Shadows Lights Of Waco:

The Shadows and Lights of Waco James D. Faubion, 2018-06-05 When James Faubion visited the site of the Branch Davidian compound after its conflagration what he found surprised him Though the popular imagination had relegated the site's millennialist denizens to the radical fringe Faubion found not psychopathology but a sturdy and comprehensive system for understanding the world He also found in the person of Amos Paul Bishop Roden a fascinating spokeswoman for that system Based on more than five years of fieldwork including extensive life history interviews with Roden Faubion interprets millennialism as a master pedagogy He reveals it as simultaneously a poetics a rhetoric a physics an approach to history a course of training a gnosis and an ethics Millennialism resists the categories that both academic and popular analysts use to discuss religion by melding the sacred and secular the spiritual and political and the transcendental and commonsensical In this respect and in others millennialism is a premodern pedagogy that has grown resolutely counter modern Yet mainstream culture sees in it not a critique of modernity but dangerous lunacy This disjunction prompts Faubion to investigate how the mainstream came to confine religion to an inner and otherworldly faith an inquiry that allows him to account for the irrationalization of millennialism Against this historical background we can discern the genealogy of Adventist millennialism and make sense of contemporary religious events including the actions of a small group in the central Texas prairie

Method as Identity Christopher M. Driscoll, Monica R. Miller, 2020-07-02 Method as Identity Manufacturing Distance in the Academic Study of Religion emphasizes the inexorable influence that social identities exert in shaping methodological choices within the academic study of religion as witnessed in sui generis appeals to particularity and reliance on or rejection of identity based standpoints Can data speak back and if so would scholars have ears to listen With a refreshing hip hop sensibility Miller and Driscoll argue that what cultural theorist Jean-François Bayart refers to as a battle for identity forces a necessary confrontation with the impact of social identities and their histories haunting our fields of study These complex categorical specters make it nearly impossible to untether the categories of identity that we come to study from the identity of categories shaping our methodological lenses Treating method as an identity revealing technique of distance making between the proper scholar and the less than scholarly advocate for religion Miller and Driscoll examine a variety of discursive milieus of vagueness consider for instance essentialism origins authenticity at work in the contemporary discussion of critical methods that lack the necessary specificity for doing the heavy lifting of analytically handling the asymmetrical dimensions of power part and parcel to social identification Through interdisciplinary discussions that draw on thinkers including Charles H Long Bruce Lincoln Russell T McCutcheon Theodor Adorno Jacques Derrida C Wright Mills Laurel C Schneider William D Hart Tomoko Masuzawa Anthony B Pinn bell hooks Roderick Ferguson John L Jackson Jasbir Puar and Jean-François Bayart among others Method as Identity intentionally blurs the lines classifying proper scholarly approach and proper objects of study With an intentional effort to challenge the de facto disciplinary segregation marking

