Making A Living In Europe Human Geographies Of Economic Change:

Making a Living in Europe Alan Townsend, 2005-08-18 Will making a Living remain a dream for the deprived and excluded Jobs are one of Europe's most important problems Employment provides the basic means of distributing wealth in society in providing for families and ensuring pensions for the elderly Yet unemployment and increasingly non employment continues at near record levels in the European Union Making a Living in Europe shows how the culture of work has been transformed in the industrialised nations of the EU Exploring the relationship between employment change society and economic restructuring the shift toward flexible work for women in services away from traditional industrial jobs for men is demonstrated within three key sectors business services retailing and tourism The outcome of change is discussed in terms of shifts of people and jobs from urban to rural areas Europe must be understood in the context of the new Europe of change in the USA and of global change Drawing on examples from UK and European Regions and USA the author challenges long standing assumptions about changes in economy and society and highlights the need for stronger local and European policies to reduce inequality at large and contribute positively to local people's struggles to make a living in Europe

SAGE Secondary Data Analysis John Goodwin, 2012-07-23 One central and enduring image of the social science researcher is of an individual who commits a great deal of time to collecting original primary data from a field of enquiry This approach is often underpinned by a sincerely held belief that key research questions can only be explored by the collection of ever new and ever greater amounts of data or that already existing data are insufficient for researchers to test their ideas Yet such an approach to social science research can be problematic not least because the collection of primary data can be an expensive time consuming and even wasteful approach to social enquiry Secondary analysis can serve many purposes as well as being a valid approach in its own right However despite its widespread application secondary analysis is often undervalued or perceived to be the preserve of only those interested in the re use of large scale survey data Highlighting both the theory and practice of secondary analysis and the use of secondary sources this collection considers the nature of secondary analysis as a research tool reflects on the definitional debates surrounding terms such as secondary analysis data re use and restudies illustrates how secondary analysis is used in social science research and finally reviews the practical methodological and ethical aspects of secondary analysis Volume

One Using Secondary Sources and Secondary Analysis Volume Two Quantitative Approaches to Secondary Analysis Volume Three Qualitative Data and Research in Secondary Analysis Volume Four Ethical Methodological and Practical Issues in Secondary Analysis European Union Discourses on Un/employment Peter Muntigl, 2000-01-01 Employment is clearly one of those fields of political activity that reveal the manifold problems and difficulties accompanying the process of European integration and supranational institutionalization In particular the conflict between supranationalists and intergovernmentalists and the degree to which member states show willingness to cooperate with each other become manifest The Union is struggling for new employment policies that should on the one hand be compatible with the European model of the welfare state and on the other adopt to new economic constraints These debates are accompanied by many conflicts between different interest groups and lobbies This study succeeded in looking behind closed doors within the EU organizational system Committee meetings were tape recorded and analysed drafts of policy papers were examined for recontextualizations and the impact of interest groups and different economic and ideological concepts on policy making made explicit A comparison of decision making processes in the European Parliament and in small networks of the Commission illustrates the different argumentation patterns and discursive practices that are involved in the formation of new employment policies The ethnographic research is accompanied by a systemic linguistic and sociological analysis of various institutional genres and political spaces **The Amenity Migrants** Laurence A. Nature-based Tourism in Peripheral Areas Colin Michael Hall, Stephen W. Boyd, 2005-01-01 Nature based Tourism in Peripheral Areas provides a comprehensive examination of this form of tourism development as it occurs within alpine forest sub polar island coastal and marine environments This book goes beyond much of the debate surrounding ecotourism and the impacts of tourism in vulnerable environments to place nature based tourism in a wider regional context particularly when for many peripheral regions tourism remains one of the key opportunities for economic development Therefore a central theme that is present throughout many of the chapters is the role that nature based tourism can play as the catalyst for

larger regional development of regions The book will serve as essential reading to senior undergraduate and postgraduate students taking courses in tourism and related degrees where the major focus is on tourism that occurs within peripheral regions It will also serve as a key reference to researchers and professionals interested in the role of tourism as a regional development tool *Informal Employment in Advanced Economies* Colin C. Williams, Jan Windebank, 2002-09-11 Re Placing Informal Employment challenges many of the popular myths surrounding informal economic activities and offers a radical reassessment of their extent growth location and nature The book uses case studies from the UK France Italy the Netherlands the US and Canada to challenge the popular belief that informal employment is growing throughout the advanced economies the myth that this work is undertaken mostly by marginalized groups the dominant view that we should replace informal with formal employment through enforcement of regulations Examining policy options and their consequences the authors show that conventional approaches only increase inequalities and that a radical alternative solution is essential **Revitalising Deprived Urban Neighbourhoods** Colin C. Williams, Jan Windebank, 2017-03-02 Governments in Western Europe and North America have placed job creation initiatives at the heart of their policy for revitalizing deprived neighbourhoods However relying on this alone is problematic and these governments are becoming increasingly interested in finding ways of enabling communities to help themselves Drawing upon original in depth studies of self help activities in both deprived and affluent neighbourhoods in UK cities this book examines why the populations of deprived neighbourhoods are more likely to be excluded not only from the labour market but also from adopting self help practices in response to their situation It also identifies the barriers which discourage participation in self help projects A combination of policies are advocated bringing together innovative bottom up initiatives such as LETS time currencies and Employee Mutuals with top down policies such as Active Citizens Credits This book instead suggests a fresh and positive approach towards revitalizing deprived neighbourhoods based on seeking the full engagement rather than merely the full employment of deprived populations
