Research Michael Young, 2017-01-06 This book is the second in a series of volumes focused on publishing the latest thinking and findings in the field of project management research. It focuses on people and places and their role in projects and project management and draws from conference papers presented at the Australian Institute of Project Management national conferences held in Australia in 2012, 2013 and 2014. Contributors here consist of both academics and practitioners with authors representing the latest developments in Australia, Indonesia and Saudi Arabia. The book brings together papers focused on the themes of project management offices, stakeholders, complexity and risk management. It concludes with three case studies on the application of project management in specific contexts. *What Enables Project Success* Paul Steinfort, PhD, Derek H.T. Walker, PhD, MSc, Grad Dip (Mgt Sys), 2011-06-01 *What Enables Project Success* reports on cutting edge project management research and is academically a work that many practitioners, particularly those who reflect on project management practice and are open to alternative ways of seeing their world, will find pragmatic and useful. *Managing Big Data Integration in the Public Sector* Aggarwal, Anil, 2015-11-12 The era of rapidly progressing technology we live in generates vast amounts of data; however, the challenge exists in understanding how to aggressively monitor and make sense of this data. Without a better understanding of how to collect and manage such large data sets, it becomes increasingly difficult to successfully utilize them. *Managing Big Data Integration in the Public Sector* is a pivotal reference source for the latest scholarly research on the application of big data analytics in government contexts and identifies various strategies in which big data platforms can generate improvements within that sector. Highlighting issues surrounding data management, current models and real world applications, this book is ideally designed for professionals, government agencies, researchers and non-profit organizations interested in the benefits of big data analytics applied in the public sphere.
