Eggonomics Diane M. Tober, 2024-10-18 What happens when people are reduced to products By pulling back the clinical curtain on the multi billion dollar per year global egg industry that is the central question Eggonomics seeks to address Tracing the emotional and physical journeys egg donors embark upon as suppliers of valuable commodities this book reveals uncomfortable realities at the heart of the industry Donors and the eggs they provide are absolutely essential to helping others create the families of their dreams But not all clinics treat their donors as well as their paying patients and many donors suffer as a result Technological innovations allow the egg donation industry to expand fueling the private equity incursion into fertility medicine turning once private clinics into highly profitable multinational conglomerates Drawing upon international anthropological fieldwork Eggonomics reveals the clinical spaces where egg donor s bodies are tested prodded and poked for ever increasing sums of profit eugenic forces drive donor selection and the unrelenting pressures of global capitalism threaten medicine s prime directive of do no harm Timely meticulously researched and written with surgical precision Eggonomics is a crucial read for researchers medical professionals policymakers and anyone considering becoming or using an egg donor

Intimate Economies Susanne Hofmann, Adi Moreno, 2017-01-03 This book illustrates how intimate workers in different socio cultural contexts negotiate the commercial uses of their sexuality identity affect and bodies thereby often defying inequality impoverishment and resource depletion in their regions The studies shed light on the multi faceted experiences of subjects involved in intimate economies oscillating between personal empowerment and agency as well as the required subjection to the demands of the current market regime entailing participation in precarious employment often involving bodily risk economic exploitation and stigmatization The contributions demonstrate the interrelatedness of market intimacy family economies and transnational care arrangements and thereby challenge Western notions of the subject and the free market

The New Kinship Naomi R. Cahn, 2013-01-07 No federal law in the United States requires that egg or sperm donors or recipients exchange any information with the offspring that result from the donation Donors typically enter into contracts with fertility clinics or sperm banks which promise them anonymity The parents may know the donor s hair color height IQ college and profession they may even have heard the donor s voice But they don t know the donor s name medical history or other information that might play a key role in a child s development And until recently donor conceived offspring typically didn t know that one of their biological parents was a donor But the secrecy surrounding the use of donor eggs and sperm is changing And as it does increasing numbers of parents and donor conceived offspring are searching for others who share the same biological heritage When donors recipients and donor kids find each other they create new forms of families that exist outside of the law The New Kinship details how families are made and how bonds are created between families in the brave new world of reproductive technology Naomi Cahn a nationally recognized expert on reproductive technology and the law shows how these new kinship bonds dramatically exemplify the ongoing cultural change in how we think about family The issues Cahn explores in this book will resonate with anyone and

everyone who has struggled with questions of how to define themselves in connection with their own biological legal or social families

The Right to Life and the Value of Life Jon Yorke, 2016-03-03 This groundbreaking book is the first collection to investigate the law political science and ethical perspectives collectively in relation to the right and value of life Its contributions from international roster of scholars are organized around five themes a theoretical positioning of life and death War armed conflict and detention Death as punishment Medical parameters for ending life and medical policies for the preservation of life In studying this issue in its contemporary contexts of right and value the volume fills the current scholarly lacuna in the general subject of the orientations of life It presents a much needed examination of key issues in a broad practical and theoretical context and holds broad appeal for scholars researchers and students occupied with issues of war armed conflict the death penalty and various contemporary medico legal scenarios

The Cambridge Companion to Gender and the Law Stéphanie Hennette Vauchez, Ruth Rubio-Marín, 2023-01-26 With systematic thematic chapters this volume demonstrates how law and gender co produce gendered legal subjects

The Palgrave Handbook of Infertility in History Gayle Davis, Tracey Loughran, 2017-09-01 This ground breaking interdisciplinary volume provides an overdue assessment of how infertility has been understood treated and experienced in different times and places It brings together scholars from disciplines including history literature psychology philosophy and the social sciences to create the first large scale review of recent research on the history of infertility Through exploring an unparalleled range of chronological periods and geographical regions it develops historical perspectives on an apparently transhistorical experience It shows how experiences of infertility access to treatment and medical perspectives on this condition have been mediated by social political and cultural discourses The handbook reflects on and interrogates different approaches to the history of infertility including the potential of cross disciplinary perspectives and the uses of different kinds of historical source material and includes lists of research resources to aid teachers and researchers It is an essential go to point for anyone interested in infertility and its history Chapter 19 is open access under a CC BY 4.0 license via link.springer.com

