Making It Count The Improvement Of Social Research And Theory:

Making it Count Stanley Lieberson, 1985 **Making It Count** Stanley Lieberson, **Constructing Social Research** Charles C. Ragin, 1994 Ideal for capstone courses in undergraduate social science or as an invitation to social research this innovative short text shows what is common across three major traditions qualitative research on commonalities comparative research on diversity and quantitative research on relationships among variables These three strategies provide a solid foundation for the study of all social phenomena from the examination of the complexities of everyday life to the investigation of the power of transnational processes *Unanticipated Gains* Mario Luis Small, 2009 While social capital theorists have studied the consequences of having effective social networks few have examined why some people have better networks than others This book argues that the answer lies less in people's deliberate networking than in the institutional conditions of the churches colleges firms gyms and other organizations in which they routinely participate **Continuities in Sociological Human Ecology** Michael Micklin, Dudley L. Poston, 2013-11-11 The completion of this volume would not have been possible without the generous and dedicated help of numerous people The book had its genesis in a conference held at Cornell University in the fall of 1990 that was organized by Dudley Poston Paul Eberts and Michael Hannan all professors at the time at Cornell With the very generous financial assistance of David Call then the dean of Cornell's College of Agriculture and Life Sciences Poston Eberts and Hannan put together a two day conference of lectures and papers by human ecologists from Cornell University and elsewhere The conference focused on sociological human ecology and celebrated the fortieth anniversary of the publication of Amos Hawley's *Human Ecology* Ronald Press 1950 Professor Hawley was the keynote speaker at the conference Many of the authors of the chapters in this volume presented earlier versions at the Cornell conference in 1990 Cornell's Departments of Rural Sociology and Sociology also contributed financial assistance however without Dean Call's very generous support the conference would not have been possible A few months after the conference Poston and Michael Micklin discussed the possibility of asking the various authors of the Cornell conference papers to revise them for publication in a volume on sociological human ecology Many opted to do so but others did not because of time and other kinds of commitments and constraints *Principles of Methodology* Perri 6, Christine Bellamy, 2011-10-17 This book provides a comprehensive accessible guide to social science methodology In so doing it establishes methodology as distinct from both methods and philosophy Most existing textbooks deal with methods or sound ways of collecting and analysing data to generate findings In contrast this innovative book shows how an understanding of methodology allows us to design research so that findings can be used to answer interesting research questions and to build and test theories Most important things in social research e.g. beliefs institutions interests practices and social classes cannot be observed directly This book explains how empirical research can nevertheless be designed to make sound inferences about their nature effects and significance The authors examine what counts as good description explanation and interpretation and how they can be

achieved by striking intelligent trade offs between competing design virtues Coverage includes why methodology matters what philosophical arguments show us about inference competing virtues of good research design purposes of theory models and frameworks forming researchable concepts and typologies explaining and interpreting inferring causation meaning and significance and combining explanation and interpretation The book is essential reading for new researchers faced with the practical challenge of designing research Extensive examples and exercises are provided based on the authors long experience of teaching methodology to multi disciplinary groups Perri 6 is Professor of Social Policy in the Graduate School in the College of Business Law and Social Sciences at Nottingham Trent University Chris Bellamy is Emeritus Professor of Public Administration in the Graduate School Nottingham Trent University *Theorizing About Intercultural Communication* William B. Gudykunst, 2005 In *Theorizing About Intercultural Communication* editor William B Gudykunst brings together key theories that have shaped and influenced human intercultural communication This text provides an excellent overview of the major theories currently in use and examines how these theories will also support the foundation for future research in this area Contributors to this text include individuals who actually developed the theories covered in the book Each contributor highlights the evolution development and application of the theory to provide a thorough and contemporary view of the field Health Inequalities Johan P. Mackenbach, 2019-09-10 The world we live in is hugely unequal People in a better socioeconomic position do not only lead more comfortable lives but also longer and healthier lives This is true not only in the poorer parts of the world but also in the richest countries including the advanced welfare states of Western Europe which have successfully pushed back poverty and other forms of material disadvantage Why are health inequalities systematically higher rates of disease disability and premature death among people with a lower level of education occupation or income so persistent How can we expect to reduce this when it persists even in the most advanced states Written by a leading figure in public health this book looks to answer these questions by taking a broad critical look at the scientific evidence surrounding the explanation of health inequalities including recent findings from the fields of epidemiology sociology psychology economics and genetics It concludes that a simplistic view in which health inequalities are a direct consequence of social inequality does not tell us the full story Drawing upon a unique series of studies covering 30 European countries and more than three decades of observations it shows that health inequalities are partly driven by autonomous forces that are difficult to counteract such as educational expansion increased social mobility and rapid but differential health improvements Finally the book explores how we might use these new findings to continue our efforts to build a healthier and more equal future Offering a truly multidisciplinary perspective and an accessible writing style *Health Inequalities* is an indispensable resource for health researchers professionals and policy makers as well as for social scientists interested in inequality *Democracy in the Workplace and at Home* Randall Ray Booze, 2014-10-16 This book takes a unique look at democracy and how foundational concepts of democracy like freedom liberty and justice play an

