space.time.narrative Frank den Ouden, 2016-12-05 Making exhibitions is a collaborative art producing is a multi layered unity of ideas and objects of invention and manifestation of content and form However there is an antagonistic dimension to it because content and form are traditionally represented by the entirely different realms of curator and designer Future successful developments in exhibition making are dependent on whether this gap of antagonism can be bridged space time narrative calls for a paradigmatic shift of focus It puts forward a unique approach breaking down traditional barriers and offering a wide ranging theoretical context redefining and expanding the parameters and the dynamics of the exhibition format in terms of an open narrative environment which at its roots displays deep similarities with performance on stage or installation in urban and rural space The book breaks new ground by looking at the exhibition as a cultural format firstly within a great sweep of the arts in general weaving a web of philosophical museological linguistic and media theoretical references which expands the contextual field of the profession It then offers unique and important insights

from within in extreme close up by bringing together interviews with six of the leading exhibition designers who discuss the dynamics of the medium its interactive dimensions the soft parameters of the exhibition and how to get to grips with the format as a complex narrative space in which the public takes part Curator and designer should reposition themselves professionally at the heart of the axis which divides or connects content and form

Visualizing Feeling Susan Best, 2011-06-30 Is late modern art anti aesthetic What does it mean to label a piece of art affectless These traditional characterizations of 1960s and 1970s art are radically challenged in this subversive art history By introducing feeling to the analysis of this period Susan Best acknowledges the radical and exploratory nature of art in late modernism The book focuses on four highly influential female artists Eva Hesse Lygia Clark Ana Mendieta and Theresa Hak Kyung Cha and it explores how their art transformed established avant garde protocols by introducing an affective dimension This aspect of their work while often noted has never before been analyzed in detail Visualizing Feeling also addresses a methodological blind spot in art history the interpretation of feeling emotion and affect It demonstrates that the affective dimension alongside other materials and methods of art is part of the artistic means of production and innovation This is the first thorough re appraisal of aesthetic engagement with affect in post 1960s art

Art in Latin America Dawn Ades, Guy Brett, Stanton Loomis Catlin, Rosemary O'Neill, 1989-01-01 This authoritative and beautiful book presents the first continuous narrative history of Latin American art from the years of the Independence movements in the 1820s up to the present day Exploring both the indigenous roots and the colonial and post colonial experiences of the various countries the book investigates fascinating though little known aspects of nineteenth and twentieth century art and also provides a context for the contemporary art of the continent

The Organic Line Irene V. Small, 2024-10-08 A major rethinking of twentieth century abstract art mobilized by the work of

Brazilian artist Lygia Clark What would it mean to treat an interval of space as a line thus drawing an empty void into a constellation of art and meaning laden things In this book Irene Small elucidates the signal discovery of the Brazilian artist Lygia Clark in 1954 a fissure of space between material elements that Clark called the organic line For much of the history of art Clark s discovery much like the organic line has escaped legibility Once recognized however the line has seismic repercussions for rethinking foundational concepts such as mark limit surface and edge A spatial cavity that binds discrepant entities together the organic line transforms planes into flexible topologies borders into membranes and interstices into points of connection As a paradigm the organic line has profound historiographic implications as well inviting us to set aside traditional notions of influence and origin in favor of what Small terms weak links and plagiotropic relations These fragile oblique and transversal ties have their own efficacy and Small s innovative readings of canonical modernist works such as Kazimir Malevich s Black Square John Cage s 4 33 and Le Corbusier s machine habiter as well as contemporary works by such artists as Adam Pendleton Ricardo Basbaum and Mika Rottenberg reveal the organic line s remarkable potential as an analytic instrument Mobilizing a rich repertoire of archival sources and moving across multiple chronologies geographies and disciplines this book invites us to envision modernism not as a stable construct defined by centers and peripheries inclusions and exclusions but as a topological field of interactive destabilizing tensions More than a history of a little known artistic device *The Organic Line Toward a Topology of Modernism* is a user s guide and manifesto for reimagining modern and contemporary art for the present
