If you like this book, write a review on Google Books: [The Remarkable Weather of Southern California](#) Miguel Miller, 2023-02-21. Yes, even in Southern California, weather is something we experience every day. It is in our conscious or subconscious whenever we wake up, look out a window, venture outside, see or feel the sunshine, hear the swish of wind in the trees, or the white noise of rain on the roof. We make decisions, sometimes several times a day, based on a brief thought of weather. We make plans based on the near-term forecast or long-term climate. Occasionally, we take prompt action to stay safe from it. For something so integral to our lives, how much of it do we understand? Greater understanding of the real practical meaning of the forecast can inform decisions and plans, affording greater confidence and less frustration. You will gain a greater awareness of how the weather you experience works. You'll understand where forecasts come from, how they're made, and what it means to you.

Geomorphology of Desert Environments Anthony J. Parsons, A. D. Abrahams, 2009-03-20

About one third of the Earth's land surface experiences a desert climate and this area supports approximately 15% of the planet's population. This percentage continues to grow and with this growth comes the need to acquire and apply an understanding of desert geomorphology. Such an understanding is vital in managing scarce and fragile resources and in mitigating natural hazards. This authoritative reference book is comprehensive in its coverage of the geomorphology of desert environments and is arranged thematically. It begins with an overview of global deserts, proceeds through treatments of weathering, hillslopes, rivers, piedmonts, lake basins, and aeolian surfaces, and concludes with a discussion of the role of climatic change. Written by a team of international authors, all of whom are active in the field, the chapters cover the spectrum of desert geomorphology.
