive view of the recent insights provided by the use of engineered antigen receptors and their ligands on T cell activation and how they have been or could be harnessed to design efficient immunotherapies.

The Manambu Language of East Sepik, Papua New Guinea Alexandra Aikhenvald, 2010-06-17. This book is the first comprehensive description of the Manambu language of Papua New Guinea and is based entirely on the author's immersion fieldwork. Manambu belongs to the Ndu language family and is spoken by about 2 500 people in five villages: Avatip, Yawabak, Malu, Apa n and Yambon, Yuanab in East Sepik Province, Ambunti district. Manambu can be considered an endangered language. The Manambu language has many unusual properties. Every noun is considered masculine or feminine. Feminine gender, which is unmarked, is associated with small size and round shape and masculine gender with elongated shape, large size and importance. The Manambu culture is centered on ownership of personal names and is similar to that of the Iatmul described by Gregory Bateson. After an introductory account of the language and its speakers, Professor Aikhenvald devotes chapters to phonology, grammatical relations, word classes, gender, semantics, number, case, possession, derivation and compounding, pronouns, morphohology, verbs, mood and modality, negation, clause structure, pragmatics, discourse semantics, the lexicon, current directions of change and genetic relationship to other languages. The description is presented in a clear style in a framework that will be comprehensible to all linguists and linguistically oriented anthropologists.

The Black Banners (Declassified): How Torture Derailed the War on Terror after 9/11 (Declassified Edition) Ali Soufan, 2020-09-08. The definitive account of an FBI special agent's al Qaeda story, unredacted for the first time. Widely heralded on publication as a must read, *Military Review* and important window on America's battle with al Qaeda. Washington Post: Ali Soufan's revelatory account of the war on terror as seen from its front lines changed the way we understand al Qaeda and how the United States prosecuted the war and led to hard questions being asked of our leaders. When *The Black Banners* was published in 2011, significant portions of the text were redacted. After subsequent review by the Central Intelligence Agency, those redactions have been lifted. Their removal corrects the record on how vital intelligence was obtained from al Qaeda suspects and brings forth important new details on the controversial use of enhanced interrogation techniques, torture to extract information from terror suspects. For many years

proponents of the use of these techniques have argued that they produced actionable intelligence in the war on terror This edition of The Black Banners explodes this myth it shows Soufan at work using guile and intelligent questioning not force or violence to extract some of the most important confessions in the war and it vividly recounts the failures of the government s torture program Drawing on Soufan s experiences as a lead operative for the FBI and declassified government records The Black Banners Declassified documents the intelligence failures that lead to the tragic attacks on New York and Washington DC and subsequently how torture derailed the fight against al Qaeda With this edition eighteen years on from the first sanctioned enhanced interrogation technique the public can finally read the complete story of what happened in their name after the events of 9 11 The Black Banners Declassified includes a new foreword from Ali Soufan that addresses the significance of the CIA s decision to lift the redactions

Home + Bound Lilian Chee, Melany Sun-Min Park, 2013 HOME BOUND brings together six Master of Architecture dissertations 2009 2011 from the National University of Singapore The essays engage with the notion of domesticity set within the geographical bounds of Southeast Asia more specifically Singapore and Malaysia Theoretical framework including those of Michel Foucault Sigmund Freud Jacques Derrida and Anthony Vidler are surveyed against local sites interwoven with varying scales tropes mis conceptions and antinomies of domesticity a Chinese cemetery Singapore s public Housing Development Board flats the older Singapore Improvement Trust flats its National Day Parade sites a haunted house a rural kampong village some national monuments and a Straits Chinese patriarch s mansion in Penang What does it mean to be at home in a context where land and space are both limited and contentious The ideals of stability attached to conceptions of being at home were retrogressive and antithetical to being modern a fixation in Singapore and Southeast Asia s post war

milieu which continues to thrive under presuppositions of change and subsequent adaptations The authors thus collectively front home as a destabilised ideology and a constantly evolving physical construct This volume does not privilege the distinction between loss and recuperation of domestic sites and ideologies or the ensuing difficulties of their reconciliation Rather it highlights the inseparable conditions between the recovery of domestic ideals and the agents who formulate such ideals

The Black Banners: The Inside Story of 9/11 and the War Against al-Qaeda (First Edition) Ali Soufan, 2011-09-12 A book that will change the way we think about al Qaeda intelligence and the events that forever changed America On September 11 2001 FBI Special Agent Ali H Soufan was handed a secret file Had he received it months earlier when it was requested the attacks on New York and Washington could have been prevented During his time on the front lines Soufan helped thwart plots around the world and elicited some of the most important confessions from terrorists in the war against al Qaeda without laying so much as a hand on them Most of these stories have never been reported before and never by anyone with such intimate firsthand knowledge This narrative account of America's successes and failures against al Qaeda is essential to an understanding of the terrorist group We are taken into hideouts and interrogation rooms We have a ringside seat at bin Laden's personal celebration of the 9 11 bombings Such riveting details show us not only how terrorists think and operate but also how they can be beaten and brought to justice

The Syntax-Morphology Interface Matthew Baerman, Dunstan Brown, Greville G. Corbett, 2005-09-15 Syncretism where a single form serves two or more morphosyntactic functions is a persistent problem at the syntax morphology interface It results from a mismatch whereby the syntax of a language makes a particular distinction but the morphology does not This pioneering book provides a full length study of inflectional syncretism presenting a typology of its occurrence across a wide range of languages The implications of syncretism for the syntax morphology interface have long been recognised it argues either for an enriched model of feature structure thereby preserving a direct link between function and form or for the independence of morphological structure from syntactic structure This book presents a compelling argument for the autonomy of morphology and the resulting analysis is illustrated in a series of formal case studies within Network Morphology It will be welcomed by all linguists interested in the relation between words and the larger units of which they are a part

It is also one of the world's smallest and most resource-poor countries. This book offers an engaging examination of Singapore using a theme of globalization to explain how the country's worldwide interactions across centuries have resulted in an ethnically diverse society and allowed it to ascend to a position of being an economic powerhouse. Every significant historic event and era from its status as a meeting point for traders in the 600s to its colonization by the British in 1819 and from Japanese occupation during World War II to the 2002 arrest of a group of Islamic terrorists is covered.
