Leviton,2022-12-30 The truth of Lucifer and Sophia is the world s biggest secret said Joe To get this story right you basically have to retell the history of reality itself That s what Joe Mike and Ronald pals since childhood and now in their late sixties set out to do Lucifer and Sophia were the first two archangels ever created but their reputations today are in ruins or obscurity They want to find out why After much travelling and on site investigation they discover that the true story of these two primary archangels is not what people have thought It is the key that unlocks the purpose and destiny of the Earth The final outcome of humanity is implicated too Many diverse cultures maintain cultural images of these two figures and in many cases their images are positive uplifting even comic This trio of geomythic researchers take the Greek icon of Prometheus bound on Mount Caucasus for defying Zeus as their rallying point and seek to probe its true meaning Mythic images especially old ones need to be decoded for the modern mind They tend to have layers of meaning and you shortchange yourself if you either dismiss them or take them only on a literal basis You have to jump into them psychically put them on like clothes and get mythopoeic about these old stories Along the way as they visit sites in America the British Isles Japan Uzbekistan Zimbabwe Chile Mexico and other far flung locales they re assisted by angels Ray Masters and the genius loci of the many sites that preserve a myth of these two archangels Foremost among the places visited is Ireland the legendary Emerald Isle and it turns out this island nation anciently called riu Land after its presiding landscape goddess has a pivotal world role to play in the restitution of these mythic figures and the future well being of the planet and its humanity

LaGrandeur,2013-01-04 Awarded a 2014 Science Fiction and Technoculture Studies Prize Honourable Mention This book explores the creation and use of artificially made humanoid servants and servant networks by fictional and non fictional scientists of the early modern period Beginning with an investigation of the roots of artificial servants humanoids and automata from earlier times LaGrandeur traces how these literary representations coincide with a surging interest in automata and experimentation and how they blend with the magical science that preceded the empirical era In the instances that this book considers the idea of the artificial factotum is connected with an emotional paradox the joy of self enhancement is counterpoised with the anxiety of self displacement that comes with distribution of agency In this way the older accounts of creating artificial slaves are accounts of modernity in the making a modernity characterized by the project of extending the self and its powers in which the vision of the extended self is fundamentally inseparable from the vision of an attenuated self This book discusses the idea that fictional artificial servants embody at once the ambitions of the scientific wizards who make them and society s perception of the dangers of those ambitions and represent the cultural fears triggered by independent experimental thinkers the type of thinkers from whom our modern cyberneticists descend **Network**
