Making Pancakes Focus Information:

The Expression of Information Structure Ines Fiedler, Anne Schwarz, 2010-03-24 This book analyzes the different patterns found across sub-Saharan Africa to express information structure. Based on languages from all four African language phyla, it documents the great diversity of linguistic means used to encode information structural phenomena and is therefore highly relevant for some of the most pertinent questions in modern linguistic theory. The special contribution of this volume is the perspective on a variety of information structurally related phenomena which go far beyond classical notions such as focus and topic. Detailed investigations are dedicated to so far less discussed focal subcategories like focus on verbal operators or the thematic categorization. Finally, the information structural configuration of unmarked canonical sentence structures is recognized. The papers provide evidence that the formal means to encode information structural categories range from means such as morphological markers or syntactic operations famous in linguistics to less well known strategies such as defocalization rather than focalization.

Focused Observations, Third Edition Gaye Gronlund, Marlyn James, 2025-04-22 Intentional teaching begins with focused observations and systematic documentation of children's learning and development. *Focused Observations, Third Edition* explains why observation is one of the best methods to get to know each child, well track progress, and plan individualized curriculum. It also provides tools and techniques to help you strengthen your observations, create portfolios with rich documentation, and support each child. You will also learn how to share your findings with families and grow as an observer through review and reflection activities. Learn answers to common questions about observation including: Why should I use observation in my classroom? What does effective observation and documentation look like? How do I fit observation in so that it doesn't take away from teaching and interacting with children? How do observation and documentation work with early learning guidelines? Online videos with nineteen vignettes of children in action provide opportunities to practice observing children and capturing what you see. This updated edition includes new examples and provider anecdotes as well as fresh references and research.

Adverbs and Adverbial Adjuncts at the Interfaces Katalin É Kiss, 2009 This series consists of collected volumes and monographs about specific issues dealing with interfaces among the subcomponents of linguistic structure: phonology, morphology, phonology, syntax, semantics, syntax, morphology, and syntax/lexicon. Recent linguistic research has recognized that the subcomponents of grammar interact in non-trivial ways. What is currently under debate is the actual range of such interactions and their most appropriate representation in grammar, and this is precisely the focus of this series. Specifically, it provides a general overview of various topics by examining them through the interaction of grammatical components. The books function as a state-of-the-art report of research.
