Managing Decline Japans Coal Industry Restructuring And Community Response:

Managing Decline Suzanne Culter, 1999-05-01 Industrial restructuring has become a way of life the inevitable accommodation to rapid changes in technology to a global economy that affects large and small communities through the constant flow of goods and people and to the challenging patterns of economic viability that alter that flow *Managing Decline* examines the impact of coal mine closures in Yubari City Hokkaido once one of Japan s most prosperous coal producing cities and asks how Japanese culture has influenced the enactment of and response to industrial policy for restructuring in this community For many years coal formed the backbone of Japan s economic development but the dangers and costs of mining became increasingly expensive for the industry and government Global changes in coal production and exchange finally prompted Japan s decision in 1986 to shut down nearly all domestic coal mines in favor of coal imports Japan s policy for industry restructuring has been applauded as one of the most comprehensive in addressing the needs of the industry the workers and the community At the micro level however the people in the community most affected by the policy decisions have been excluded from the process *Managing Decline* reveals the stratified effects as well as compensation for the different groups in Yubari Although the policy settlement package goes to the coal miners community redevelopment ignores their needs prompting them to leave the city and benefiting instead land owners and public employees Revealed as well as the ways in which Japan s cultural values particularly the vertical social structure as it affects decision making status occupations and company organization and the importance of maintaining the family system figure in the policy process and its consequences The author s research based on two years residence in Yubari during the last few years of the closures makes an important contribution to community studies of social change in Japan It is also the first field study to examine the effects of industrial policy for restructuring in Japan at the worker and community level *Doing Fieldwork in Japan*

Theodore C. Bestor, Patricia G. Steinhoff, Victoria Lyon Bestor, 2003-07-31 *Doing Fieldwork in Japan* taps the expertise of North American and European specialists on the practicalities of conducting long term research in the social sciences and cultural studies In lively first person accounts they discuss their successes and failures doing fieldwork across rural and urban Japan in a wide range of settings among religious pilgrims and adolescent consumers on factory assembly lines and in high schools and wholesale seafood markets with bureaucrats in charge of defense foreign aid and social welfare policy inside radical political movements among adherents of New Religions inside a prosecutor s office and the JET Program for foreign English teachers with journalists in the NHK newsroom while researching race ethnicity and migration and amidst fans and consumers of contemporary popular culture Contributors David M Arase Theodore C Bestor Victoria Lyon Bestor Mary C Brinton John Creighton Campbell Samuel Coleman Suzanne Culter Andrew Gordon Helen Hardacre Joy Hendry David T Johnson Ellis S Krauss David L McConnell Ian Reader Glenda S Roberts Joshua Hotaka Roth Robert J Smith Sheila A Smith Patricia G Steinhoff Merry Isaacs White Christine R Yano Coal Mining Communities and Gentrification in Japan Tai Wei

Natural Disaster and Nuclear Crisis in Japan Jeff Kingston, 2012-03-12 The March 2011 earthquake and tsunami in Japan plunged the country into a state of crisis As the nation struggled to recover from a record breaking magnitude 9 earthquake and a tsunami that was as high as thirty eight meters in some places news trickled out that Fukushima had experienced meltdowns in three reactors These tragic catastrophes claimed some 20 000 lives initially displacing some 500 000 people and overwhelming Japan's formidable disaster preparedness This book brings together the analysis and insights of a group of distinguished experts on Japan to examine what happened how various institutions and actors responded and what lessons can be drawn from Japan's disaster The contributors many of whom experienced the disaster first hand assess the wide ranging repercussions of this catastrophe and how it is already reshaping Japanese culture politics energy policy and urban planning

