## **Shadow Globalization Ethnic Conflicts And New Wars A Political Economy Of Intra State War:**

**Shadow Globalization, Ethnic Conflicts and New Wars** Dietrich Jung, 2002-12-26 Focusing on the political economy of so called new wars this book presents a series of studies that analyse the complexities of current warfare by moving from the global sphere to local spots of organised violence It thus raises questions about the very idea of intra state wars and shows that these wars are inseparably linked to the global economy

**Globalisation and Local Conflicts in Africa and Asia** Yukiko Nishikawa, 2002-03-21 This edited book is written by six authors from Asia and Africa The individual authors focus on their own country's case or cases that they have been working on The book features local conflicts in six countries in Asia and Africa and identifies how the local conflicts are affected by the forces of globalization Cases include Nigeria's oil related conflicts the Democratic Republic of Congo's timber conflicts continuing instability in Mozambique Thailand's conflict with regard to AIDS medicine Myanmar's local conflicts after its reforms and the Afghanistan's conflicts over minerals From these diverse case studies the book examines how globalization and international politics affect local politics and conflicts and vice versa Even seemingly internal conflicts are shown to be significantly influenced by globalization forces and to create new dynamism in local politics While there are other books that explore globalization and conflicts many of them are conceptually organized with a small number of case studies The present volume examines local conflicts in relation to globalization and demonstrates how structural inequality vis a vis weak stateness and statehood are significantly affected by global political economy

**Nationalism and Intra-State Conflicts in the Postcolonial World** Fonkem Achankeng, 2015-09-28 This book highlights the complexities of nationalism and the struggles of different groups left unaddressed within the nation states of a postcolonial world The central question is what happened to the worldly and radical visions of freedom liberty and equality that animated intellectual activists and policy makers from Woodrow Wilson in the 1920s This book analyzes the outcome of lumping disparate groups of people together under one nation state and holding them together against the knowledge of the incompatibility theory of plural states In a world of arbitrarily and colonially mapped sovereign states groups and nations with distinctive histories and cultures trapped within the borders of sovereign states want the freedom to decide their own destinies This book challenges deconstructs and decolonizes Western epistemologies related to postcolonial state formation and maintenance In examining the freedom concept that no human group ought to be determining the independence of other human groups this book constructs an alternative conceptualization of nations and peoples rights in the twenty first century in which radical hopes and global dreams are recognized as central to internal nationalism struggles

**A Crisis of Global Institutions?** Edward Newman, 2007-08-07 The legitimacy of global institutions which address security challenges is in question The manner in which they make decisions and the interests they reflect often falls short of twenty first century expectations and norms of good governance Also their performance has raised doubts about their ability to address contemporary challenges such as civil wars weapons

of mass destruction terrorism and the use of military force in international politics Addressing topical issues such as the war against Iraq in 2003 and terrorism and presenting provocative arguments A Crisis of Global Institutions explores the sources of the challenge to multilateralism including US pre eminence the changing nature of international security and normative concerns about the way decisions are taken in international organizations Edward Newman argues that whilst some such challenges are a sign of crisis many others are representative of normality and continuity in international relations Nevertheless it is essential to consider how multilateralism might be more viably constituted to cope with contemporary and future demands

**The Sociology of War and Violence** Siniša Malešević, 2010-06-10 War is a highly complex and dynamic form of social conflict This book demonstrates the importance of using sociological tools to understand the changing character of war and organised violence The author offers an original analysis of the historical and contemporary impact that coercion and warfare have on the transformation of social life and vice versa Although war and violence were decisive components in the formation of modernity most analyses tend to shy away from the sociological study of the gory origins of contemporary social life In contrast this book brings the study of organised violence to the fore by providing a wide ranging sociological analysis that links classical and contemporary theories with specific historical and geographical contexts Topics covered include violence before modernity warfare in the modern age nationalism and war war propaganda battlefield solidarity war and social stratification gender and organised violence and the new wars debate

