Colombian Agency and the making of US Foreign Policy Alvaro Mendez, 2017-06-26 This book studies a significant event in US relations with Latin America shedding light on the role of dependent states and their foreign policy agency in the process by which local concerns become intertwined with the dominant state's foreign policy Plan Colombia was a large scale foreign aid programme through which the US intervened in the internal affairs of Colombia by invitation It proved to be one of the major successes of US foreign policy and has been credited with stemming a potentially catastrophic security failure of the Colombian state This book discusses the strategies and practices deployed by the Colombian government to influence US foreign policy decision making at the bureaucratic legislative and executive levels and is a distinctive contribution to our understanding of the dynamics of small power agency Giving a clearer insight into the decision making processes in both the US and Colombia this book founds its argument on solid empirical analysis assembled from interviews of the major players in the events including Andres Pastrana President of Colombia Thomas Pickering US State Department Arturo Valenzuela Senior Director for Inter American Affairs at the NSA General Barry McCaffrey the US Drug Czar and Dennis Hastert Speaker of the US House of Representatives Approaching the events in question from a bottom up theoretical perspective that puts the emphasis on the facts of the case this book will be of great interest to academics students and policy makers in the field of foreign policy analysis US foreign policy studies and Latin American studies

Making Foreign Policy Decisions Christopher J. Fettweis, 2017-07-05 It is often said that voters hold presidents responsible for two things the economy and foreign policy Economic performance is generally beyond presidential control but foreign policy is defined by the president The White House is justifiably blamed or credited for how it manages relations with the outside world How then can presidents maximize their chances to achieve successful foreign policies What kinds of considerations should they bear in mind as they make important decisions for their country Foreign policy begins with the process of making decisions This briefing book examines foreign policy decision making and offers advice to current and future presidents drawn from fields ranging from political science and history to psychology and economics It identifies basic guidelines that presidents should consider when making choices Such guidelines apply to almost any area of human endeavour and they are certainly central to choices made in and outside of the Oval Office When the strong make mistakes the weak often suffer As the strongest country in the history of the world the United States has a special responsibility to run

a sagacious foreign policy This briefing book will benefit students policy makers and the general public **Multinational Corporations and United States Foreign Policy** United States. Congress. geographical regions and operates via a specific range of policy instruments showing predictable variation in the use of these instruments With a broad range of cases from US policy in the Caribbean and Central America after the Spanish American War to the origins of the Marshall Plan and NATO to economic bailouts and covert operations and to military interventions in South Vietnam Kosovo and Iraq this important book will be of great interest to students and researchers of US foreign policy security studies history and international relations This book has a dedicated website at www.usforeignpolicy.org featuring additional case studies and data sets