Gender, Health, and History in Modern East Asia Angela Ki Che Leung, Izumi Nakayama, 2017-11-22 This groundbreaking volume captures and analyzes the exhilarating and at times disorienting experience when scientists government officials educators and the general public in East Asia tried to come to terms with the introduction of Western biological and medical sciences to the region The nexus of gender and health is a compelling theme for this is an area in which private lives and personal characteristics encounter the interventions of public policies The nine empirically based studies by scholars of history of medicine sociology anthropology and STS science technology and society spanning Japan Korea China Taiwan and Hong Kong from the 1870s to the present demonstrate just how tightly concerns with gender and health have been woven into the enterprise of modernization and nation building throughout the long twentieth century The concepts of gender and health have become so commonly used that one might overlook that they are actually complicated notions with vexed histories even

in their native contexts Transposing such terminologies into another historical or geographical dimension is fraught with problems and what makes the East Asian cases in this volume particularly illuminating is that they present concepts of gender and health in motion The studies show how individuals and societies made sense of modern scientific discourses on diseases body sex and reproduction redefining existing terms in the process and adopting novel ideas to face new challenges and demands Whether reviewing the comparative national histories of birth control debating early cases of transsexual surgery or highlighting the resurgence of traditional Asian medical commodities this volume provides accessible and productive studies on these intriguing topics in Asia Scholars of modern East Asia and indeed anyone concerned with the analysis of gender and health in light of intersecting postcolonial studies will find the book rewarding Rayna Rapp New York University A bold and important volume that explores the interweaving of gender body and modernity throughout East Asia With vivid articles on sexuality reproductive technologies and sexual identities the book opens multiple possibilities for how Asia as method can shine new light on persistent theoretical questions from biopower to biocitizenship Ruth Rogaski Vanderbilt University

Sex Itself Sarah S. Richardson, 2013-12-13 Human genomes are 99.9 percent identical with one prominent exception Instead of a matching pair of X chromosomes men carry a single X coupled with a tiny chromosome called the Y Tracking the emergence of a new and distinctive way of thinking about sex represented by the unalterable simple and visually compelling binary of the X and Y chromosomes *Sex Itself* examines the interaction between cultural gender norms and genetic theories of sex from the beginning of the twentieth century to the present postgenomic age Using methods from history philosophy and gender studies of science Sarah S Richardson uncovers how gender has helped to shape the research practices questions asked theories and models and descriptive language used in sex chromosome research From the earliest theories of chromosomal sex determination to the mid century hypothesis of the aggressive XYY supermale to the debate about Y chromosome degeneration to the recent claim that male and female genomes are more different than those of humans and chimpanzees Richardson shows how cultural gender conceptions influence the genetic science of sex Richardson shows how sexual science of the past continues to resonate in ways both subtle and explicit in contemporary research on the genetics of sex and gender With the completion of the Human Genome Project genes and chromosomes are moving to the center of the biology of sex *Sex Itself* offers a compelling argument for the importance of ongoing critical dialogue on how cultural conceptions of gender operate within the science of sex

Selective Reproduction in the 21st Century Ayo Wahlberg, Tine M. Gammeltoft, 2017-08-12 This book explores how conditions for childbearing are changing in the 21st century under the impact of new biomedical technologies Selective reproductive technologies SRTs technologies that aim to prevent or promote the birth of particular kinds of children are increasingly widespread across the globe Wahlberg and Gammeltoft bring together a collection of essays providing unique ethnographic insights on how SRTs are made available within different cultural socio economic and regulatory settings and how people

