Nuclear Waste Governance Achim Brunnengraber,Maria Rosaria Di Nucci,Ana Maria Isidoro Losada,Lutz Mez,Miranda A. Schreurs,2015-02-19 This volume examines the national plans that ten Euratom countries plus Switzerland and the United States are developing to address high level radioactive waste storage and disposal The chapters which were written by 23 international experts outline European and national regulations technology choices safety criteria monitoring systems compensation schemes institutional structures and approaches to public involvement Key stakeholders their values and interests are introduced the responsibilities and authority of different actors considered decision making processes are analyzed as well as the factors influencing different national policy choices The views and expectations of different communities regarding participatory decision making and compensation and the steps that have been or are being taken to promote dialogue and constructive problem solving are also considered

Decision-making and Radioactive Waste Disposal Andrew Newman,Gerry Nagtzaam,2015-11-19 The International Atomic Energy Agency estimates that nuclear power generation facilities produce about 200 000 cubic meters of low and intermediate level waste each year Vital medical procedures industrial processes and basic science research also produce significant quantities of waste All of this waste must be shielded from the population for extended periods of time Finding suitable locations for disposal facilities is beset by two main problems community responses to siting proposals are generally antagonistic and as a result governments have tended to be reactive in their policy making Decision making and

Radioactive Waste Disposal explores these issues utilizing a linear narrative case study approach that critically examines key stakeholder interactions in order to explain how siting decisions for low level waste disposal are made Five countries are featured the US Australia Spain South Korea and Switzerland This book seeks to establish an understanding of the political economic environmental legal and social dimensions of siting across those countries This valuable resource fills a gap in the literature and provides recommendations for future disposal facility siting efforts The book will be of interest to students and scholars of environmental law justice management politics energy and security policy as well as decision makers in government and industry Radioactive Waste Processing and Disposal U.S. Nuclear Regulatory Commission,1980