***Foreign Intervention, Warfare and Civil Wars*** Adam Lockyer, 2017-09-01 This book examines the impact of foreign intervention in the course and nature of warfare in civil wars Throughout history foreign intervention in civil wars has been the rule rather than the exception The involvement of outside powers can have a dramatic impact on the course and nature of internal conflicts Despite this there has been little research which has sought to explain how foreign intervention influences the course of civil wars This book seeks to rectify this gap It examines the impact of foreign intervention on the warfare that characterises civil wars through by studying the cases of the Angolan and Afghan civil wars It investigates how foreign resources affect the military power of the recipient belligerent and examines how changes in the balance of capabilities influence the form of warfare that characterises a civil war Warfare in civil wars is often highly fluid with belligerents adapting their respective strategies in response to shifts in the balance of military capabilities This book shows how the intervention of foreign powers can manipulate the balance of capabilities between the civil war belligerents and change the dominant form of warfare The findings presented in this book offer key insights for policy makers to navigate the increasing internationalization of civil wars around the globe This book will be of much interest to students of civil wars intra state conflict war and conflict studies and security studies

**Criminology and War** Sandra Walklate, Ross McGarry, 2015-03-24 It is widely observed that the study of war has been paid limited attention within criminology This is intellectually curious given that acts of war have occurred persistently throughout history and perpetuate criminal acts victimisation and human rights violations on a scale

unprecedented with domestic levels of crime However there are authoritative voices within criminology who have been studying war from the borders of the discipline This book contains a selection of criminological authors who have been authoritatively engaged in studying criminology and war Following an introduction that places war within criminology the collection is arranged across three themed sections including Theorising War Law and Crime Linking War and Criminal Justice and War Sexual Violence and Visual Trauma Each chapter takes substantive topics within criminology and victimology i e corporate crime history imprisonment criminal justice sexual violence trauma security and crime control to name but a few and invites the reader to engage in critical discussions relating to wars both past and present The chapters within this collection are theoretically rich empirically diverse and come together to create the first authoritative published collection of original essays specifically dedicated to criminology and war Students and researchers alike interested in war critical criminology and victimology will find this an accessible study companion that centres the disparate criminological attention to war into one comprehensive collection

**Gender and the Political Economy of Conflict in Africa** Meredeth Turshen, 2016-01-29 Violence affects the economy of production and the ecology of reproduction the production of economic goods and services and the generational reproduction of workers the regeneration of the capacity to work and maintenance of workers on a daily basis and the renewal of culture and society through community relations and the education of children Gender and the Political Economy of Conflict in Africa explores the persistence of violence in conflict zones in Africa using a political economy framework This framework employs an analysis of violence on both edges of the spectrum a macro economic analysis of violence against workers and a micro political analysis of the violence in women s reproductive lives These analyses come together to create a new explanation of why violence persists a new political economy of violence against women and a new theoretical understanding of the relation between production and reproduction Three case studies are discussed the Democratic Republic of the Congo violence in an era of conflict Sierra Leone violence post conflict and Tanzania which has not seen armed conflict on the mainland This book fills a significant gap on the political economy of war and women gender for advanced undergraduate and postgraduate students as well as researchers in African Studies Gender Studies and Peace and Conflict Studies

**War Economies in a Regional Context** Michael Charles Pugh, Neil Cooper, Jonathan Goodhand, 2004 This book emphasizes the role of economic factors in the conditions that lead to state collapse give rise to and sustain conflict and complicate peacebuilding The book argues that existing state level focus tends to ignore the role of regional linkages in permitting and sustaining conflict and as obstacles to transformation Furthermore that the focus on the dynamics of conflict in states of the developing world tends to artificially distance the outside predominantly Western world from their genesis and evolution taken from introduction