perceive and make use of these new possibilities as they envision and try to form their future lives Topics covered include sex selective abortions termination of pregnancies following detection of fetal anomalies during prenatal screening the development of preimplantation genetic diagnosis techniques as well as the screening of potential gamete donors by egg agencies and sperm banks This is invaluable reading for scholars of medical anthropology medical sociology and science and technology studies as well as for the fields of gender studies reproductive health and genetic disease research Altering Nature B. A. Lustig, B.A. Brody, Gerald P. McKenny, 2008-11-01 B Andrew Lustig Baruch A Brody and Gerald P McKenny In this second volume of the Altering Nature project we situate specific religious and policy discussions of four broad areas of biotechnology within the context of our interdisciplinary research on concepts of nature and the natural in the first volume Altering Nature Concepts of Nature and the Natural in Biotechnology Debates In the first volume we invited five groups of scholars to explore the diverse conceptions of nature and the natural that shape moral judgments about human alterations of nature as especially exemplified by recent developments in biotechnology A careful reading of such developments reveals that assessments of them whether positive or negative are often informed by different conceptual interpretations of nature and the natural with differing implications for judgments about the appropriateness of particular alterations of nature These varying interpretations of nature and the natural often result from the distinctive perspectives that characterize various scholarly disciplines Therefore in an effort to explore the variety of meanings that attend discussions of the concepts of nature and the natural the contributors to the first volume of Altering Nature addressed those concepts from five different disciplinary vantages A first group of scholars analyzed a range of religious and spiritual perspectives on concepts of nature and the natural Their research highlighted the thematic historical and methodological touchstones in those traditions that shape their perspectives on nature *Kinship as Fiction* Anindita Majumdar, Yoko Taguchi, 2024-10-25 Bringing together emerging ethnographies on kinship in South Asia this book explores the idea of kinship as fiction in intimate relationships Fictions and fictive kinship within anthropology are contested ideas Increasingly research suggests the idea of intimate relationships has to extend beyond the biological assumption of kinship relations The idea of fiction is also not free from the biological imagination or the persistent dichotomy of nature culture nurture nature This edited volume resurrects the idea of fiction and fictiveness to understand how intimate relationships may use these particular labels translate into practices or create an experiential understanding around relationships The chapters in this book reengage the idea of fiction by exploring the ambiguity within household relationships the process of making and engaging with a craft and skill and the intricacies of making children through IVF and third party involvement They challenge societal norms of marriage and being married by reframing shared substances and the relationality they carry and by remembering deceased ties through acts of resurrection Through vivid illustrations of life and living in South Asia each chapter contributes to an understanding of how fiction and reality are mutually creating each other This book will be beneficial to students academics and scholars of anthropology

particularly those interested in kinship and the sociology of the family The chapters in this book were originally published as a special issue of Contemporary South Asia

Bodies in Formation Rachel Prentice, 2013 In *Bodies in Formation* anthropologist Rachel Prentice enters surgical suites increasingly packed with new medical technologies to explore how surgeons are made in the early twenty first century

Assisted Reproduction Across Borders Merete Lie, Nina Lykke, 2016-10-04 Today it often seems as though Assisted Reproductive Technologies ARTs have reached a stage of normalization at least in some countries and among certain social groups Apparently some practices for example in vitro fertilization IVF have become standard worldwide The contributors to *Assisted Reproduction Across Borders* argue against normalization as an uncontested overall trend This volume reflects on the state of the art of ARTs From feminist perspectives the contributors focus on contemporary political debates triggered by ARTs They examine the varying ways in which ARTs are interpreted and practised in different contexts depending on religious moral and political approaches *Assisted Reproduction Across Borders* embeds feminist analysis of ARTs across a wide variety of countries and cultural contexts discussing controversial practices such as surrogacy from the perspective of the global South as well as the global North as well as inequalities in terms of access to IVF This volume will appeal to scholars and students of anthropology ethnography philosophy political science history sociology film studies media studies literature art history area studies and interdisciplinary areas such as gender studies cultural studies and postcolonial studies

IVF and Assisted Reproduction Sarah Ferber, Nicola J. Marks, Vera Mackie, 2020-12-17 This is the first transnational history of IVF and assisted reproduction It is a key text for scholars and students in social science history science and technology studies STS cultural studies and gender and sexuality studies and a resource for journalists policymakers and anyone interested in assisted reproduction IVF was seen as revolutionary in 1978 when the first two IVF babies were born in the UK and India Assisted reproduction has now contributed to the birth of around ten million people The book traces the work of IVF teams as they developed new techniques and laid the foundations of a multi billion dollar industry It analyses the changing definitions and experience of infertility the markets for eggs and children through surrogacy cross border reproductive treatment and the impact of regulation Using interviews with leading IVF figures archives media reports and the latest science it is a vital addition to the field of reproduction studies This pathbreaking account of the global forces behind the rapid rise of the fertility industry is the first to offer such a truly comprehensive overview of this hugely important topic Sarah Franklin Chair of Sociology University of Cambridge In this compelling overview of one of the most significant technological and social interventions ever developed the cultural and scientific imaginaries of assisted reproduction meet the obdurate histories of laboratory experiments biological materials and personal quests It is an indispensable read for anyone interested in IVF and assisted reproduction Andrea Whittaker Professor of Anthropology Monash University

Childbearing and the Changing Nature of Parenthood Rosalina Pisco Costa, Sampson Lee Blair, 2019-11-25 Around the globe the very conceptualization of family is

associated with the relationship between a parent and a child The birth of a child represents both the end of one experience and the beginning of another