important role in everyday lives and work and home environments More importantly the book looks at how lived environments that lack these concepts can negatively impact health and well being The book identifies opportunities for improvement in work and home environments through the introduction of the foundational concepts of democracy and how these concepts can improve humans everyday lives through various laws that have been established to protect democratic rights within these lived environments The book also provides an analysis of research participants views related to having various democracy conditions within work and home environments and demonstrates how various technologies can be used to improve humans ability to create more democratic healthy and productive work and home environments

Challenging the Qualitative-Quantitative Divide Barry Cooper, Judith Glaesser, Roger Gomm, Martyn Hammersley, 2012-03-08 This book challenges the divide between qualitative and quantitative approaches that is now institutionalized within social science Rather than suggesting the mixing of methods Challenging the Qualitative Quantitative Divide provides a thorough interrogation of the arguments and practices characteristic of both sides of the divide focusing on how well they address the common problems that all social research faces particularly as regards causal analysis The authors identify some fundamental weaknesses in both quantitative and qualitative approaches and explore whether case focused analysis for instance in the form of Qualitative Comparative Analysis Analytic Induction Grounded Theorising or Cluster Analysis can bridge the gap between the two sides

Agile Actors on Complex Terrains Graham Room, 2016-06-17 This book assesses the value and relevance of the literature on complex systems to policy making contributing to both social theory and policy analysis For this purpose it develops two key ideas agile action and transformative realism The book takes some major themes from complexity science presents them in a clear and accessible manner and applies them to core problems in sociological theory and policy analysis Combining complexity science with perspectives from institutionalism and political economy this book is the first to integrate these fields conceptually methodologically and in terms of the implications for policy analysis and practice Room shows how the models and methods of social and complexity science can be jointly deployed and applied to empirical areas of public policy He demonstrates how complexity science can provide insight into the nonlinear dynamics of the social world but why these need to be understood by reference to the unequal distribution of power and advantage Among the sociological debates with which the book engages are those concerned with causation and explanation rational action and positional competition and the place of evolutionary concepts in accounts of social change Among the policy debates are those concerned with evidence and policy the dynamics of inequality and libertarian paternalism The book will appeal to final year undergraduates and postgraduate students in social sciences scholars in social

and policy studies broadly defined policy makers who want to go beyond conventional discussions of evidence based policy making and cross national lesson drawing and consider how to approach complex and turbulent policy terrains and a wider range of scholars in other disciplines where complexity science is already well developed

