European Yearbook of International Economic Law 2015 Christoph Herrmann,Markus Krajewski,Jörg Philipp Terhechte,2015-07-04 This sixth volume 2015 of the European Yearbook of International Economic Law puts a particular emphasis on non tariff barriers NTBs to trade and the world trade order With the steady reduction of tariff rates since the GATT 47 came into force focus in recent years has been on the vast and complex landscape of non tariff barriers to trade States as well as scholars seemingly struggle with the multitude of measures pooled under this expression as there is no single acknowledged definition of the term and its relation to the term non tariff measures remains equally blurred Particularly in practice and on a multilateral level there appears to be some awkwardness when it comes to coping with NTBs since multilateral trade rules seem to be in conflict with national

regulatory autonomy in the pursuit of policy objectives In part one this volume sheds light on the problems of non tariff barriers to trade that arise in various fields Part two focuses on regional integration with an emphasis on relations between East Asia and the European Union In this regard the authors outline the trade and investment relations between the European Union and East Asia including Japan Korea and Singapore Part three offers an overview of recent institutional developments in WIPO ICSID WTO and WTO jurisprudence Part four includes book reviews of recent works in the field of international economic law and part five introduces a new section on publications in the field of international economic law that were released in 2013 and 2014

Small and Medium-Sized Enterprises in International Economic Law Thilo Rensmann, 2017-06-09 International economic law with its traditional focus on large multinational enterprises is only slowly waking up to the new reality of small and medium sized enterprises SMEs entering the global marketplace In the wake of the digital revolution smaller companies now play an important role in the global economic landscape In 2015 the UN expressly called for SMEs to have greater access to international trade and investment and it is increasingly recognized that the integration of SMEs provides one of the keys to creating a more sustainable and inclusive global economy As SMEs increasingly permeate transnational supply chains so interactions between these companies and international economic law and policy proliferate Small and Medium sized Enterprises in International Economic Law offers the first comprehensive analysis of the interaction between SMEs and international economic law This book presents a broad international

perspective gathering together contributions by leading experts from academia legal practice and international organizations It opens up a field of enquiry into this so far unexplored dynamic and provide a touchstone for future debate The analysis covers a broad spectrum of international trade and investment law focusing on issues of particular interest to SMEs such as trade in services government procurement and trade facilitation Diverse perspectives illuminate regional developments in particular within the EU and the implications of mega regional free trade agreements The essays also examine questions of legitimacy of global economic governance in particular concerns surrounding the threat posed to the interests of domestic SMEs by the growing liberalization of international trade and investment These essays constitute essential reading for practitioners and academics seeking to navigate a previously neglected trend in international economic law The Singapore Economy Tilak Abeysinghe, Keen Meng Choy, 2007-03-12 Singapore s phenomenal transformation from Third World to First World status has been of great interest to economists around the world yet there has been little quantitative research done on its economy and institutions This innovative new research monograph fills the lacunae by presenting the Singapore economy through a macroeconometric model and laying the foundations for further research Using formal econometric analysis and novel modelling techniques Abeysinghe and Choy offer rare insights into how the Singapore economy works Each of the major chapters discusses the implications of the empirical findings for current policy and an entire chapter has been devoted to macroeconomic policy simulations This book is a unique introduction to the Singapore economy and would be of interest to econometric modellers and policy makers in Singapore as well as advanced undergraduates and graduate researchers interested in modelling small open economies **A Theory of Interregional and International Economics: Integrating Neoclassical Growth Theory and New Economic Geography** Wei-Bin Zhang, **International Economics** American Academy of Political and Social Science, 1919