Race for the Exits Leonard J. Schoppa, 2011-07-15 Contrary to all expectations Japan's long term recession has provoked no sustained political movement to replace the nation's malfunctioning economic structure The country's basic social contract has so far proved resistant to reform even in the face of persistently adverse conditions In *Race for the Exits* Leonard J Schoppa explains why it has endured and how long it can last The postwar Japanese system of convoy capitalism traded lifetime employment for male workers against government support for industry and the private female provision of care for children and the elderly Two social groups bore a particularly heavy burden in providing for the social protection of the weak and dependent large firms which committed to keeping their core workforce on the payroll even in slow times and women who stayed home to care for their homes and families Using the exit voice framework made famous by Albert Hirschman Schoppa argues that both groups have chosen exit rather than voice depriving the political process of the energy needed to propel necessary reforms in the system Instead of fighting for reform firms slowly shift jobs overseas and many

women abandon hopes of accommodating both family and career Over time however these trends have placed growing economic and demographic pressures on the social contract As industries reduce their domestic operations the Japanese economy is further diminished Japan has also experienced a baby bust as women opt out of motherhood Schoppa suggests that a radical break with the Japanese social contract of the past is becoming inevitable as the system slowly and quietly unravels

Hokkaido Ann B. Irish,2009-10-21 Japanese people have lived on the country s other three main islands Honshu Kyushu and Shikoku for many centuries but ethnic Japanese or Wajin began coming to Hokkaido in large numbers only in the latter half of the nineteenth century This book tells the story of Japan s aboriginal people the Ainu followed by that of foreign explorers and ethnic Japanese pioneers The book pays close attention to the Japanese Russian conflicts over the island including Cold War confrontations and more recent clashes over fishing rights and the Hokkaido administered islands seized by the U S S R in 1945

Energy Security in Japan Vlado Vivoda,2016-04-29 For a country already uneasy about energy security the 2011 earthquake and tsunami which caused a nuclear catastrophe at the Fukushima nuclear power plant turned pre existing Japanese concern about the availability of energy into outright anxiety The subsequent closure of many nuclear reactors meant Japan needed to replace lost power quickly and so had no choice but to secure additional fossil fuels undermining Japanese diversification policy and increasing global and regional competition for energy This switch has been at a cost to the already weak Japanese economy whilst the increase in fossil fuel consumption has caused a significant increase in

greenhouse gas emissions In this book Vlado Vivoda examines the drastically changed environment following the disaster in order to analyse Japan's energy security challenges and evaluate Tokyo's energy policy options Looking at how the disaster exacerbated Japan's existing energy security challenges Vivoda considers the best policy options for Japan to enhance national energy security in the future exploring the main impediments to change and how they might be overcome IBSS: Economics: 1999 Compiled by the British Library of Political and Economic Science,2000-12-07 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences **A Disability of the Soul** Karen Nakamura,2013-06-18 Bethel House located in a small fishing village in northern Japan was founded in 1984 as an intentional community for people with schizophrenia and other psychiatric disorders Using a unique community approach to psychosocial recovery Bethel House focuses as much on social integration as on therapeutic work As a centerpiece of this approach Bethel House started its own businesses in order to create employment and socialization opportunities for its residents and to change public attitudes toward the mentally ill but also quite unintentionally provided a significant boost to the distressed local economy Through its work programs communal living and close relationship between hospital and town Bethel has been remarkably successful in carefully reintegrating its members into Japanese society It has become known as a model alternative to long term institutionalization In *A Disability of the Soul* Karen Nakamura explores how the members of this unique community struggle with their lives their illnesses and the meaning of community Told through engaging historical narrative insightful ethnographic vignettes and compelling life stories her account of Bethel House depicts its achievements and setbacks its promises and limitations The book is accompanied by a DVD containing two fascinating documentaries about Bethel made by the author *Bethel Community and Schizophrenia in Northern Japan* and *A Japanese Funeral* winner of the Society for Visual Anthropology Short Film Award and the Society for East Asian Anthropology David Plath Media Award *A Disability of the Soul* is a sensitive and multidimensional portrait of what it means to live with mental illness in contemporary Japan