Comparative Historical Analysis in the Social Sciences James Mahoney, Dietrich Rueschemeyer, 2003-02-10 This book systematically investigates the past accomplishments and future agendas of contemporary comparative historical analysis Its core essays explore three major issues the accumulation of knowledge in the field over the past three decades the analytic tools used to study temporal process and historical patterns and the methodologies available for making inferences and for building theories The introductory and concluding essays situate the field as a whole by comparing it to alternative approaches within the social sciences Comparative Historical Analysis in the Social Sciences will serve as an invaluable resource for scholars in the field and it will represent a challenge to many other social scientists especially those who have raised skeptical concerns about comparative historical analysis in the past

Medical Sociology on the Move William C. Cockerham, 2025-09-01 This 2nd edition provides readers with an updated single source reviewing and updating sociological theory in medical or health sociology The book not only addresses the major theoretical approaches in the field today it also identifies the future directions these theories are likely to take in explaining the social processes affecting health and disease Many of the chapters are written by leading medical sociologists who feature the use of theory in their everyday work including contributions from the original theorists of fundamental causes health lifestyles and medicalization Theories focusing on both agency and structure are included to provide a comprehensive account of this important area in medical sociology The book includes a new chapter on life course theory

Causality in Policy Studies Alessia Damonte, Fedra Negri, 2023-02-13 This volume provides a methodological toolbox for conducting policy research Recognizing that policy research spans various academic disciplines each of which takes a different view on causality the volume introduces a methodologically pluralistic approach to policy studies Each chapter clarifies the research question that each technique can answer the research design and data treatment that each technique requires for its results to be sound the validity domain of its results and the actual deployment of the technique through a replicable example Techniques covered include quasi experimental designs approaches to account for selection bias and observed imbalances directed acyclic graphs and structural equation models Qualitative Comparative Analysis Bayesian case study and process tracing and Agent Based Modelling By working through the volume readers will understand how to learn from different techniques apply them consciously and triangulate them to make better sense of findings This volume is intended for advanced academic courses as well as scholars and practitioners in policy related fields such as political science economics sociology and public administration This is an open access book

What's Wrong with Sociology? Stephen Cole, 2018-04-17 Since the 1950s sociology has experienced a decline in prestige when compared with the other social sciences In some highly publicized cases some universities have retrenched their sociology departments others are contemplating either retrenchment or downsizing of their departments Although there are some practitioners of the discipline who believe that it has never been in better shape many sociologists have come to believe that there are very serious problems both in the cognitive and social organization of the discipline This book contains sixteen essays by sociologists who believe that their discipline faces very serious problems which must be overcome if the discipline is to survive and prosper The contributors were selected to represent diverse views and thus there is substantial disagreement among them over what the problems are that sociology faces and how they may be remedied In this highly provocative book readers are likely to find some essays they agree with and others they disagree with but all the essays present important problems faced by the discipline which must be addressed Although the authors of the sixteen essays do not agree on what is wrong with the discipline there are some themes which appear frequently In his introduction Cole summarizes and comments on these themes His introduction centers on the question of whether sociology is entirely socially constructed Is what we believe to be true about society constrained by empirical evidence or is it a result of our ideology power authority and other social processes One theme which appears in many of the essays is that sociology has become too ideological and as a result has lost credibility among university administrators politicians and the general public Many of the essays also stress the view that there are very low levels of consensus in sociology and that it is hard to see evidence of progress Others criticize the discipline for not dealing with the really important social issues and see much of the work published as being parochial and trivial Questions are also raised about why the use of causal models has failed to generate solutions to most of the problems the discipline addresses Some authors believe that the discipline adheres to an overly rational model of human behavior and has failed to keep up with some of the advances introduced by post modernist theories This highly readable set of essays should be of interest to all those concerned about the current state of sociology They will also be useful in introducing graduate students to some of the most important issues currently being debated in the field Stephen Cole is currently professor of sociology at the State University of New York at Stony Brook and professor of sociology at the University of Queensland Australia He is the author of *Making Science Between Nature and*

Society and with Jonathan R Cole Social Stratification in Science