**Gender, Violence, and Human Security** Aili Mari Tripp, Myra Marx Ferree, Christina Ewig, 2013-11-15 The nature of human security is changing globally interstate conflict and even intrastate conflict may be diminishing worldwide yet threats to individuals and communities

persist Large scale violence by formal and informal armed forces intersects with interpersonal and domestic forms of violence in mutually reinforcing ways Gender Violence and Human Security takes a critical look at notions of human security and violence through a feminist lens drawing on both theoretical perspectives and empirical examinations through case studies from a variety of contexts around the globe This fascinating volume goes beyond existing feminist international relations engagements with security studies to identify not only limitations of the human security approach but also possible synergies between feminist and human security approaches Noted scholars Aili Mari Tripp Myra Marx Ferree and Christina Ewig along with their distinguished group of contributors analyze specific case studies from around the globe ranging from post conflict security in Croatia to the relationship between state policy and gender based crime in the United States Shifting the focus of the term human security from its defensive emphasis to a more proactive notion of peace the book ultimately calls for addressing the structural issues that give rise to violence A hard hitting critique of the ways in which global inequalities are often overlooked by human security theorists Gender Violence and Human Security presents a much needed intervention into the study of power relations throughout the world

**The Quiet Violence of Empire** Wesley Attewell, 2023-04-11 How the U S empire state transformed post 1945 Afghanistan into a key site for reimagining development Established in 1961 by President Kennedy the United States Agency for International Development USAID is often viewed as an extension of the security state playing a constant role on the ground in Afghanistan since the early sixties The Quiet Violence of Empire traces USAID s long and bloody history of development work in the region revealing an empirically rich account of the transnational entanglements of imperialism and racial capitalism Wesley Attewell carefully analyzes three chronological moments of development as counterinsurgency in action the Helmand Valley Project the Soviet Afghan conflict and the post 9 11 occupation in Afghanistan These case studies expose how USAID s very public commitment to bringing seemingly inclusionary forms of self help technical assistance and market development to Afghanistan has been undergirded by longer standing infrastructures of race war and racial management Attewell exposes how one of the net effects of USAID s development mission to Afghanistan has been to constrain the life chances of Afghan beneficiaries while simultaneously diverting development capital back to U S contractors deftly underscoring the notion of development as a form of slow violence The Quiet Violence of Empire asks the critical question how might we refuse the ruse of USAID and its endlessly deferred promise of development Thinking relationally across the fields of human geography global studies and critical ethnic studies it uncovers the explicitly racial underpinnings of international development theory and praxis

**Political Authority in Burma's Ethnic Minority States** Mary Patricia Callahan, 2007 This study examines the enormous variation and complexity that characterize relationships between the national state and locally based often non state actors who negotiate and compete for political authority in Burma s ethnic minority dominated states along the borders Three patterns of relationships are explored devolution by the national state to warlord like local authorities occupation by

the Burmese military and coexistence with varying degrees of cooperation and understanding among actors from the national state and local stakeholders Throughout these border states leaders of the Burmese government s armed forces and of past and currently active armed opposition forces operate within a context that is neither war nor peace but instead a kind of post civil war not quite peace environment To understand the complex political arrangements that have arisen in this environment this monograph employs the concept of emerging political complex a set of adaptive networks that link state and other political authorities to domestic and foreign business concerns some legal others illegal traditional indigenous leaders religious authorities overseas refugee and diaspora communities political party leaders and nongovernmental organizations All of these players make rules extract resources provide protection and try to order a moral universe but none of them are able or even inclined to trump the others for monolithic national supremacy Conflict resolution strategies have to recognize that these emerging political complexes are not simply unfortunate bumps in the road to peace but instead constitute intricate and evolving social systems that may continue to be adapted and sustained

**The Dynamics of States** Klaus Schlichte, 2016-12-05 State domination in the non Western world is hallmarked by its constantly shifting character This stimulating book develops a new approach to the study of state formation and state erosion to explain dynamics that neither follow the pathways of development nor the rule of stagnation that dependency theory once suggested Carefully edited by Klaus Schlichte this book provides a fresh angle to the study of states with an attempt to overcome Weber with Weber The approach focuses on the historical authenticity of states and their institutional frameworks describing the trajectories taken as they react to the effects of changes in their international and local social environments The emphasis laid on the specific characteristics of individual states does not however lead to the theoretical difficulty of a new contextual relativism The conceptual design employs sociological categories developed by Max Weber Norbert Elias Michel Foucault Pierre Bourdieu and others