the field and study of religion today Method as Identity will be of interest to scholars involved in discussions about theory and method for the study of religion and especially researchers working at the intersections of identity difference and classification and the politics thereof Religion, Morality, and Community in Post-Soviet Societies Mark D. Steinberg, Catherine Wanner, 2008-11-13 This collection reveals the presence and power of religious belief and practice in public life after the demise of Soviet socialism Based on recent research and interdisciplinary methodologies Religion Morality and Community in Post Soviet Societies examines how religious organizations and individuals engage the changing and troubled environment in which they live which presents expanded civil freedom but much everyday uncertainty unhappiness injustice and suffering Page 4 of cover The Limits of Meaning Matthew Eric Engelke, Matt Tomlinson, 2006 Too often anthropological accounts of ritual leave readers with the impression that everything goes smoothly that rituals are meaningful events But what happens when rituals fail or when they seem meaningless Drawing on research in the anthropology of Christianity from around the globe the authors in this volume suggest that in order to analyze meaning productively we need to consider its limits This collection is a welcome new addition to the anthropology of religion offering fresh debates on a classic topic and drawing attention to meaning in a way that other volumes have for key terms like culture and fieldwork **The Time of the Cannibals** Elizabeth Anne Davis, 2024-11-05 In 2009 the body of a former president of the Republic of Cyprus Tassos Papadopoulos was stolen from his grave The Time of the Cannibals reconsiders this history and the public discourse on it to reconsider how we think about conspiracy theory and specifically what it means to understand conspiracy theories in context The months after Papadopoulos s body was stolen saw intense public speculation in Cyprus including widespread expressions of sacrilege along with many false accusations against Cypriots and foreigners positioned as his political antagonists Davis delves into the public discourse on conspiracy theory in Cyprus that flourished in the aftermath tracing theories about the grave robbery to theories about the division of Cyprus some thirty five years earlier and both to longer histories of imperial and colonial violence Along the way Davis explores cross contextual connections among Cyprus and other locales in the form of conspiracy theories as well as political theologies regarding the dead bodies of political leaders Through critical close readings of academic and journalistic approaches to conspiracy theory Davis shows that conspiracy theory as an analytic object fails to sustain comparative analysis and defies any general theory of conspiracy theory What these approaches accomplish instead she argues is the perpetuation of ethnocentrism in the guise of contextualization The Time of the Cannibals asks what better kind of contextualization this and any case call for and proposes the concept of conspiracy attunement a means of grasping the dialogic contexts in which conspiracy theories work recursively as matters of political and cultural significance in the long dur e Rules and ethics Morgan Clarke, Emily Corran, 2021-08-10 This book investigates the pronounced enthusiasm that many traditions display for codes of ethics characterised by a multitude of rules Recent anthropological interest in ethics and historical explorations of self fashioning

have led to extensive study of the virtuous self but existing scholarship tends to pass over the kind of morality that involves legalistic reasoning Rules and ethics corrects that omission by demonstrating the importance of rules in everyday moral life in a variety of contexts In a nutshell it argues that legalistic moral rules are not necessarily an obstruction to a rounded ethical self but can be an integral part of it An extended introduction first sets out the theoretical basis for studies of ethical systems that are characterised by detailed rules This is followed by a series of empirical studies of rule oriented moral traditions in a comparative perspective

Wild Profusion Celia Lowe, 2013-10-31 Wild Profusion tells the fascinating story of biodiversity conservation in Indonesia in the decade culminating in the great fires of 1997-98 a time when the country's environment became a point of concern for social and environmental activists scientists and the many fishermen and farmers nationwide who suffered from degraded environments and faced accusations that they were destroying nature Celia Lowe argues that biodiversity in 1990s Indonesia implied a particular convergence of nature nation science and identity that made Indonesians mapping of the concept distinct within transnational practices of nature conservation at the time Lowe recounts the efforts of Indonesian biologists to document the species of the Togean Islands to develop Togeans and to turn this archipelago off the coast of Sulawesi into a national park Indonesian scientists aspired to a conservation biology that was both internationally recognizable and politically effective in the Indonesian context Simultaneously Lowe describes the experiences of Togeans who had their own understandings of nature and nation To place Togeans and scientists into the same conceptual frame Lowe studies Toga ideas in the context of transnational thought rather than local knowledge In tracking the practice of conservation biology in a postcolonial setting Wild Profusion explores what in nature can count as important and for whom

Insurgent Citizenship James Holston, 2008 Insurgent citizenships have arisen in cities around the world This book examines the insurgence of democratic citizenship in the urban peripheries of São Paulo Brazil its entanglement with entrenched systems of inequality and its contradiction in violence James Holston argues that for two centuries Brazilians have practiced a type of citizenship all too common among nation states one that is universally inclusive in national membership and massively inegalitarian in distributing rights and in its legalization of social differences But since the 1970s he shows residents of Brazil's urban peripheries have formulated a new citizenship that is destabilizing the old Their mobilizations have developed not primarily through struggles of labor but through those of the city particularly illegal residence house building and land conflict Yet precisely as Brazilians democratized urban space and achieved political democracy violence injustice and impunity increased dramatically Based on comparative ethnographic and historical research Insurgent Citizenship reveals why the insurgent and the entrenched remain dangerously conjoined as new kinds of citizens expand democracy even as new forms of violence and exclusion erode it Rather than view this paradox as evidence of democratic failure and urban chaos Insurgent Citizenship argues that contradictory realizations of citizenship characterize all democracies emerging and established Focusing on processes of city and citizen making now prevalent globally it

develops new approaches for understanding the contemporary course of democratic citizenship in societies of vastly different cultures and histories

