influence of the German historical school In a departure from the received view on the nature of the works of Marshall and Schumpeter the contributors explore their themes in terms of an evolutionary vision and method of evolution social science and evolution conceptions of evolution and evolution and capitalism This timely resource will provide a stimulus not only to Marshall and Schumpeter scholarship within the history of economic thought but also to the recent efforts of economists to explore a research field beyond mainstream equilibrium economics It will therefore prove a fascinating read for academics students and researchers of evolutionary and heterodox economics and historians of economic thought
