A Man From Planet Earth Giancarlo Genta, 2015-08-26 Sometime in the not too distant future unbeknownst to Earth the Galaxy is home to a number of spacefaring societies This confederation enforces a strict protocol forbidding any contact with civilizations that have not yet achieved both a substantial spacefaring capability and sufficient maturity to control the technology explosion before triggering their own extinction While this policy is intended to only bring in peaceful new members matters change entirely when the confederation is threatened by some unknown entity is the menace real or imagined The confederation decides to break with the rules and sends a delegate to Earth to hire one of the supposedly belligerent Earthlings to investigate and to revive the confederation's long unused starfleet The Earthman agrees but demands a high price should he succeed the confederation will have to accept Earth as a new member As the threat becomes ever more acute the question soon becomes which mission will prove harder saving the confederation or convincing it to accept the deal The extensive appendix written in non technical language reviews the scientific and technological topics underlying the plot ranging from the Fermi paradox space travel and artificial collective intelligence to theories on possible universal convergences in technological and biological development

The Man Who Flattened the Earth Mary Terrall, 2006-05-05 Self styled adventurer literary wit philosopher and statesman of science Pierre Louis Moreau de Maupertuis 1698 1759 stood at the center of Enlightenment science and culture Offering an elegant and accessible portrait of this remarkable man Mary Terrall uses the story of Maupertuis's life self fashioning and scientific works to explore what it meant to do science and to be a man of science in eighteenth century Europe Beginning his scientific career as a mathematician in Paris Maupertuis entered the public eye with a much discussed expedition to Lapland which confirmed Newton's calculation that the earth was flattened at the poles He also made significant and often intentionally controversial contributions to physics life science navigation astronomy and metaphysics Called to Berlin by Frederick the Great Maupertuis moved to Prussia to preside over the Academy of Sciences there Equally at home in salons caf's scientific academies and royal courts Maupertuis used his social connections and his printed works to enhance a carefully constructed reputation as both a man of letters and a man of science His social and institutional affiliations in turn affected how Maupertuis formulated his ideas how he presented them to his contemporaries and the reactions they provoked Terrall not only illuminates the life and work of a colorful and important Enlightenment figure but also uses his story to delve into many wider issues including the development of scientific institutions the impact of print culture on science and the interactions of science and government Smart and highly readable Maupertuis will appeal to anyone interested in eighteenth century science and culture Terrall's work is scholarship in the best sense Her explanations of arcane 18th century French physics mathematics astronomy and biology are among the most lucid available in any language Virginia Dawson American Historical

Earth's Man of Color Dr. Oliver Akamnonu,Professor Ndu Eke,2009-11-30 A distinction is drawn between two very similarities based on the two types of characters that the same type of society produced Orie Puzo and Nmaku who hail from Angwa and the adjoining Ocha remained back in the village and made their lives almost permanently there rarely knowing what was going on in the outside world but being nonetheless greatly influenced by the latter Their daily chores are dictated by the daily basic necessities of the moment and they have little to worry perpetually about A lot of their life is controlled by the dictations and predictions of the traditional medicine man who occasionally misfires in his predictions which have no scientific basis supporting them His situation is often taken advantage of by the political class who have little or nothing to lose even if the polity collapses But Livinus on the other end of the spectrum emerges from the civil war and through a dint of luck and hard work studies hard and becomes a doctor He even proceeds overseas despite a close shave by arsonists He specializes and returns home to Akunwanta town from where he is again catapulted by fate and focus to become the governor of his state after a battle between titans eliminates the principal contestants He at first meant well and had the intention of helping to reform society Post election litigation and his lack of the economic leverage almost cost him his mandate But again fate plays a hard one on him and because of his lack of cash he gets tied up to the economic vampires of his society He is bailed out by a coalition of these vampires and narrowly reclaims his mandate only after colossal bribing of umpires who were least expected to soil their hands He decides never to go begging ever again and hence he delves headlong into the rot and decay not by his will but by the circumstances prevailing around him **Man Primeval** John Harris,1854 **Man Primeval: Or, The Constitution and Primitive Condition of the Human Being** John Harris,1856
