The Making Of Ireland

Landscapes in Geology

...land contains some of the most impressive
and unspoilt scenery in western Europe. From
the caberach with its quartzite mountains of
onegal in the north to the ragged clutching
ngers of the Skelng Rocks in the south, the
constant change of light and shade alter
these vistas moment by moment. This country
is forged on the anvil of time in a way which
reflects the constantly changing patterns and
onfigurations in the history of the planet.
The rocks of Ireland contain the clues to its
past, every piece of rock acts as a sort of
realized video film, a record of the events
which have contributed to the creation of the
Santry. These events include the birth and
death of mighty oceans, great desert dunes