The Pandemic Perhaps Carlo Caduff, 2015-08-11 In 2005 American experts sent out urgent warnings throughout the country a devastating flu pandemic was fast approaching Influenza was a serious disease not a seasonal nuisance it could kill millions of people If urgent steps were not taken immediately the pandemic could shut down the economy and trigger a reaction that will change the world overnight The Pandemic Perhaps explores how American experts framed a catastrophe that never occurred The urgent threat that was presented to the public produced a profound sense of insecurity prompting a systematic effort to prepare the population for the coming plague But when that plague did not arrive the race to avert it carried on Paradoxically it was the absence of disease that made preparedness a permanent project The Pandemic Perhaps tells the story of what happened when nothing really happened Drawing on fieldwork among scientists and public health professionals in New York City the book is an investigation of how actors and institutions produced a scene of extreme expectation through the circulation of dramatic plague visions It argues that experts deployed these visions to draw attention to the possibility of a pandemic frame the disease as a catastrophic event and make it meaningful to the nation Today when we talk about pandemic influenza we must always say perhaps What then does it mean to engage a disease in the modality of the maybe

Impulse to Act Othon Alexandrakis, 2016-10-03 What drives people to take to the streets in protest What is their connection to other activists and how does that change over time How do seemingly spontaneous activist movements emerge endure and evolve especially when they lack a leader and concrete agenda How does one analyze a changing political movement immersed in contingency Impulse to Act addresses these questions incisively examining a wide range of activist

Fiscal Disobedience Janet Roitman, 2018-06-05 *Fiscal Disobedience* represents a novel approach to the question of citizenship amid the changing global economy and the fiscal crisis of the nation state Focusing on economic practices in the Chad Basin of Africa Janet Roitman combines thorough ethnographic fieldwork with sophisticated analysis of key ideas of political economy to examine the contentious nature of fiscal relationships between the state and its citizens She argues that citizenship is being redefined through a renegotiation of the rights and obligations inherent in such economic relationships The book centers on a civil disobedience movement that arose in Cameroon beginning in 1990 ostensibly to counter state fiscal authority a movement dubbed Op ration Villes Mortes by the opposition and incivisme fiscal by the government which for its part was eager to suggest that participants were less than legitimate citizens failing in their civic duties Contrary to standard approaches Roitman examines this conflict as a productive moment that rather than involving the outright rejection of regulatory authority questioned the intelligibility of its exercise Although both militarized commercial networks associated with such activities trading in contraband goods including drugs ivory and guns and highly organized gang based banditry do challenge state authority they do not necessarily undermine state power Contrary to