Making Sense of Mining History Stefan Berger,Peter Alexander,2019-09-30 This book draws together international contributors to analyse a wide range of aspects of mining history across the globe including mining archaeology technologies of mining migration and mining the everyday life of the miner the state and mining industrial relations in mining gender and mining environment and mining mining accidents the visual history of mining and mining heritage The result is a counter balance to more common national and regional case study perspectives Industrial Heritage and Regional Identities Christian Wicke,Stefan Berger,Jana Golombek,2018-04-09 Heritage is not what we see in front of us it is what we make of it in our heads Heritage sites have been connected to a range of identity projects both spatial and non spatial One of the most common links with heritage has been national identity This book stresses that heritage has developed powerful links to regional and local identities Contributors deal explicitly with regions of heavy industry in different parts of the world

exploring non spatial forms of identity including class religious ethnic racial gender and cultural identities In many heritage sites non spatial forms of identity are interlinked with spatial ones Civil society action has been important in representations of regional identities and industrial heritage campaigns Region branding seems to determine the ultimate success of industrial heritage a process that is closely connected to the marketing of regions to provide a viable economic future and attract tourism to the region Selected case studies on coal and steel producing regions in this book provide the first global survey of how regions of heavy industry deal with their industrial heritage and what it means for regional identity and region branding This book draws a range of powerful conclusions about the path dependency of particular forms for post industrial regional identity in former regions of heavy industry It highlights both commonalities and differences in the strategies employed with regard to the regions industrial heritage This book will appeal to lecturers students and scholars in the fields of heritage management industrial studies and cultural geography

The History of Mining Michael Coulson, 2012-11-12

THE INDUSTRY THAT FORGED THE MODERN WORLD Throughout history metals and raw materials have underpinned human activity So it is that the industry responsible for extracting these materials from the ground mining has been ever present throughout the history of civilisation from the ancient world of the Egyptians and Romans to the industrial revolution and the British Empire and through to the present day with mining firms well represented on the world's most important stock indexes including the FTSE100 This book traces the history of mining from those early moments when man first started using tools to the present day where metals continue to underpin economic activity in the post industrial age In doing so the history of mining methods important events technological developments the important firms and the sparkling personalities that built the industry are examined in detail At every stage as the history of mining is traced from 40 000BC to the present day the level of detail increases in accordance with the greater social and industrial developments that have played out as time has progressed This means that a particular focus is given to the period since the industrial revolution and especially the 20th century A look is also taken into the future in an effort to chart the direction this great industry might take in years to come Many books have been written about mining the majority have focused on a particular metal geographical area mining event or mining personality but The History of Mining has a broader scope and covers all of these essential and fascinating areas in one definitive volume

Energy Access and Forced Migration Owen Grafham, 2019-12-06 This edited collection brings together a selection of expert authors and draws on a wide range of case studies geographies and perspectives to explore the links between forced migration and energy access This book addresses the paucity of academic study on how energy is delivered to the millions of people currently forcibly displaced The contributions throughout assess the current energy governance regimes models of delivery and innovative solutions that are dictating how energy is and can be provided to those who have been forced to move away from their homes By bringing together author teams of practitioners academics businesses and policy makers this collection encourages interdisciplinary dialogue about the best

way of approaching energy provision for the forcibly displaced This book will be of great interest to students and scholars of energy access and policy environmental justice and equity and migration and refugee studies Japan Quarterly ,1999

The Face of Decline Thomas Dublin,Walter Licht,2005 The anthracite coal region of Pennsylvania once prospered Today very little mining or industry remains although residents have made valiant efforts to restore the fabric of their communities In *The Face of Decline* the noted historians Thomas Dublin and Walter Licht offer a sweeping history of this area over the course of the twentieth century Combining business labor social political and environmental history Dublin and Licht delve into coal communities to explore grassroots ethnic life and labor activism economic revitalization and the varied impact of economic decline across generations of mining families *The Face of Decline* also features the responses to economic crisis of organized capital and labor local business elites redevelopment agencies and state and federal governments Dublin and Licht draw on a remarkable range of sources oral histories and survey questionnaires documentary photographs the records of coal companies local governments and industrial development corporations federal censuses and community newspapers The authors examine the impact of enduring economic decline across a wide region but focus especially on a small group of mining communities in the region s Panther Valley from Jim Thorpe through Lansford to Tamaqua The authors also place the anthracite region within a broader conceptual framework comparing anthracite s decline to parallel developments in European coal basins and Appalachia and to deindustrialization in the United States more generally