**The Politics of Insecurity** Jef Huysmans, 2006-09-27 The act of violence of 9 11 changed the global security agenda catapulting terrorism to the top of the agenda Weapons of mass destruction grabbed public interest and controlling the free movement of people became a national security priority In this volume Jef Huysmans critically engages with theoretical developments in international relations and security studies to develop a conceptual framework for studying security He argues that security policies and responses do not appear out of the blue but are part of a continuous and gradual process pre structured by previous developments He examines this process of securitization and explores how an issue on the basis of the distribution and administration of fear becomes a security policy Huysmans then applies this theory to provide a detailed analysis of migration asylum and refuge in the European Union This theoretically sophisticated yet accessible volume makes an important contribution to the study of security migration and European politics

**The Remaking of Social Contracts** Gita Sen, Marina Durano, 2014-09-11 Development Alternatives with Women for a New Era DAWN argues that social contracts must be recreated if they are to fulfil the promise of human rights In The Remaking of Social Contracts leading thinkers and activists address a wide range of concerns global economic governance militarism ecological tipping points the nation state movement building sexuality and reproduction and religious fundamentalism These themes are of wide ranging importance for the survival and well being of us all and reflect the many dimensions and inter connectedness of our lives

**Informal Economies and Power** Anna Danielsson, 2018-10-26 The global ubiquity of informal economic activities has turned informality into a key policy question not least in international peace and state building This book explores a core aspect of economic informality its resilience despite comprehensive international anti informality operations Using Kosovo as an illustrative case Danielsson suggests that to understand the resilience of informality two distinct areas of practice need to be studied in conjunction rather than separately The first concerns the professional practices enacted by international organisations in their attempts to formalise the informal economy in Kosovo The second area of practice concerns the everyday informal economic practices of social agents in Kosovo To study these areas of practice at their junction Danielsson uses Pierre Bourdieu's concept of symbolic power and argues that in post conflict Kosovo the distinct practices have become interwoven and co constitutive of a novel ordering and meaning of informality The resilience of the informal thus plays out through while undermining and reinforcing the need of the international anti informality operations Including scholarship from global governance global political economy and social theory this book's original perspective on informal economies and power will appeal to scholars and professionals located in peace studies development studies and the field of international relations

West Asia in Turmoil N. S. Sisodia, Ashok K. Behuria, 2007 West Asia is in the throes of acute political turbulence today Given West Asia's energy resources developments in the region have profound implications for the wider world The international community has been deeply concerned with the fragile conditions of the region in recent years This book tries to analyse the evolving security environment in West Asia and its implication for global security This edited volume discusses critical issues of our times religious extremism democratisation WMD proliferation international terrorism external intervention in the region and energy security The articles in the book analyse these issues critically and suggest possible alternatives for securing peace and prosperity in West Asia Book jacket

**Investment and Human Rights in Armed Conflict** Daria Davitti, 2019-05-30 This book analyses the way in which international human rights law IHRL and international investment law IIL are deployed or fail to be deployed in conflict countries within the context of natural resources extraction It specifically analyses the way in which IIL protections impact on the parallel protection of economic social and cultural rights ESC rights in the host state especially the right to water Arguing that current responses have been unsatisfactory it considers the emergence of the Protect Respect and Remedy framework and the Guiding Principles for Business and Human Rights jointly the Framework as a possible analytical instrument In so doing it proposes a different approach to the way in which the Framework is generally interpreted and then investigates the possible applicability of this recalibrated Framework to the study of the IHRL IIL interplay in a host country in a protracted armed conflict Afghanistan Through the emblematic example of Afghanistan the book presents a practical

dimension to its legal analysis It uniquely portrays the elusive intersection between these two bodies of international law within a host country where the armed conflict continues to rage and a full economic restructuring is taking place away from the public eye not least through the deployment of IIL and the inaction or merely partial consideration of IHRL The book will be of interest to academics policy makers and practitioners of international organisations involved in IHRL IIL and or deployed in contexts of armed conflict