depictions of the African state as weak or failed this book demonstrates how the state in Africa manages to reconstitute its authority through networks that have emerged in the interstices of the state system It also shows how those networks partake of the same epistemological grounding as does the state Indeed both state and nonstate practices of governing refer to a common ethic of illegality which explains how illegal activities are understood as licit or reasonable conduct Born and Made Sarah Franklin,Celia Roberts,2006-10-30 Are new reproductive and genetic technologies racing ahead of a society that is unable to establish limits to their use Have the new genetics outpaced our ability to control their future applications This book examines the case of preimplantation genetic diagnosis PGD the procedure used to prevent serious genetic disease by embryo selection and the so called designer baby method Using detailed empirical evidence the authors show that far from being a runaway technology the regulation of PGD over the past fifteen years provides an example of precaution and restraint as well as continual adaptation to changing social circumstances Through interviews media and policy analysis and participant observation at two PGD centers in the United Kingdom Born and Made provides an in depth sociological examination of the competing moral obligations that define the experience of PGD Among the many novel findings of this pathbreaking ethnography of reproductive biomedicine is the prominence of uncertainty and ambivalence among PGD patients and professionals a finding characteristic of the emerging biosociety in which scientific progress is inherently paradoxical and contradictory In contrast to much of the speculative futurology that defines this field Born and Made provides a timely and revealing case study of the on the ground decision making that shapes technological assistance to human heredity The Routledge Companion to Contemporary Anthropology Simon Coleman,Susan B. Hyatt,Ann Kingsolver,2016-11-25 The Routledge Companion to Contemporary Anthropology is an invaluable guide and major reference source for students and scholars alike introducing its readers to key contemporary perspectives and approaches within the field Written by an experienced international team of contributors with an interdisciplinary range of essays this collection provides a powerful overview of the transformations currently affecting anthropology The volume both addresses the concerns of the discipline and comments on its construction through texts classroom interactions engagements with various publics and changing relations with other academic subjects Persuasively demonstrating that a number of key contemporary issues can be usefully analyzed through an anthropological lens the contributors cover important topics such as globalization law and politics collaborative archaeology economics religion citizenship and community health and the environment The Routledge Companion to Contemporary Anthropology is a fascinating examination of this lively and constantly evolving discipline **Writing the Rapture** Crawford Gribben,2009-02-02 Here Crawford Gribben offers a history description and analysis of the rapture novel genre The late 1980s culminated in the creation of the Left Behind series The novels in this series Gribben shows are derivative borrowing entire characters and significant incidents from earlier books **Designs for an Anthropology of the Contemporary** Paul Rabinow,George E. Marcus,James D. Faubion,Tobias Rees,2008-11-10

Conversations between two top anthropologists about the intellectual trends in contemporary anthropology and about the discipline's future as it continues to intersect with fields such as science studies **Foucault Now** James

Faubion, 2014-02-27 Michel Foucault is recognized as one of the twentieth century's most influential thinkers however the authors in this volume contend that more use can be made of Foucault than has yet been done and that some of the uses to which Foucault has so far been put run the risk of and occasionally simply amount to misuse This interdisciplinary volume brings together a group of esteemed scholars recognized for their command of and insights into Foucault's oeuvre They demonstrate the many respects in which Foucault's project of an ontology of the present remains vital and continues to yield compelling insights and show that an ontology of the present is restricted to no particular terrain but instead ranges widely and on paths that frequently intersect The essays in this much needed new collection address the key components of Foucault's thought ranging from his approach to power biopolitics and parrhesia to analysis of key texts such as *Folie et D raison* and *Histoire de la sexualité* This collection will spark debate amongst students and scholars alike and demonstrates that that every further encounter with Foucault's corpus is more likely than not to demand a revisiting of interpretations already formulated conclusions already drawn uses already devised Contributors include Didier Eribon Eric Fassin John Forrester Ian Hacking Lynne Huffer Colin Koopman James Laidlaw Laurence McFall Mariella Pandolfi Paul Rabinow and Cary Wolfe **The Cambridge Handbook for the Anthropology of Ethics** James Laidlaw, 2023-05-25

The first book length anthropological study of voluntary assisted dying in Switzerland Leaving is a narrative account of five people who ended their lives with assistance Stavrianakis places his observations of the judgment to end life in this way within a larger inquiry about how to approach and understand the practice of assisted suicide which he characterizes as operating in a political legal and medical paraverse adjacent to medical care and expertise Frequently observers too rapidly integrate assisted suicide into moral positions that reflect sociological and psychological commonplaces about individual choice and its social determinants Leaving engages with core early twentieth century psychoanalytic and sociological texts arguing for a contemporary approach to the phenomenon of

voluntary death seeking to learn from such conceptual repertoires as well as to acknowledge their limits Leaving concludes on the anthropological question of how to account for the ethics of assistance with suicide to grasp the actuality and composition of the ethical work that goes on in the configuration of a subject one who is making a judgment about dying with other participants and observers the anthropologist included
